Innovation Sucks! Alan Watkins, Simon May, 2021-03-14 Businesses spend billions on innovation with very little to show for their investment or effort This book challenges some of the ingrained truths of innovation and suggests a different approach Innovation is not the creation of a novel idea It is the successful commercialisation of that novel idea Rather than starting with a costly time consuming problem assessment that seeks to push potential solutions

through an innovation funnel an impeller approach starts with possible solutions and gets the market to pull the best ones forward so they can fail fast or flourish fast This approach is made possible by the addition of a bee a new type of integrative thinker who can harvest the existing knowledge from the meadow of experts Completely reversing the innovation process means organisations are much better placed to win in the market rather than focusing on finding theoretical solutions or clearing innovation stage gates In addition this approach also recognises that the people who shepherd the solution through the ideation and testing stage are not the same people who must then take that solution to market for successful commercialisation Given the current innovation failure rate coupled with the fact that society is beset with multiple wicked problems it s time to think differently and innovate innovation itself This book is essential reading for Heads of Innovation and Commercialisation Directors of Marketing Heads of New Product Development and New Service Development Strategy Directors Chief Technology Officers Government advisers and policy makers The Necessity of Strangers Alan

Gregerman,2013-08-22 A counterintuitive approach to fostering greater innovation collaboration and engagement Most of us assume our success relies on a network of friends and close contacts But innovative thinking requires a steady stream of fresh ideas and new possibilities which strangers are more likely to introduce Our survival instincts naturally cause us to look upon strangers with suspicion and distrust but in The Necessity of Strangers Alan Gregerman offers the provocative idea that engaging with strangers is an opportunity not a threat and that engaging with the right strangers is essential to unlocking our real potential The Necessity of Strangers reveals how strangers challenge us to think differently about ourselves and the problems we face Shows how strangers can help us innovate better get the most out of each other and achieve genuine collaboration Presents principles for developing a stranger centric mindset to develop new markets and stronger customer relationships leverage the full potential of partnerships and become more effective leaders Includes practical guidance and a toolkit for being more open creating new ideas that matter finding the right strangers in all walks of life and tapping the real brilliance in yourself To stay competitive you and your business need access to more new ideas insights and perspectives than ever before The Necessity of Strangers offers an essential guide to discovering the most exciting opportunities you haven t met yet **Patterns of Power, Grades 6-8** Jeff Anderson,Travis Leech,Melinda Clark,2023-10-10 Authors Jeff
