Gender in the Political Science Classroom Ekaterina M. Levintova, Alison Kathryn Staudinger, 2018-07-12 A collection of studies examining the role of gender in teaching and learning in the traditionally male dominated field of political science Gender in the Political Science Classroom looks at the roles gender plays in teaching and learning in the traditionally male dominated field of political science The contributors to this collection bring a new perspective to investigations of gender issues in the political behavior literature and feminist pedagogy by uniting them with the Scholarship of Teaching and Learning SoTL The volume offers a balance between the theoretical and the practical and includes discussions of issues such as curriculum class participation service learning doctoral dissertations and professional placements The contributors reveal the discipline of political science as a source of continuing gender based inequities but also as a potential site for transformative pedagogy and partnerships that are mindful of gender While the contributors focus on the discipline of political science their findings about gender in higher education are relevant to SoTL practitioners other social science disciplines and the academy at large A bold and compelling collection that asks important questions about the ways in which the teaching of Political Science reproduces gender inequities Aeron Haynie

Public Policy Sara R. Rinfret, Denise Scheberle, Michelle C. Pautz, 2021-12-24 Public Policy A Concise Introduction Second Edition by Sara R Rinfret Denise Scheberle and Michelle C Pautz is a student friendly textbook that connects responsible citizens to the world through a contemporary examination of the fundamentals of American public policy The authors help both majors and non majors foster their analytical skills early and then spend the rest of the semester discussing the policy issues data and events that matter most to them The Second Edition has been updated to include how we can collectively use public policy to raise individuals from the margins and address inequities that exist in our system Recent policy questions include How do we shape our country s health care system How do we address increases in costs of tuition and Did the COVID 19 pandemic positively or negatively shape our public education system

Civil Servants on the Silver Screen Michelle C. Pautz, 2017-12-29 In the movies government often finds itself in a variety of roles from villain to supporting cast and rarely if ever the hero A frequent component of that role is the bureaucracy and as documented in Civil Servants on the Silver Screen Hollywood s Depiction of Government and Bureaucrats bureaucrats are routinely found on screen This book investigates how government bureaucrats are portrayed in the top ten box office grossing films from 2000 through 2015 Perhaps unsurprisingly government is generally portrayed poorly while individual government bureaucrats are typically depicted positively These images of government on screen are particularly important given the ability of movies to influence the attitudes and perceptions of its audiences The nature of these depictions and potential implications are considered as bureaucrats in film are categorized

US Environmental Policy in Action Sara R. Rinfret, Michelle C. Pautz, 2019-02-15 US Environmental Policy in Action provides a comprehensive look at the creation implementation and

evaluation of environmental policy which is of particular importance in our current era of congressional gridlock increasing partisan rhetoric and escalating debates about federal state relations Now in its second edition this volume includes updated case studies two new chapters on food policy and natural resource policy and revised public opinion data With a continued focus on the front lines of environmental policy Rinfret and Pautz take into account the major changes in the practice of US environmental policy during the Trump administration Providing real life examples of how environmental policy works rather than solely discussing how congressional action produces environmental laws US Environmental Policy in Action offers a practical approach to understanding contemporary American environmental policy **Counting Like a State** Philip

Rocco, 2025-06-17 The census plays a foundational if all too easily ignored role in the operation of the American state shaping everything from congressional representation to the allocation of trillions of federal dollars While census taking aspires to the high modernist goal of seeing like a state centralizing standardizing and homogenizing knowledge about a polity it is subject to far more conflict and negotiation than final tabulations maps or technical documentation make apparent This is especially true in a large decentralized polity like the United States where the Constitution entrusts the ultimate authority for the census in the legislative branch In *Counting Like a State* Philip Rocco shows how the production of the US Census now crucially hinges not only on what happens in Washington but also on a series of intergovernmental partnerships State and local officials though not formally responsible for census taking figure importantly in the implementation of the decennial count These officials are essential partners in the construction and maintenance of address lists as well as in outreach and promotion campaigns in hard to count communities The 2020 Census compounded these challenges with new crises Intergovernmental partnerships played a key role in preventing President Trump from adding a citizenship question as state and local officials mounted a coordinated legal counteroffensive Many local officials also simply refused to cooperate with the Trump administration's efforts to exclude undocumented immigrants from the apportionment count The census also took place in the context of a global pandemic that stretched administrative resources to the breaking point While these partnerships allowed the Census Bureau to adapt to ever changing conditions on the ground state and local governments also sounded the alarm when the Trump administration sought to rush the census These efforts helped preserve the quality of the data collected in the 2020 count Rocco's illuminating study of the 2020 Census pulls back the curtain on the administrative state to reveal how something as complex and centralizing as a census takes place within a decentralized federalist system Drawing on analyses of interviews with hundreds of public officials and quantitative analyses of state and local census activities *Counting Like a State* allows scholars and practitioners to better understand what facilitates as well as what impedes effective intergovernmental partnerships for census taking *Subject Guide to Books in Print*, 2001 **Press**

Tripping on Utopia Benjamin Breen,2024-01-16 A Los Angeles Times Bestseller One of The New Yorker s best books of 2024 A bold and brilliant revisionist take on the history of psychedelics in the twentieth century illuminating how a culture of experimental drugs shaped the Cold War and the birth of Silicon Valley It was not the Baby Boomers who ushered in the first

era of widespread drug experimentation. It was their parents. Far from the repressed traditionalists they are often painted as the generation that survived the second World War emerged with a profoundly ambitious sense of social experimentation. In the 40s and 50s transformative drugs rapidly entered mainstream culture where they were not only legal but openly celebrated. American physician John C. Lilly infamously dosed dolphins and himself with LSD in a NASA funded effort to teach dolphins to talk. A tripping Cary Grant mumbled into a Dictaphone about Hegel as astronaut John Glenn returned to Earth. At the center of this revolution were the pioneering anthropologists and star crossed lovers Margaret Mead and Gregory Bateson. Convinced the world was headed toward certain disaster Mead and Bateson made it their life's mission to reshape humanity through a new science of consciousness expansion but soon found themselves at odds with the government bodies who funded their work whose intentions were less than pure. Mead and Bateson's partnership unlocks an untold chapter in the history of the twentieth century linking drug researchers with CIA agents, outsider sexologists and the founders of the Information Age. As we follow Mead and Bateson's fractured love affair from the malarial jungles of New Guinea to the temples of Bali from the espionage of WWII to the scientific revolutions of the Cold War a new origin story for psychedelic science emerges.
