Lab: Weather and Climate Factors

Climate describes the average weather over a long period of time (generally 30 years). The observations recorded in a climate can be spatial and seasonal. Average climate for a point over a long time period is appropriate for many things, given the variability in weather.

The Fusarium Laboratory Manual John F. Leslie, Brett A. Summerell, 2008-02-28 For the first time in over 20 years a comprehensive collection of photographs and descriptions of species in the fungal genus *Fusarium* is available This laboratory manual provides an overview of the biology of *Fusarium* and the techniques involved in the isolation identification and characterization of individual species and the populations in which they occur It is the first time that genetic morphological and molecular approaches have been incorporated into a volume devoted to *Fusarium* identification The authors include descriptions of species both new and old and provide protocols for genetic morphological and molecular identification techniques The *Fusarium Laboratory Manual* also includes some of the evolutionary biology and population genetics thinking that has begun to inform the understanding of agriculturally important fungal pathogens In addition to practical how to protocols it also provides guidance in formulating questions and obtaining answers about this very important group of fungi The need for as many different techniques as possible to be used in the identification and characterization process has never been greater These approaches have applications to fungi other than those in the genus *Fusarium* This volume presents an introduction to the genus *Fusarium* the toxins these fungi produce and the diseases they can cause The *Fusarium Laboratory Manual* is a milestone in the study of the genus *Fusarium* and will help bridge the gap between morphological and phylogenetic taxonomy It will be used by everybody dealing with *Fusarium* in the Third Millennium W F O Marasas Medical Research Council South Africa
