Index to Federal Research & Development Reports, 1965 Wildlife and Wind Farms - Conflicts and Solutions Martin Perrow, 2017-05-02 Wind farms are an essential component of global renewable energy policy and the action to limit the effects of climate change There is however considerable concern over the impacts of wind farms on wildlife leading to a wide range of research and monitoring studies a growing body of literature and several international conferences on the topic This unique multi volume work provides a comprehensive overview of the interactions between wind farms and wildlife Volume 2 provides a state of the science guide to monitoring and mitigation to minimise or even eliminate impacts on wildlife from wind farms The survey and monitoring section includes detailed chapters on birds and bats followed by chapters on modelling of collision risk and populations and the statistical principles of fatality monitoring The following mitigation section comprises chapters on spatial planning and effective mitigation strategies for bats birds and raptors including through repowering A synopsis of international best planning and practice concludes the volume The authors have been carefully selected from across the globe from the large number of academics consultants and practitioners now engaged in wind farm studies for their influential contribution to the science Edited by Martin Perrow and with contributions by over 30 leading researchers including Ed Arnett Cris Hein Manuela Huso Johann Koppel Roel May Ian Smales Shawn Smallwood The authors represent a wide range of organisations and institutions including Bat Conservation International Birdwatch Ireland Norwegian Institute for Nature Research Spanish Council for Scientific Research Swiss Ornithological Institute Technische Universität Berlin and US Geological Survey as well as several leading consultancies Each chapter includes informative figures tables photographs and detailed case studies Several of the latter are produced stand alone from invited additional authors to ensure geographic spread and to showcase exciting new research This book is designed for practitioners researchers managers and for a range of students in higher education particularly those involved with environmental ecological conservation impact assessment and climate change studies Other volumes Volume 1 Onshore Potential Effects 978 1 78427 119 0 Volume 3 Offshore Potential Effects 978 1 78427 127 5 Volume 4 Offshore Monitoring and Mitigation 978 1 78427 131 2 Guidelines for Mine Waste Dump and Stockpile Design Mark Hawley, John Cunniff, 2017-04-01 Guidelines for Mine Waste Dump and Stockpile Design is a comprehensive practical guide to the investigation design operation and monitoring of mine waste dumps dragline spoils and major stockpiles associated with large open pit mines These facilities are some of the largest man made structures on Earth and while most have performed very well there are cases where

instabilities have occurred with severe consequences including loss of life and extensive environmental and economic damage. Developed and written by industry experts with extensive knowledge and experience, this book is an initiative of the Large Open Pit LOP Project. It comprises 16 chapters that follow the life cycle of a mine waste dump, dragline spoil or stockpile from site selection to closure and reclamation. It describes the investigation and design process, introduces a comprehensive stability rating and hazard classification system, provides guidance on acceptability criteria and sets out the key elements of stability and runout analysis. Chapters on site and material characterisation, surface water and groundwater characterisation and management, risk assessment, operations and monitoring, management of ARD, emerging technologies and closure are included. A chapter is also dedicated to the analysis and design of dragline spoils. *Guidelines for Mine Waste Dump and Stockpile Design* summarises the current state of practice and provides insight and guidance to mine operators, geotechnical engineers, mining engineers, hydrogeologists, geologists and other individuals that are responsible at the mine site level for ensuring the stability and performance of these structures. Readership includes mining engineers, geotechnical engineers, civil engineers, engineering geologists, hydrogeologists, environmental scientists and other professionals involved in the site selection, investigation, design, permitting, construction, operation, monitoring, closure and reclamation of mine waste dumps and stockpiles.

Concrete Solutions Michael Grantham, 2016-09-19 *Concrete Solutions* contains the contributions from some 30 countries to *Concrete Solutions*, the 6th International Conference on Concrete Repair, Thessaloniki, Greece, 20-23 June 2016. Strengthening and retrofitting are major themes in this volume, with NDT and electrochemical repair following closely, discussing the latest advances and technologies in concrete repair. The book brings together some interesting and challenging theoretical approaches and questions if we really understand and approach such topics as corrosion monitoring correctly. *Concrete Solutions* is an essential reference work for those working in the concrete repair field, from engineers to architects and from students to clients. The *Concrete Solutions* Series of international conferences on concrete repair began in 2003 with a conference held in St Malo, France, in association with INSA Rennes. Subsequent conferences have seen the Series partnering with the University of Padua, Italy, in 2009; with TU Dresden, Germany, in 2011; and with Queen's University Belfast, Northern Ireland, in 2014. In 2016, Thessaloniki, Greece, hosted the conference, partnering with both Aristotle University of Thessaloniki (AUTH) and Democritus University of Thrace (DUTH). The next conference in the series will be held in 2019 in Istanbul.

Avoidable Deaths Nibedita S. Ray-Bennett, 2017-09-04 This book addresses one of the most fundamental questions of the 21st century: why deaths continue to occur in natural disasters despite the tremendous advancements in disaster management science and weather forecasting systems, increased sophistication of human built environments and ongoing economic and policy development worldwide. By presenting an interdisciplinary tool for analysing systems failure, the book provides concrete suggestions on how deaths may be reduced in resource-poor contexts. It goes beyond traditional risk and vulnerability perspectives and demonstrates that deaths in disasters are complex problems that

can be solved by adopting a socio technical perspective to improve current disaster management systems in the developing world The book is a timely contribution as it directly addresses Global Target One of the UN s Sendai Framework for Disaster Risk Reduction which has urged 185 UN Member States to reduce disaster mortality by 2030 Further it offers a valuable resource for students researchers policy makers and practitioners interested in disaster risk reduction human rights gender sociology of risk crisis and disasters environmental science organisation and management studies Advances in Human Aspects of Transportation: Part I Neville Stanton, Giuseppe Di Bucchianico, Andrea Vallicelli, Steven Landry, 2021-07-19

Human Factors and Ergonomics have made a considerable contribution to the research design development operation and analysis of transportation systems which includes road and rail vehicles and their complementary infrastructure aviation and maritime transportation This book presents recent advances in the Human Factors aspects of Transportation These advances include accident analysis automation of vehicles comfort distraction of drivers understanding of distraction and how to avoid it environmental concerns in vehicle systems design intelligent transport systems methodological developments new systems and technology observational and case studies safety situation awareness skill development and training warnings and workload This book brings together the most recent human factors work in the transportation domain including empirical research human performance and other types of modeling analysis and development The issues facing engineers scientists and other practitioners of human factors in transportation research are becoming more challenging and more critical The common theme across these sections is that they deal with the intersection of the human and the system Moreover many of the chapter topics cross section boundaries for instance by focusing on function allocation in NextGen or on the safety benefits of a tower controller tool This is in keeping with the systemic nature of the problems facing human factors experts in rail and road aviation and maritime research it is becoming increasingly important to view problems not as isolated issues that can be extracted from the system environment but as embedded issues that can only be understood as a part of an overall system **Government-wide Index to Federal Research & Development Reports** ,1965 *Scientific and*

Agola, Joseph L. Awange, 2014-07-08 This book reviews the key conceptions and economic theories

of poverty explains poverty environment nexus and finally offers innovative socio economic and scientific geospatial solutions for the 21st Century The book makes it possible for our readers to understand poverty thorough a concise review of the major theoretical economic frameworks measures of poverty and points out the need to understand rural urban dichotomy of poverty We find the theories and measures to be less than perfect and therefore point out the need to treat these measures and theories as convenient tools lacking perfect accuracy and utmost scientific reliability It follows then that the supposedly knowledgeably crafted poverty reduction and environmental preservation solutions are inherently imperfect The economic solutions proposed in this book transcend extant humdrum macroeconomic and policy measures targeting poverty and environmental issues We point to a new paradigm in which private sector and other stakeholders can create new and inclusive markets where value is co created and shared Above all this book offers timely state of the art geospatial solutions targeting the most pressing global problems of water e g the use of the Gravity Recovery and Climate Experiment GRACE missions to estimate changes in stored water in the water poverty environment nexus pollution agriculture and disaster management where geospatial techniques are applied under strong environmental impact assessment regulatory regimes This book provides a good summary of economic theories of poverty as well as a vivid depiction of the state of environmental degradation in the world People often work separately on different issues that are in fact closely intertwined The principle of holism is that the whole is greater than the sum of its parts and I believe that this joint venture of two experts on poverty and environment has produced something more than a sum of two separate monographs on the issues Various points raised in this volume are worth heeding when we think of formulation and implementation of a truly effective post MDGs development agenda Yoichi Mine Professor of Human Security and African Area Study Graduate School of Global Studies Doshisha University Japan
