**Wireless Networks: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources, 2015-09-30 We live in a wireless society one where convenience and accessibility determine the efficacy of the latest electronic gadgets and mobile devices Making the most of these technologies and ensuring their security against potential attackers requires increased diligence in mobile technology research and development Mobile Computing and Wireless Networks Concepts Methodologies Tools and Applications brings together a comprehensive range of voices and research in the area of mobile and wireless technologies exploring the successes and failures advantages and drawbacks and benefits and limitations of the technology With applications in a plethora of different research and topic areas this multi volume reference work benefits researchers service providers end users and information technology professionals This four volume reference work includes a diverse array of chapters and authors covering topics such as m-commerce network ethics mobile agent systems mobile learning communications infrastructure and applications in fields such as business healthcare government tourism and more      **Performance Evaluation and Benchmarking** Raghunath Nambiar, Meikel

Poess, 2022-01-14 This book constitutes the refereed post conference proceedings of the 13th TPC Technology Conference on

Performance Evaluation and Benchmarking TPCTC 2021 held in August 2021 The 9 papers presented were carefully reviewed and selected from numerous submissions The TPC encourages researchers and industry experts to present and debate novel ideas and methodologies in performance evaluation measurement and characterization Handbook of Research on Innovations and Applications of AI, IoT, and Cognitive Technologies Zhao, Jingyuan, Kumar, V. Vinoth, 2021-06-25 Recently artificial intelligence AI the internet of things IoT and cognitive technologies have successfully been applied to various research domains including computer vision natural language processing voice recognition and more In addition AI with IoT has made a significant breakthrough and a shift in technical direction to achieve high efficiency and adaptability in a variety of new applications On the other hand network design and optimization for AI applications addresses a complementary topic namely the support of AI based systems through novel networking techniques including new architectures as well as performance models for IoT systems IoT has paved the way to a plethora of new application domains at the same time posing several challenges as a multitude of devices protocols communication channels architectures and middleware exist Big data generated by these devices calls for advanced learning and data mining techniques to effectively understand learn and reason with this volume of information such as cognitive technologies Cognitive technologies play a major role in developing successful cognitive systems which mimic cognitive functions associated with human intelligence such as learning and problem solving Thus there is a continuing demand for recent research in these two linked fields The Handbook of Research on Innovations and Applications of AI IoT and Cognitive Technologies discusses the latest innovations and applications of AI IoT and cognitive based smart systems The chapters cover the intersection of these three fields in emerging and developed economies in terms of their respective development situation public policies technologies and intellectual capital innovation systems competition and strategies marketing and growth capability and governance and relegation models These applications span areas such as healthcare security and privacy industrial systems multidisciplinary sciences and more This book is ideal for technologists IT specialists policymakers government officials academics students and practitioners interested in the experiences of innovations and applications of AI IoT and cognitive technologies

*Handbook of Research on Machine Learning Innovations and Trends* Hassanien, Aboul Ella, Gaber, Tarek, 2017-04-03 Continuous improvements in technological applications have allowed more opportunities to develop automated systems This not only leads to higher success in smart data analysis but it increases the overall probability of technological progression The Handbook of Research on Machine Learning Innovations and Trends is a key resource on the latest advances and research regarding the vast range of advanced systems and applications involved in machine intelligence Highlighting multidisciplinary studies on decision theory intelligent search and multi agent systems this publication is an ideal reference source for professionals and researchers working in the field of machine learning and its applications **Cutting-Edge Technologies and Social Media Use in Higher Education** Benson, Vladlena, 2014-02-28 This book brings together

research on the multi faceted nature and overarching impact of social technologies on the main opportunities and challenges facing today s post secondary classrooms from issues of social capital formation to student support and recruitment

*Neural Information Processing* Chu Kiong Loo,Yap Keem Siah,Kok Wai Wong,Andrew Teoh Beng Jin,Kaizhu Huang,2014-10-21 The three volume set LNCS 8834 LNCS 8835 and LNCS 8836 constitutes the proceedings of the 20th International Conference on Neural Information Processing ICONIP 2014 held in Kuching Malaysia in November 2014 The 231 full papers presented were carefully reviewed and selected from 375 submissions The selected papers cover major topics of theoretical research empirical study and applications of neural information processing research The 3 volumes represent topical sections containing articles on cognitive science neural networks and learning systems theory and design applications kernel and statistical methods evolutionary computation and hybrid intelligent systems signal and image processing and special sessions intelligent systems for supporting decision making processes theories and applications cognitive robotics and learning systems for social network and web mining     Intelligent Systems Design and Applications Ajith Abraham,Anu Bajaj,Thomas Hanne,Patrick Siarry,2024-07-24 This book highlights recent research on intelligent systems and nature inspired computing It presents 45 selected papers focused on Natural Language Processing from the 23rd International Conference on Intelligent Systems Design and Applications ISDA 2023 which was held in 5 different cities namely Olten Switzerland Porto Portugal Kaunas Lithuania Greater Noida India Kochi India and in online mode The ISDA is a premier conference in the field of artificial intelligence and the latest installment brought together researchers engineers and practitioners whose work involves intelligent systems and their applications in industry ISDA 2023 had contributions by authors from 64 countries This book offers a valuable reference guide for all specialists scientists academicians researchers students and practitioners in the field of artificial intelligence and Natural Language Processing     **Versatile**

**Cybersecurity** Mauro Conti,Gaurav Somani,Radha Poovendran,2018-10-17 Cyber security research is one of the important areas in the computer science domain which also plays a major role in the life of almost every individual enterprise society and country which this book illustrates A large number of advanced security books focus on either cryptography or system security which covers both information and network security However there is hardly any books available for advanced level students and research scholars in security research to systematically study how the major attacks are studied modeled planned and combated by the community This book aims to fill this gap This book provides focused content related to specific attacks or attack families These dedicated discussions in the form of individual chapters covers the application or area specific aspects while discussing the placement of defense solutions to combat the attacks It includes eight high quality chapters from established security research groups worldwide which address important attacks from theoretical modeling as well as practical aspects Each chapter brings together comprehensive and structured information on an attack or an attack family The authors present crisp detailing on the state of the art with quality illustration of defense mechanisms and open

research problems This book also covers various important attacks families such as insider threats semantics social engineering attacks distributed denial of service attacks botnet based attacks cyber physical malware based attacks cross vm attacks and IoT covert channel attacks This book will serve the interests of cyber security enthusiasts undergraduates post graduates researchers and professionals working in this field

**Mobile Computing and Sustainable Informatics** Subarna Shakya,Klimis Ntalianis,Khaled A. Kamel,2022-07-15 This book gathers selected high quality research papers presented at International Conference on Mobile Computing and Sustainable Informatics ICMCSI 2022 organized by Pulchowk Campus Institute of Engineering Tribhuvan University Nepal during 27 28 January 2022 The book discusses recent developments in mobile communication technologies ranging from mobile edge computing devices to personalized embedded and sustainable applications The book covers vital topics like mobile networks computing models algorithms sustainable models and advanced informatics that supports the symbiosis of mobile computing and sustainable informatics

**Selected Papers from the First International Symposium on Future ICT (Future-ICT 2019) in Conjunction with 4th International Symposium on Mobile Internet Security (MobiSec 2019)** Giovanni Pau,Hsing-Chung Chen,Fang-Yie Leu,2021-05-11 The International Symposium on Future ICT Future ICT 2019 in conjunction with the 4th International Symposium on Mobile Internet Security MobiSec 2019 was held on 17 19 October 2019 in Taichung Taiwan The symposium provided academic and industry professionals an opportunity to discuss the latest issues and progress in advancing smart applications based on future ICT and its relative security The symposium aimed to publish high quality papers strictly related to the various theories and practical applications concerning advanced smart applications future ICT and related communications and networks It was expected that the symposium and its publications would be a trigger for further related research and technology improvements in this field

**Network and System Security** Mirosław Kutylowski,Jun Zhang,Chao Chen,2020-12-18 This book constitutes the refereed proceedings of the 14th International Conference on Network and System Security NSS 2020 held in Melbourne VIC Australia in November 2020 The 17 full and 9 short papers were carefully reviewed and selected from 60 submissions The selected papers are devoted to topics such as secure operating system architectures applications programming and security testing intrusion and attack detection cybersecurity intelligence access control cryptographic techniques cryptocurrencies ransomware anonymity trust recommendation systems as well machine learning problems Due to the Corona pandemic the event was held virtually

**Neural Approaches to Conversational Information Retrieval** Jianfeng Gao,Chenyan Xiong,Paul Bennett,Nick Craswell,2023-03-16 This book surveys recent advances in Conversational Information Retrieval CIR focusing on neural approaches that have been developed in the last few years Progress in deep learning has brought tremendous improvements in natural language processing NLP and conversational AI leading to a plethora of commercial conversational services that allow naturally spoken and typed interaction increasing the need for more human centric interactions in IR The book contains nine chapters Chapter 1 motivates the research of CIR by reviewing the studies

on how people search and subsequently defines a CIR system and a reference architecture which is described in detail in the rest of the book Chapter 2 provides a detailed discussion of techniques for evaluating a CIR system a goal oriented conversational AI system with a human in the loop Then Chapters 3 to 7 describe the algorithms and methods for developing the main CIR modules or sub systems In Chapter 3 conversational document search is discussed which can be viewed as a sub system of the CIR system Chapter 4 is about algorithms and methods for query focused multi document summarization Chapter 5 describes various neural models for conversational machine comprehension which generate a direct answer to a user query based on retrieved query relevant documents while Chapter 6 details neural approaches to conversational question answering over knowledge bases which is fundamental to the knowledge base search module of a CIR system Chapter 7 elaborates various techniques and models that aim to equip a CIR system with the capability of proactively leading a human machine conversation Chapter 8 reviews a variety of commercial systems for CIR and related tasks It first presents an overview of research platforms and toolkits which enable scientists and practitioners to build conversational experiences and continues with historical highlights and recent trends in a range of application areas Chapter 9 eventually concludes the book with a brief discussion of research trends and areas for future work The primary target audience of the book are the IR and NLP research communities However audiences with another background such as machine learning or human computer interaction will also find it an accessible introduction to CIR

*International Conference on Innovative Computing and Communications* Ashish Khanna,Deepak Gupta,Siddhartha Bhattacharyya,Vaclav Snasel,Jan Platos,Aboul Ella Hassanien,2020-02-28 This book includes high quality research papers presented at the Second International Conference on Innovative Computing and Communication ICICC 2019 which is held at the V B Technical University of Ostrava Czech Republic on 21 22 March 2019 Introducing the innovative works of scientists professors research scholars students and industrial experts in the fields of computing and communication the book promotes the transformation of fundamental research into institutional and industrialized research and the conversion of applied exploration into real time applications
