

Creating new Web Intelligence document

1. On the InfoView Home page, click **New** and select **Web Intelligence document** from the list.

2. You create Web Intelligence documents by selecting a universe in InfoView. Click the title of the universe on which you want to create a document.

Each universe maps to a database containing corporate business information. This database can be a relational database or an OLAP (On-Line Analytical Processing) database. Although the data is stored differently in relational and OLAP databases, you access it in the same way through a universe.

3. Once you are connected to a universe, the universe objects appear in the Query Manager.

4. You build a query by selecting objects in the Query Manager Data page, and adding them to the Results Objects pane. You can set various properties for the query.

5. Run the query to get the data for each object.
