politiques industrielle de l'innovation R D et régionale s'est développée au milieu des années 90 dans certains États membres de l'UE dont l'Allemagne. Puis, avec un retard d'environ 10 ans, l'émergence de ce domaine politique a eu lieu en France. Le niveau européen n'a guère commencé à traiter plus intensivement les clusters et la politique des clusters qu'au milieu des années 2000 dans le cadre de la stratégie de Lisbonne et a développé une approche politique systématique à partir de 2008. L'impulsion pour le développement d'une politique européenne des clusters ne venait justement pas de l'UE. Même si le domaine de la politique des clusters a considérablement évolué au sein de la stratégie Europe 2020, l'UE n'a pas montré de tendance de coordination pour les politiques publiques de clusters de ses États membres. Au contraire, la politique de l'UE dans ce champ respectif est plutôt complémentaire et favorable vis-à-vis des politiques nationales. Il est montré que dans le domaine des clusters, les trois arènes politiques l'UE, l'Allemagne et la France se sont développées en grande partie indépendamment les unes des autres et chacune a suivi sa propre logique déterminée par différentes institutions, contextes, traditions et dépendances de chemin. Le degré d'intégration vertical et horizontal est faible entre l'UE et les États membres. Les modèles entrelacés commencent tout juste à se différencier. Cependant, le transfert de politique ou même les processus d'apprentissage politique entre les trois arènes l'UE, l'Allemagne et la France commencent à être reconnus. Il existe de nettes différences entre les politiques publiques des clusters en France et en Allemagne. La politique est conçue et mise en œuvre en Allemagne principalement au niveau des Länder, tandis qu'en France elle est toujours dirigée par le gouvernement central avec toutefois une forte implication régionale. L'orientation de la politique de l'UE en matière de clusters dans le cadre de la stratégie Europe 2020 a été prise plus clairement en France qu'en Allemagne. La logique derrière les mesures de politique de clusters de l'UE liées à la stratégie de Lisbonne était d'améliorer la capacité d'innovation, la logique des mesures de politique de clusters dans le contexte de la stratégie Europe 2020 est de moderniser la base industrielle de l'Europe en développant de nouvelles chaînes de valeur. En bref, la politique de l'UE en matière de clusters a subi des changements considérables. EN Cluster policy as a policy area at the interface of industrial innovation R D and regional policies firstly emerged in the mid 1990s in some EU member states including Germany. The corresponding development only started around 10 years later in France. The European level also began to deal more intensively with clusters and cluster policy in the mid 2000s in relation to the Lisbon strategy. A systematic policy approach has been developed from 2008 onwards. The impetus for creating a cluster policy in Europe just did not come from the EU level. Even if the policy field EU cluster policy has undergone significant changes in the course of the Europe 2020 strategy, the member states' policies have not yet been coordinated by the EU level and as far as can be seen, the EU has not attempted to do so. The EU cluster policy can be seen rather complementary and supportive of national policies. The paper shows that the three arena of cluster policy EU, Germany and France emerged and developed largely independently of one another. Each arena followed its own logic determined by different institutions, contexts, traditions and path dependencies. Both the vertical and the horizontal degree of integration is low between the EU and

member states in this respective policy area Intertwining patterns are just about to emerge However policy transfer or even policy learning processes between the three arenas EU Germany and France can already be recognized There are clear differences in the cluster policies of France and Germany In Germany cluster policy is primarily designed and implemented at the regional level while in France it is still controlled by the central government albeit with increasing conceptual participation at the regional level The realignment of the EU cluster policy as part of the Europe 2020 strategy received a much stronger response in France than in Germany The rationale behind the measures of EU cluster policy related to the Lisbon strategy was to improve the ability to innovate the rationale behind the measures of cluster policy within the framework of the Europe 2020 strategy lies in the modernization of Europe's industrial base through the development of new value chains In this respect EU cluster policy has undergone considerable change
