

TVT-O procedure

A new TVT-O procedure (Gynecare, Ethicon) using an inside-out approach to minimize urethral and bladder injury has been proposed.

But, at this time, there is no objective evidence that it is any safer than the out-inside type sling procedure.

Neuman compared two anti-incontinence operations: the TVT and the TVT-O for the first two 75 patients groups.

In this studies, the TVT-obturator patients seem to have less intra-operative and post-operative surgical complications than the TVT patients with the same early therapeutic failure rates, respectively 1.3% and 2.7% with one year follow-up.
