U S Intelligence Report Predictions 2025:

Reducing Uncertainty Thomas Fingar, 2011-07-20 An look at what Intelligence Community analysts do and how and how they are affected by the political context that shapes uses and abuses their outputs The US government spends billions of dollars every year to reduce uncertainty to monitor and forecast everything from the weather to the spread of disease In other words we spend a lot of money to anticipate problems identify opportunities and avoid mistakes A substantial portion of what we spend over 50 billion a year goes to the US Intelligence Community Reducing Uncertainty describes what Intelligence Community analysts do how they do it and how they are affected by the political context that shapes uses and sometimes abuses their output In particular it looks at why IC analysts pay more attention to threats than to opportunities and why they appear to focus more on warning about the possibility of bad things happening than on providing the input necessary for increasing the likelihood of positive outcomes The book is intended to increase public understanding of what IC analysts do to elicit more relevant and constructive suggestions for improvement from outside the Intelligence Community to stimulate innovation and collaboration among analysts at all grade levels in all agencies and to provide a core resource for students of intelligence The most valuable aspect of this book is the in depth discussion of National Intelligence Estimates NIE what they are what it means to say that they represent the most authoritative judgments of the Intelligence Community why and how they are important and why they have such high political salience and symbolic importance The final chapter lays out from an insider s perspective the story of the flawed Iraq Weapons of Mass Destruction WMD NIE and its impact on the subsequent Iran nuclear NIE paying particular attention to the heightened political scrutiny the latter received in Congress following the Iraq NIE debacle Praise for Reducing Uncertainty This is a well documented well written piece by a former high ranking member of the intelligence community Recommended CHOICE Fingar provides a clear and useful tour of how intelligence analysis is produced Political Science Quarterly Tom Fingar provides a frank detailed examination of the challenges to and successes of the U S Intelligence Community In doing so he reveals insights and strategies that directly address our national security needs High stakes examples described by Fingar provide an insider account only he can provide The result is riveting and informative William J Perry Secretary of Defense for the United States 1994 to 1997

Strategic Analysis in Support of International Policy Making Thomas Juneau, 2017-02-02 The book aims to improve our understanding of what it means to create high quality analytical products by focusing on the concept of relevance for policy makers Despite variations in context strategic analysts in different sectors in both intelligence and non intelligence government organizations private consultancies think tanks and academia face similar problems in identifying the needs of their clients and setting up organizations with the mandates structures and personnel necessary to address those needs The objective is therefore to identify these common challenges compare solutions and share lessons learned To do so broader thematic reflections on strategic analysis are combined with innovative case studies of how organizations have worked to

successfully produce relevant analysis The first section explores challenges to achieving relevance at the level of the analyst while the remainder of the book analyses cases at the level of organizations *Energy and US Foreign Policy* Ahmed Mahdi, 2012-01-30 The quest for oil can be seen as a defining principle of global US foreign policy an imperative which has shaped and redefined the practice of American diplomacy especially in the wake of 9 11 which raised questions about the stability of global oil resources In *Energy and US Foreign Policy* Ahmed Mahdi relates the military expansion of the world's biggest superpower to its quest to gain guaranteed and secure access to the world's most important commodity Examining the foreign policy of George Bush Sr Bill Clinton and George W Bush culminating in the unprecedented military campaigns of the latter Mahdi demonstrates how and why oil has played a central role in US relations with the wider world By dissecting the failures of the US to secure its own economic and energy interests and by demonstrating the devastating impact this has had on the rest of the world especially in the Middle East Mahdi offers vital analysis for researchers and students of International Relations Diplomacy Security and Energy Studies *Domestic Trends in the United States, China, and Iran* John IV Gordon, Robert W. Button, Karla J. Cunningham, Toy I. Reid, Irv Blickstein, 2009-01-13 The U S Navy faces uncertainty about the degree to which it will have to prepare for a high end future conflict versus the so called Long War To help the Navy understand how critical near mid and far term trends in the United States China and Iran might influence U S security decisions in general and the Navy's investments in particular RAND examined emerging domestic and regional nonmilitary trends in each of the three countries **Pashtun Identity and Geopolitics in Southwest Asia** Iftikhar H. Malik, 2016-07-18 This book juxtaposes vital issues of Pashtun identity state formation Taliban on both sides of the Durand Line Frontier Crimes Regulation security prerogative and the civil societies of Pakistan and Afghanistan which since 9 11 have been posited in a rather precarious geopolitics *A Pentecostal Political Theology for American Renewal* Steven M. Studebaker, 2016-10-26 This book argues that Christians have a stake in the sustainability and success of core cultural values of the West in general and America in particular Steven M Studebaker considers Western and American decline from a theological and specifically Pentecostal perspective The volume proposes and develops a Pentecostal political theology that can be used to address and reframe Christian political identity in the United States Studebaker asserts that American Christians are currently not properly engaged in preventing America's decline or halting the shifts in its core values The problem he suggests is that American Christianity not only gives little thought to the state of the nation beyond a handful of moral issues like abortion but its popular political theologies lead Christians to think of themselves more as aliens than as citizens This book posits that the proposed Pentecostal political theology would help American Christians view themselves as citizens and better recognize their stake in the renewal of their nation The foundation of this proposed political theology is a pneumatological narrative of renewal a biblical narrative of the Spirit that begins with creation proceeds through Incarnation and Pentecost and culminates in the new creation and everlasting kingdom of God This narrative provides the foundation for

a political theology that speaks to the issues of Christian political identity and encourages Christian political participation

Introduction to Geopolitics Colin Flint, 2012-07-26 This clear and concise introductory textbook guides students through their first engagement with geopolitics. It offers a clear framework for understanding contemporary conflicts by showing how geography provides opportunities and limits upon the actions of countries, national groups and terrorist organizations. This second edition is fundamentally restructured to emphasize geopolitical agency and non state actors. The text is fully revised containing a brand new chapter on environmental geopolitics which includes discussion of climate change and resource conflicts. The text contains updated case studies such as the Korean conflict, Israel Palestine and Chechnya and Kashmir to emphasize the multi faceted nature of conflict. These along with guided exercises help explain contemporary global power struggles, environmental geopolitics, the global military actions of the United States, the persistence of nationalist conflicts, the changing role of borders and the new geopolitics of terrorism and peace movements. Throughout the readers are introduced to different theoretical perspectives including feminist contributions as both the practice and representation of geopolitics are discussed. Introduction to Geopolitics is an ideal introductory text which provides a deeper and critical understanding of current affairs, geopolitical structures and agents. The text is extensively illustrated with diagrams, maps, photographs and end of chapter further reading. Both students and general readers alike will find this book an essential stepping stone to understanding contemporary conflicts.

Predictive Intelligence for Tomorrow's Threats Erik J Dahl, David Strachan-Morris, 2025-05-09 The world is facing an ever changing array of complex threats to international security. Yet intelligence agencies have a mixed record of anticipating these threats while decision makers have an equally mixed record of effectively acting on predictive intelligence when offered. Sometimes intelligence has provided a useful warning such as Russia's invasion of Ukraine but at other times it has failed to anticipate critical events such as the progress of fighting in Ukraine or the likelihood that a mob would carry out a deadly assault on the US Capitol building. And at still other times intelligence agencies appear to have provided warning and yet policy makers failed to listen such as before the Hamas attack on Israel on October 7, 2023. This book casts new light on past failures and suggests new frameworks for thinking about future threats and challenges. Written for academics and practitioners it answers key questions about how intelligence can better inform policy makers and in turn help them anticipate and act upon future threats. The chapters in this book were originally published as a special issue of Journal of Policing, Intelligence and Counter Terrorism.

Power and Policy Wesley B. Truitt, 2010-07-01 A qualified expert provides leaders in government and business a much needed primer for accomplishing their most vital task: transforming a purpose into policy through the appropriate acquisition and use of power. At a time when corporations are reeling from mismanagement, a large proportion of homeowners are being forced to default on mortgages and the federal government is rapidly extending its formidable reach into the private sector, it is understandable that many Americans no longer trust big business and government institutions. To get the United States back

on track and to preclude the same kinds of disasters in the future it is imperative for corporate and government leaders as well as private citizens to understand the commonality in all of these events the use and abuse of power This text examines these critical events within a framework of power to explain what motivated our leaders in business and government to make the policies that resulted in these outcomes providing valuable insights on the nature and use of power It then draws lessons today s leaders can use to improve their use of power Examples from current affairs and modern business are discussed in a lively compelling way

The Fall of the West Nicholas Hagger,2022-11-25 In *The Syndicate* 2004 Nicholas Hagger described how in the 20th century a Syndicate of litist mega rich families levelled down the leading Western countries by promoting revolutions wars and independence movements against their empires and planned a New World Order and world government that would control the earth s resources for their own benefit In *The Secret History of the West* 2005 he traced the Syndicate s roots back to secret Freemasonic organisations and revolutions that undermined the West from the Renaissance to the early 20th century In *The Fall of the West* 2022 the third book in his trilogy on the West Hagger updates the story to include the pandemic and describes how Syndicate driven 21st century events from the War on Terror to Covid have brought the Western financial system to the brink of collapse and shifted power from the West to the East and China In this first impartial attempt to assemble all the evidence to date for the origin of Covid like fitting together available pieces of a jigsaw to reveal the main picture Hagger the first to discover the Cultural Revolution in China in March 1966 finds that the three main features of Covid 19 were man made by American NIAID funded medics in 2002 and patented 73 times since 2008 and seem to have been surreptitiously used as a bio weapon in a Syndicate plan to limit the rise of China and its expanding trade A dangerous new Biological Age has been born and the West faces being levelled down and a sudden fall Hagger sees the post Covid West s dream of creating a good New World Order a vaccine protected democratic presidential part federal world government and World State with sufficient authority to abolish war and solve the world s post Covid problems as being challenged by the self interested Syndicate s levelling down and to survive it first has to go along with the Syndicate s plan for West and East to draw together into an authoritarian world government involving China and democratise later This is a thought provoking work with a prophetic vision of the future

Journal of a Dissenter Chris Wright,2025-01-20 This is a lengthy intellectual journal by a political radical that ranges over a variety of subjects such as Marxism capitalism history many schools of modern philosophy psychology economics and contemporary American politics It also includes quite a few personal passages but I ve kept those only because they express common experiences and youthful psychological tendencies Its most useful content for students might be its many summaries of good historical and scientific scholarship especially in the journal s second half Ultimately the document is a fairly comprehensive expression of a particular society as refracted through an inquisitive and critical mind from the ages of 15 to 44

AI, Faith, and the Future Michael J. Paulus Jr.,Michael D. Langford,2022-06-17 Artificial intelligence is rapidly and radically changing our lives

and world This book is a multidisciplinary engagement with the present and future impacts of AI from the standpoint of Christian faith It provides technological philosophical and theological foundations for thinking about AI as well as a series of reflections on the impact of AI on relationships behavior education work and moral action The book serves as an accessible introduction to AI as well as a guide to wise consideration design and use of AI by examining foundational understandings and beliefs from a Christian perspective

The End of American World Order Amitav Acharya, 2018-03-16 The age of Western hegemony is over Whether or not America itself declines or thrives under President Trump's leadership the post war liberal international order underpinned by US military economic and ideological primacy and supported by global institutions serving its power and purpose is coming to an end But what will take its place A Chinese world order A re constituted form of American hegemony A regionalized system of global cooperation including major and emerging powers In this updated and extended edition of his widely acclaimed book Amitav Acharya offers an incisive answer to this fundamental question While the US will remain a major force in world affairs he argues that it has lost the ability to shape world order after its own interests and image As a result the US will be one of a number of anchors including emerging powers regional forces and a concert of the old and new powers shaping a new world order Rejecting labels such as multipolar apolar or G Zero Acharya likens the emerging system to a multiplex theatre offering a choice of plots ideas directors power and action leadership under one roof Finally he reflects on the policies that the US emerging powers and regional actors must pursue to promote stability in this decentred but interdependent multiplex world Written by a leading scholar of the international relations of the non Western world and rising above partisan punditry this book represents a major contribution to debates over the post American era

China-U.S. Economic and Geopolitical Relations Jerald D. Finn, 2007 It is hard for the US to ignore China these days with daily stories of product recalls which show that the vast preponderance of products sold in America are actually made in China Add to that the fact that China is leaping forward in scientific and technology research and is fuelled by a boom economy This new book presents analyses of relevant to China US economic and geopolitical relations

Apocalypse and Post-Politics Mary Manjikian, 2012-03-16 Mary Manjikian's *Apocalypse and Post Politics* The Romance of the End advances the thesis that only those who feel the most safe and whose lives are least precarious can engage in the sort of storytelling which envisions erasing civilization Apocalypse themed novels of contemporary America and historic Britain then are affirmed as a creative luxury of development Manjikian examines a number of such novels using the lens of an international relations theorist identifying faults in the logic of the American exceptionalists who would argue that America is uniquely endowed with resources and a place in the world both of which make continued growth and expansion simultaneously desirable and inevitable In contrast Manjikian shows apocalyptic narratives explore America as merely one nation among many whose trajectory is neither unique nor destined for success *Apocalypse and Post Politics* ultimately argues that the apocalyptic narrative provides both a counterpoint and a corrective to the narrative of exceptionalism

Apocalyptic concepts provide a way for contemporary Americans to view the international system from below from the perspective of those who are powerless rather than those who are powerful This sort of theorizing is also useful for intelligence analysts who question how it all will end and whether America's decline can be predicted or prevented **The Euro-Atlantic System in a Multipolar World** József M. Fiszler, Jakub Wódka, Paweł Olszewski, Tomasz Paszewski, Agnieszka Cianciara, Agnieszka Orzelska-Staczek, 2015-09-17 Euro Atlantic system and especially the relationship between the US and the European Union and NATO cooperation with the EU despite the difficulties are and will be one of the most important elements in the process of building a new global multipolar order However the United States and the European Union should pursue a more correlated international policy based on a realistic and idealistic vision of the world The world needs the Euro Atlantic community as there is no and there won't be in the near future such integrated community of values and interests in the new emerging global order The above problems are described in this monograph which was written in the framework of the research project called The role of the Euro Atlantic system in a multipolar world in the context of the emerging new global order *Introduction to Intelligence* Jonathan M. Acuff, Lamesha Craft, Christopher J. Ferrero, Joseph Fitsanakis, Richard J. Kilroy, Jr., Jonathan Smith, 2021-02-01 Introduction to Intelligence Institutions Operations and Analysis offers a strategic international and comparative approach to covering intelligence organizations and domestic security issues Written by multiple authors each chapter draws on the author's professional and scholarly expertise in the subject matter As a core text for an introductory survey course in intelligence this text provides readers with a comprehensive introduction to intelligence including institutions and processes collection communications and common analytic methods

Transformations of Warfare in the Contemporary World John C. Torpey, David Jacobson, 2016-06-03 Today's warfare has moved away from being an event between massed national populations and toward small numbers of combatants using high tech weaponry The editors of and contributors to the timely collection Transformations of Warfare in the Contemporary World show that this shift reflects changes in the technological strategic ideological and ethical realms In his concluding remarks David Jacobson explores the extent to which the contemporary transformation of warfare is a product of a shift in the character of the combatants themselves Amazon.com [The Future of the Jews](#) Stuart Eizenstat, 2014-07-02 In The Future of the Jews Stuart E. Eizenstat a senior diplomat of international reputation surveys the major geopolitical economic and security challenges facing the world in general and the Jewish world and the United States in particular These forces include the shift of power and influence from the United States and Europe to the emerging powers in Asia and Latin America globalization and the new information age the battle for the direction of the Muslim world nontraditional security threats changing demographics which pose a particular challenge for Jews worldwide and the rise of a new anti-Semitism that seeks to delegitimize Israel as a Jewish state He also discusses the enduring nature of and challenges to the strategic alliance between the United States and Israel In an extensive new foreword to the paper edition Eizenstat addresses crucial

developments affecting the Jewish people since the book first appeared in 2012 including increasing tensions in the Middle East the digital revolution and NSA revelations declining optimism on the Arab Spring the Israeli Palestinian peace process the revival of anti-Semitism In addition he reflects on the changing identity of American Jews as revealed by the Pew Center Survey of U S Jews 2013 Eizenstat's provocative analysis will be of interest to everyone concerned about the future of Jews worldwide and in Israel and the United States role in a world that is confronting unprecedented simultaneous cataclysmic changes

The Secure and the Dispossessed Nick Buxton, Ben Hayes, 2015-11-20 While the world's scientists and many of its inhabitants despair at the impact of climate change corporate and military leaders see nothing but opportunities For them melting ice caps mean newly accessible fossil fuels borders to be secured from climate refugees social conflicts to be managed and more failed states in which to intervene They are securing their assets at the expense of the planet and its inhabitants *The Secure and the Dispossessed* looks at these deadly approaches with a critical eye It also considers the flip side that the legitimacy of the elite is under unprecedented pressure from resistance by communities to resource grabs to those creating new ecological and socially just models for managing our energy food and water Topics covered include geoengineering militarism refugee protection greenwashing and the agricultural crisis among others Adaptation and resilience to a climate changed world is desperately needed but the form it will take will affect all of our futures
