Plant Adaptations to Phosphate Deficiency Alex Joseph Valentine, Alejandra Zúñiga-Feest, Aleysia Kleinert, Pablo Cornejo, Vagner A. Benedito, 2021-05-18 Phosphate is an essential mineral to all plants and its availability in soils is an increasing challenge for agriculture Phosphate is abundant in soils but its biological availability is often low due to the complexes that it forms with soil minerals and compounds The biological availability of Phosphate is further reduced in acidic soils which represent approximately 40% of earth's arable agricultural lands Agricultural systems compensate Phosphate deficiency with fertilizers coming from the mining of rock phosphate which is estimated to exhaust within the next 50 years For these reasons Phosphate limitations in natural and agricultural ecosystems is going to become a global problem and we urgently need to better understand how plants respond to Phosphate deficiency Eurasia 2.0 Mark Bassin, Mikhail Suslov, 2016-03-17 This book discusses the return of geopolitical ideas and doctrines to the post Soviet space with special focus on the new phenomenon of digital geopolitics which is an overarching term for different political practices including dissemination of geopolitical ideas online using the internet by political figures and diplomats for legitimization and outreach activity and viral spread of geopolitical memes Different chapters explore the new possibilities and threats associated with this digitalization of geopolitical knowledge and practice Our authors consider new spatial sensibilities and new identities of global as well as local Selves the emergence of which is facilitated by the internet They explore recent reconfigurations of the traditional imperial conundrum of center versus periphery Developing Manuel Castells argument that social activism in the digital era is organized around cultural values the essays discuss new geopolitical ideologies which aim to reinforce Russia's spiritual sovereignty as a unique civilization while at the same time seeking to rebrand Russia as a greater soft power by utilizing the Russian speaking diaspora or employing traditionalist rhetoric Great Power imagery enemy making and visual mappings of Russia's future territorial expansion are traditional means for the manipulation of imperial pleasures and geopolitical fears In the age of new media however this is being done with greater subtlety by mobilizing the grassroots contracting private information channels and de politicizing geopolitics Given the political events of recent years it is logical that the Ukrainian crisis should provide the thematic backdrop for most of the authors Tutankhamun and Carter Rogerio Sousa, Gabriele Pieke, Tine Bagh, 2024-08-15 First scholarly multi disciplinary re assessment of Howard Carter's discovery and excavation of Tutankhamun's tomb and the impact of the find on our understanding of the material culture of Ancient Egypt The discovery of the tomb of Tutankhamun in 1922 stands out as one of the most important finds of modern archaeology revealing an enormous wealth of objects encapsulating techniques vestiges of uses and re uses of materials as well as unrivalled clues regarding the complex set of beliefs associated with the pharaonic funerary material culture Once cleared from the tomb these objects have captivated the world with their irresistible charm and beauty ending up playing a role in contemporary popular culture However it seems that such magnetism rather hindered than facilitated the scholarly

study of the find One hundred years after the discovery of this magnificent tomb most of its objects remain insufficiently studied to this day This volume aims to show how it remains challenging to study Tutankhamun s objects gathering a collection of studies authored by leading scholars on conservation materials funerary beliefs as well as the reception of motifs and the impact of the discovery Through these studies it becomes clear how ancient objects can help us reconstruct the complex fabric of the ancient Egyptian society and how they keep interacting with modern audiences **Tutankhamun** Martin Bommas,2024-12-02 Over a century after his discovery this comprehensive biography of Tutankhamun explores a wealth of evidence including archaeological and ancient textual sources DNA analysis and CT scanning bringing to life a pharaoh who has remained elusive apart from his grandiose tomb treasures For the first time this volume identifies the names of Tutankhamun s biological parents tracing the footsteps of his short life that was marked by genetic defects and physical deterioration Between his early days and his untimely death Tutankhamun previously Tutankhaten appears as a child of his time he was torn between the cult of the Aten and the restoration of the cult of Amun a campaign in which he personally played a leading role Equipped with a thorough education gifted with a brilliant mind and living mostly in solitude readers will follow in detail how Tutankhamun secured the survival of the 18th Dynasty This book traces Tutankhamun s involvement in processes which can still be felt in Egypt today His complex personality is reconstructed based on archaeological evidence some of which has never been discussed previously and conclusions drawn from both scientific research and a deep understanding of the context in which he lived By also considering the lives of those who were close to the teenage king this book delivers a comprehensive source based biography of an ancient Egyptian pharaoh Complete with intensive references to international scholarship visual sources and maps and excluding the tomb treasures created after his physical death this book is a fresh and original approach to understanding the life not afterlife of the most popular pharaoh of modern times Tutankhamun A Biography is suitable for students scholars and non specialist readers interested in the life of Tutankhamun as well as those working on ancient Egyptian history and religion more broadly particularly that of New Kingdom Egypt Citizenship Utopias in the Global South Henri Onodera,Martta Kaskinen,Eija Ranta,2025-01-23 Citizenship Utopias in the Global South is an edited collection of empirical research that explores emergent forms of activism in Africa Asia and Latin America in times of multiple crises At the intersection of hope and disillusionment the diverse and thought provoking chapters investigate emerging forms of activism in the Global South including youth activisms anti racism struggles feminist initiatives online dissent and Indigenous movements In the 2020s many parts of the world are witnessing contradictory processes of popular claims to rights livelihoods and social justice and subsequent forms of populist authoritarianism and the securitization of civil society Previously hopeful calls for dignity democracy and social justice through protesting strikes civil society campaigns legal reforms and elections for example have been met with disdain and civic disengagement This book investigates the re imagination and pursuit of citizen activism in such times of popular

disillusionment It explores citizenship utopias as social imaginaries that are enacted and that articulate an ideal social order or democratic polity with ideal forms of experiencing citizenship Its chapters interrogate conventional approaches to citizenship by introducing a nuanced and empirically grounded exploration of the complex ways in which people experience negotiate and engage in the societal changes that they aspire towards The examination of citizenship utopias outlines contemporary signals for transformative futures and their possibilities The book undertakes a fresh effort at contributing to the shifting terrain of critical development studies political anthropology political sociology and decolonising scholarship by engaging in discussions about citizenship activism disillusionment and future societal alternatives in times of multiple global challenges The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution CC BY 4.0 license
