Photographing Tutankhamun Christina Riggs, 2020-09-19 They are among the most famous and compelling photographs ever made in archaeology Howard Carter kneeling before the burial shrines of Tutankhamun life size statues of the boy king on guard beside a doorway tantalizingly sealed in his tomb or a solid gold coffin still draped with flowers cut more than 3 300 years ago Yet until now no study has explored the ways in which photography helped mythologize the tomb of Tutankhamun nor the role photography played in shaping archaeological methods and interpretations both in and beyond the field This book undertakes the first critical analysis of the photographic archive formed during the ten year clearance of the tomb and in doing so explores the interface between photography and archaeology at a pivotal time for both Photographing Tutankhamun foregrounds photography as a material technical and social process in early 20th century archaeology in order to question how the photograph made and remade ancient Egypt in the waning age of colonial order

Invisible Solar System Martin Connors, 2024-02-12 When we look at a starry night sky we are looking out through vast invisible expanses of our own Solar System The planets appearing as bright specks have been revealed as worlds by space missions However the invisible spaces between them are equally interesting Unseen forces such as the effect of gravity spiraling magnetic fields and subatomic particles originate from the Sun Celestial bodies too small to see form unexpected patterns while atoms and nuclei are hidden even if in our own bodies Weaving the history of

discovery with clear explanations Invisible Solar System pulls back the cloak of invisibility under which myriad aspects of the local region of space are connected Features Gravity originally seen as an invisible force is now revealed as a curvature of spacetime and even in its simple form enables amazing patterns to form The smallest particles have other structures that enable them to interact powering the present Solar System while also giving clues to nuclear events past and present Long range forces of electricity and magnetism connect the Sun and planets dominating the hot plasma gas of space while protecting us from cosmic rays via multiple layers of magnetic shields

The Social Issue in Contemporary Society

Agata Stachowicz-Stanusch,Lorenzo Mercurio,2019-03-01 It is widely observed that societies are changing and new social issues are raising The relationship between actors in the global environment and in the local as well is changing because of financial crisis new technological revolution climate change richness reallocation and concentration We can see that value creation and management models in organizations are often uncoherent with the satisfaction of needs The ability to create competitive advantages on a financial level seems to be increasingly developed This can be sustained by the clear trend that leads companies to grow in size or create strong groups by shifting uncertainty over the weaker part of the market and unorganized systems and citizens In this misalignment empty spaces in the economic environment are opened These spaces are those where the action of the public system can no longer be effective or where it has never been and where more and more the private interests are weak or absent New wants are emerging in these areas and traditional models are no longer able to answer many of these needs The book The Social Issue in Contemporary Society relations between Companies Public Administrations and People originates from a huge number of questions with the social issue as fil rouge In this perspective the book is divided in four parts Introduction New Models and Tools for Public Administration New Models for New Companies and New Models for New Societies A range of scholars that authored that book provide us with a different point of view about the problem that is underlined in the book title We hope it will be a worthy inspiration for who dream a new idea of society

The Digitalization Conundrum in India Keshab Das,Bhabani Shankar Prasad Mishra,Madhabananda Das,2021-03-01 This book examines the nature extent and implications of rapid strides digitalization has made in India since the turn of the millennium These have been examined not merely in the sphere of information and communication technology ICT but its multifarious applications spreading across almost all aspects of production services and institutions which have profound repercussions for the transformation of the society and economy at the micro meso and macro levels With contributions from both ICT scholars and social scientists this book presents diverse scenarios and unravels challenges faced in the process of technical applications access by the users of these disruptive technologies automation e commerce big data analytics algorithms artificial intelligence cloud computing etc which unlike heavy machines embodied technology mostly defy physical space pace of mobility and inoperability between technologies Chapters in this volume address challenges and possibilities in establishing and operating intricate engineering infrastructure technical and societal constraints encountered

in broad basing digitalization across layers of educational and social skills conducive to difficult geographies Issues dealt within this book include farming healthcare education food processing e commerce labour rural community development open source data and information democracy The chapters also reflect upon implications on local economy and society of the very global nature of these seamless technologies where inter operability remains the quintessential advantage of digitalization whether promoted or spearheaded through the state private sector or global capital The book critiques policy inadequacies and suggests plausible policy approaches to reduce the adverse impacts of fast digitalization and broad base potential benefits across space and levels of socio economic development of regions and society This book would be of interest to scholars practitioners technocrats industry analysts policy makers and civil society agencies *Interdisciplinary Research in Technology and Management* Satyajit Chakrabarti,Ashiq A. Sakib,Souti Chattopadhyay,Sanghamitra Poddar,Anupam Bhattacharya,Malay Gangopadhyaya,2024-05-30 IRTM 2023 We live in an inter connected world In the era of Industry 5 0 technology is getting embedded more and more in the way we learn live work and play This progression is accelerating at a pace never seen before Inter disciplinary and collaborative research across disciplines within the Technology domain and Management domain and across the Technology Management interface is opening up exciting new possibilities for solving problems whose solutions are beyond the scope of a single discipline domain or practice and helping to create a brave new world We are living in an incredible time of change Our effort to hold such an interdisciplinary conference in the virtual mode apparently resonated across the academic community as was evident from the huge response that the first ever conference on Interdisciplinary Research in Technology and Management IRTM held in February 2021 had received from participants across many countries This has encouraged the organizers to hold the next edition of the conference physically in Kolkata on a larger scale in the online mode The pandemic unleashed by Covid 19 in the last two years has shaken the socio economic foundations of countries and societies to a point where the world cannot be the same as before the pandemic It has re focused the world s attention on the priority of healthcare and healthcare infrastructure and its innovative management Inevitably questions have again been raised more vehemently on what kind of a world we want to live in Environmental concerns are being pursued with renewed vigour The urgency of developing new robust infrastructure relevant for the new world is gaining wider consensus By 2030 as reports suggest cyber physical systems internet of things and wearable technology will be everywhere and in everything renewable energy will power the world and digital entertainment will take centre stage among other developments The third edition of the conference on Interdisciplinary Research in Technology and Management attempts to spotlight the above concerns The number of tracks on which papers are invited from scholars researchers consultants and practitioners to share their interdisciplinary research and consultative work has been enlarged As before the papers will be peer reviewed and authors of the selected papers will be invited to present their papers in the IRTM conference The presentation of papers will be interspersed with Keynote Talks by eminent

Art in Chicago Maggie Taft, Robert Cozzolino, 2018-10-24 For decades now the story of art in America has been dominated by New York It gets the majority of attention the stories of its schools

and movements and masterpieces the stuff of pop culture legend Chicago on the other hand well people here just get on with the work of making art Now that art is getting its due Art in Chicago is a magisterial account of the long history of Chicago art from the rupture of the Great Fire in 1871 to the present Manierre Dawson L szl Moholy Nagy and Ivan Albright to Chris Ware Anne Wilson and Theaster Gates The first single volume history of art and artists in Chicago the book in recognition of the complexity of the story it tells doesn't follow a single continuous trajectory Rather it presents an overlapping sequence of interrelated narratives that together tell a full and nuanced yet wholly accessible history of visual art in the city From the temptingly blank canvas left by the Fire we loop back to the 1830s and on up through the 1860s tracing the beginnings of the city's institutional and professional art world and community From there we travel in chronological order through the decades to the present Familiar developments such as the founding of the Art Institute the Armory Show and the arrival of the Bauhaus are given a fresh look while less well known aspects of the story like the contributions of African American artists dating back to the 1860s or the long history of activist art finally get suitable recognition The six chapters each written by an expert in the period brilliantly mix narrative and image weaving in oral histories from artists and critics reflecting on their work in the city and setting new movements and key works in historical context The final chapter comprised of interviews and conversations with contemporary artists brings the story up to the present offering a look at the vibrant art being created in the city now and addressing ongoing debates about what it means to identify as or resist identifying as a Chicago artist today The result is an unprecedentedly inclusive and rich tapestry one that reveals Chicago art in all its variety and vigor and one that will surprise and enlighten even the most dedicated fan of the city's artistic heritage Part of the Terra Foundation for American Art's year-long Art Design Chicago initiative which will bring major arts events to venues throughout Chicago in 2018 Art in Chicago is a landmark publication a book that will be the standard account of Chicago art for decades to come No art fan regardless of their city will want to miss it
