(What are the characteristics, properties, structure, and state parameters?)

### Solids

Most of solids are the most stable substances having comparatively low energy of melting process. Solids under zero pressure exhibit various structures called under zero pressure. Solids are made up of atoms and ions held together strongly in space. Solids are not so soft as liquids. In other words, they have a definite shape and volume. The atoms are arranged in a regular pattern in solids and hence it has properties such as high compressibility, low thermal expansion and hence it has properties such as high strength.
