*Grammar for Teachers* Andrea DeCapua, 2008-01-31 The purpose of *Grammar for Teachers* is to encourage readers to develop a solid understanding of the use and function of grammatical structures in American English. It approaches grammar from a descriptive rather than a prescriptive approach; however, throughout the book, differences between formal and informal language and spoken and written English are discussed. The book avoids jargon or excessive use of technical terminology. It makes the study of grammar interesting and relevant by presenting grammar in context and by using authentic material from a wide variety of sources. **The Educational reporter (and science teachers' review).**, 1869

*Lesson Plan Book for High School Teachers* John Guy Fowlkes, 1931 A Chronicle of Echoes Mercedes K. Schneider, 2014-04-01 Corporate reform is not reform at all. Instead, it is the systematic destruction of the foundational American institution of public education. The primary motivation behind this destruction is greed. Public education in America is worth almost a trillion dollars a year. Whereas American public education is a democratic institution, its destruction is being choreographed by a few wealthy, well-positioned individuals and organizations. This book investigates and exposes the handful of people and institutions that are often working together to become the driving force behind destroying the community public school. **The Twilight's Last Gleaming on Public Education** H. Paul Roberts III, 2008-03-28 *The Twilight's Last Gleaming* On Public Education is an intriguing and socially relevant story which focuses on the ambitions and frustrations of the main character, Richard Robins. With nearly limitless options, this man of great consequence and professional achievement embarks on the noble path of educating adolescents at Sunset Middle School, where he quickly becomes aware of the challenges and obstacles that currently litter the public education landscape. The author constructs a fascinating and enlightening story which possesses many of the elements commonly found in just about every school system throughout the United States. The plot contains more than a few strategically placed unexpected twists and should maintain the reader's interest throughout. Navigating the plot to a well-conceived and logical conclusion, the author strives to leave the reader with a sense of time well invested in the reading of this story. **Normal Instructor and Teachers World**, 1928 **Language**

**Teachers' Stories from their Professional Knowledge Landscapes** Lesley Harbon, Robyn Moloney, 2017-06-23 Language Teachers Professional Knowledge Landscapes is a collection of fourteen narratives from teachers of different languages at different school levels in different contexts across Australia. This volume brings together not simply language teacher stories but also more political stories of the problems associated with school programs and contexts. Highlighted through these stories are some of the major political issues in schools that impact language teachers' work and their students' success in sustained language study. The book is conceptually framed by the work of Clandinin and Connelly 1996 and their notion of levels of stories told by teachers about their classrooms: the secret, the sacred, and the cover stories. The term professional knowledge landscape is used to indicate how teachers can critically situate their work and thereby understand it better. The collection includes the stories of two outstanding primary language educators and a story of mixed success in a rural program in teaching the local Aboriginal language Ngarrabul. There are stories of frustration with policy failures, particularly in supporting the learning of Asian languages. Many of the teacher narrators ask the confronting question: What blocks language learning in Australia? They offer the strategies which they have developed that they see making a difference. Other narratives offer autoethnographic tracking of careers, for example as a teacher of Latin and Classics, Japanese, French, Spanish, Russian, and of teachers' ongoing vigour and creativity in advocacy. A number of teachers examine their own identity story for the intercultural learning which they then offer and extend in student learning. Consistently expressed is the need for teachers to take up individual responsibility while still being strongly supported by their professional community. It is us who make the difference, one teacher concludes. Supported by a strong Foreword by Canadian scholar F. Michael Connelly, this ground-breaking collection of narratives represents a form of social research in providing critical illustrations of the issues needing attention for national language education enhancement. It is the only extended inquiry into language teaching in the context of an active policy initiative environment and the first volume to address the language education landscape through the voices of active language teachers.
