Big Data, Crime and Social Control Aleš Završnik, 2017-09-20 From predictive policing to self-surveillance to private security the potential uses of big data in crime control pose serious legal and ethical challenges relating to privacy discrimination and the presumption of innocence The

book is about the impacts of the use of big data analytics on social and crime control and on fundamental liberties Drawing on research from Europe and the US this book identifies the various ways in which law and ethics intersect with the application of big data in social and crime control considers potential challenges to human rights and democracy and recommends regulatory solutions and best practice This book focuses on changes in knowledge production and the manifold sites of contemporary surveillance ranging from self surveillance to corporate and state surveillance It tackles the implications of big data and predictive algorithmic analytics for social justice social equality and social power concepts at the very core of crime and social control This book will be of interest to scholars and students of criminology sociology politics and socio legal studies

Sensor Technologies Michael J. McGrath, Clíodhna Ni Scanail, Dawn Nafus, 2014-01-23 *Sensor Technologies Healthcare Wellness and Environmental Applications* explores the key aspects of sensor technologies covering wired wireless and discrete sensors for the specific application domains of healthcare wellness and environmental sensing It discusses the social regulatory and design considerations specific to these domains The book provides an application based approach using real world examples to illustrate the application of sensor technologies in a practical and experiential manner The book guides the reader from the formulation of the research question through the design and validation process to the deployment and management phase of sensor applications The processes and examples used in the book are primarily based on research carried out by Intel or joint academic research programs *Sensor Technologies Healthcare Wellness and Environmental Applications* provides an extensive overview of sensing technologies and their applications in healthcare wellness and environmental monitoring From sensor hardware to system applications and case studies this book gives readers an in depth understanding of the technologies and how they can be applied I would highly recommend it to students or researchers who are interested in wireless sensing technologies and the associated applications Dr Benny Lo Lecturer The Hamlyn Centre Imperial College of London This timely addition to the literature on sensors covers the broad complexity of sensing sensor types and the vast range of existing and emerging applications in a very clearly written and accessible manner It is particularly good at capturing the exciting possibilities that will occur as sensor networks merge with cloud based big data analytics to provide a host of new applications that will impact directly on the individual in ways we cannot fully predict at present It really brings this home through the use of carefully chosen case studies that bring the overwhelming concept of big data down to the personal level of individual life and health Dermot Diamond Director National Centre for Sensor Research Principal Investigator CLARITY Centre for Sensor Web Technologies Dublin City University *Sensor Technologies Healthcare Wellness and Environmental Applications* takes the reader on an end to end journey of sensor technologies covering the fundamentals from an engineering perspective introducing how the data gleaned can be both processed and visualized in addition to offering exemplar case studies in a number of application domains It is a must read for those studying any undergraduate course that involves sensor technologies It also provides a thorough foundation

for those involved in the research and development of applied sensor systems I highly recommend it to any engineer who wishes to broaden their knowledge in this area Chris Nugent Professor of Biomedical Engineering University of Ulster

Passion for Ignorance Renata Salecl, 2022-11-29 An original and provocative exploration of our capacity to ignore what is inconvenient or traumatic Ignorance whether passive or active conscious or unconscious has always been a part of the human condition Renata Salecl argues What has changed in our post truth postindustrial world is that we often feel overwhelmed by the constant flood of information and misinformation It sometimes seems impossible to differentiate between truth and falsehood and as a result there has been a backlash against the idea of expertise and a rise in the number of people actively choosing not to know The dangers of this are obvious but Salecl challenges our assumptions arguing that there may also be a positive side to ignorance and that by addressing the role of ignorance in society we may also be able to reclaim the role of knowledge Drawing on philosophy social and psychoanalytic theory popular culture and her own experience Salecl explores how the passion for ignorance plays out in many different aspects of life today from love illness trauma and the fear of failure to genetics forensic science big data and the incel movement and she concludes that ignorance is a complex phenomenon that can on occasion benefit individuals and society as a whole The result is a fascinating investigation of how the knowledge economy became an ignorance economy what it means for us and what it tells us about the world today

Sports Science Research and Technology Support Jan Cabri, João Barreiros, Pedro Pezarat Correia, 2015-10-07 This book constitutes thoroughly revised and selected papers from the Second International Congress on Sports Science Research and Technology Support icSPORTS 2014 held in Rome Italy in October 2014 The 8 thoroughly revised and extended papers presented in this volume were carefully reviewed and selected from originally 131 submissions
