**Semi-Pro I: Revisiting the Nikon D200** Shawn M. Tomlinson, 2018-03-13 The designers at Nikon in 2004-05 were looking for a way to reach the semi-pro photographer. The semi-pro is someone who has another job but shoots photos often, at weddings as a part-time job. They're sometimes called weekend warriors. They tend to be serious and dedicated, but they had no need for the pro digital single lens reflex behemoths like the Canon EOS 1D Mark II or the Nikon D5. What they needed then and now is a DSLR camera that is built strong, is always reliable, and can handle their workload. That led to the first true semi-pro camera from the company, the Nikon D200. The D200 may have been overshadowed by its successor, the Nikon D300.

but it's still a great camera A great camera that can be had relatively cheaply and that makes it an even better camera
