Inserting Batteries

1. Turn the battery chamber lid (22) counterclockwise using a coin or something similar.
2. Two LR44 type alkaline batteries or two SR44 type silver batteries are used with this camera.
3. Place the batteries so that both positive (+) sides are at the bottom of the compartment.
4. Turn the battery compartment cover clockwise until it closes firmly.

3

Battery Check

1. Move the film advance lever (3) to the ready position.
2. Lightly press the shutter release button (2). Now the exposure metering system is switched on. Look up through the viewfinder. When one of three LED lamps (C, L or M) lights, then battery condition is satisfactory. If no lamp lights, the batteries need replacing or have been loaded incorrectly.
3. Remove both batteries as necessary.
4. When not using the camera, always return the film advance lever to the original position to prevent accidentally releasing the shutter.

4

Caution: Keep batteries away from infants and small children. In case a battery is accidentally swallowed, call a doctor immediately as the material inside the batteries can cause serious problems.
