

# MAKE SENSE OF SHOOTING MODES

The mode you choose affects the amount of control you have over camera settings

## Auto mode

If you're a complete novice, this mode is ideal because the camera takes care of all the settings automatically.

## Auto Flash Off mode

The same as Auto, but for museums, theatres or indoor sports venues where using a flash might get you thrown out!

## Portrait mode

The camera softens skin tones and uses a wide aperture to throw the background out of focus.

## Landscape mode

Designed for vivid landscape shots taken in daylight. The built-in flash is switched off and you might need a tripod in poor light.

## Child mode

In this mode, the camera makes backgrounds and clothing colourful but keeps skin tones soft and natural looking.

## Sports mode

The flash is switched off and the camera uses faster shutter speeds to help freeze fast-moving subjects.

## Close-up mode

This favours a smaller aperture to improve depth of field. Consider using a tripod when there's a risk of camera-shake.

## Night Portrait mode

The flash fires to light your subject, but the camera uses a slower shutter speed to capture the background lighting too.

## Manual mode

This is designed for experts. You choose the shutter speed and aperture yourself, though the camera still suggests settings.

## Aperture Priority

Use this if you want to choose the aperture yourself. The camera will set the shutter speed automatically for correct exposure.

## Shutter Priority

Use this if you want to choose the shutter speed yourself. The camera will set the aperture automatically so that the exposure is correct.

## Program AE mode

Ideal for general use, or when there's little time to think. The camera sets the shutter speed and aperture but you get to control other settings.

## GUIDE

A special feature on the D3000 that shows you what to do as you're taking pictures. It's a great way for beginners to learn about photography.
