Suman, Chinnusamy, Karthikeyan, Regin, R., John Joseph, Ferdin Joe, 2024-06-17 The rise of Artificial Intelligence AI amidst the backdrop of a world that is changing at lightning speed presents a whole new set of challenges One of our biggest hurdles is more transparency in AI solutions It s a complex issue but one that we need to

address if we want to ensure that the benefits of AI are accessible to everyone Across diverse sectors such as healthcare surveillance and human computer interaction the inability to understand and evaluate AI s decision making processes hinders progress and raises concerns about accountability Cross Industry AI Applications is a groundbreaking solution to illuminate the mysteries of AI driven human behavior analysis This pioneering book addresses the necessity of transparency and explainability in AI systems particularly in analyzing human behavior Compiling insights from leading experts and academics offers a comprehensive exploration of state of the art methodologies benchmarks and systems for understanding and predicting human behavior using AI Each chapter delves into novel approaches and real world applications from facial expressions to gesture recognition providing invaluable knowledge for scholars and professionals alike **Applications of**

**Geotechnical Mechanics in Underground Engineering** Chaojun Jia,Yun Jia,Sheng-Qi Yang,Mingfeng Lei,Chenghua Shi,Dongxing Wang,2022-10-17 Enhancements in Applied Geomechanics, Mining, and Excavation Simulation and

Analysis Adam Sevi,Jose Neves,Honghua Zhao,2018-07-11 The book presents a compilation of studies regarding applied geomechanics mining and excavation analysis and simulation The material is suitable for presentation to senior undergraduate and post graduate students in both mining and geological engineering It should also be of interest to students of other aspects of Geomechanics and notably engineering geologists interested in mining and underground excavation design Practising mining engineers and rock mechanics engineers involved in mine design may use the book profitably to obtain an appreciation of the current state of engineering knowledge in their area of specialisation Papers were selected from the 5th GeoChina International Conference on Civil Infrastructures Confronting Severe Weathers and Climate Changes From Failure to Sustainability held in July 23 25 2018 in Hang Zhou China **Optimized Genetic Programming**

**Applications: Emerging Research and Opportunities** Hrnjica, Bahrudin,Danandeh Mehr, Ali,2018-07-06 Data is more valuable than ever in the twenty first century and tremendous amounts of data are being generated every second With a fast growing information industry engineers are required to develop new tools and techniques that increase human capabilities of mining useful knowledge from the vast amounts of data Optimized Genetic Programming Applications Emerging Research and Opportunities is an essential reference source that explores the concept of genetic programming and its role in managing engineering problems It also examines genetic programming as a supervised machine learning technique focusing on implementation and application As a resource that details both the theoretical aspects and implementation of genetic programming this book is a useful source for academicians biological engineers computer programmers scientists researchers and upper level students seeking the latest research on genetic programming **Policing and Boundaries in**

**a Violent Society** Guy Lamb,2022-01-31 This book explores how social and territorial boundaries have influenced the approaches and practices of the South Africa Police Service SAPS By means of a historical analysis of South Africa this book introduces a new concept police frontierism which illuminates the nature of the relationships between the police policing and

boundaries and can potentially be used for future case study research Drawing on a wealth of research this book examines how social and territorial boundaries strongly influenced police practices and behaviour in South Africa and how social delineations amplify and distort existing police prejudices against those communities on the other side of the boundary Focusing on cases of high density police operations public order policing and the recent policing of the COVID 19 lockdown this book argues that poor economic conditions combined with an increased militarisation of the SAPS and a decline in public trust in the police will result in boundaries continuing to fundamentally inform police work in South Africa This book will be of interest to scholars and students interested in policing in post colonial societies characterised by high levels of violence as well as police work and police militarization

*Proceedings of the 5th International Conference on Geotechnics for Sustainable Infrastructure Development* Phung Duc Long, Nguyen Tien Dung, 2024-07-10 This book presents 204 peer reviewed articles from the 5th International Conference on Geotechnics for Sustainable Infrastructure Development GEOTEC HANOI 2023 held on 14 15 Dec 2023 in Hanoi Vietnam The papers come from nearly 40 countries of the five different continents and are grouped into six conference themes 1 Deep Foundations 2 Tunnelling and Underground Spaces 3 Ground Improvement 4 Landslide and Erosion 5 Geotechnical Modelling and Monitoring and 6 Offshore Wind Power

**Numerical Methods and Implementation in Geotechnical Engineering - Part 1** Y.M. Cheng, J. H. Wang, L. Liang, W. H. Fung Ivan, 2020-04-01 Numerical Methods and Implementation in Geotechnical Engineering explains several numerical methods that are used in geotechnical engineering The first part of this reference set includes methods such as the finite element method distinct element method discontinuous deformation analysis numerical manifold method smoothed particle hydrodynamics method material point method plasticity method limit equilibrium and limit analysis plasticity slope stability and foundation engineering optimization analysis and reliability analysis The authors have also presented different computer programs associated with the materials in this book which will be useful to students learning how to apply the models explained in the text into practical situations when designing structures in locations with specific soil and rock settings This reference book set is a suitable textbook primer for civil engineering students as it provides a basic introduction to different numerical methods classical and modern in comprehensive readable volumes

Good Practices and New Perspectives in Information Systems and Technologies Álvaro Rocha, Hojjat Adeli, Gintautas Dzemyda, Fernando Moreira, Aneta Poniszewska-Marańda, 2024-05-15 This book is composed by a selection of articles from the 12th World Conference on Information Systems and Technologies WorldCIST 24 held between 26 and 28 of March 2024 at Lodz University of Technology Lodz Poland WorldCIST is a global forum for researchers and practitioners to present and discuss recent results and innovations current trends professional experiences and challenges of modern Information Systems and Technologies research together with their technological development and applications The main and distinctive topics covered are A Information and Knowledge Management B Organizational Models and Information Systems C Software and Systems

Modeling D Software Systems Architectures Applications and Tools E Multimedia Systems and Applications F Computer Networks Mobility and Pervasive Systems G Intelligent and Decision Support Systems H Big Data Analytics and Applications I Human Computer Interaction J Ethics Computers and Security K Health Informatics L Information Technologies in Education M Information Technologies in Radiocommunications and N Technologies for Biomedical Applications The primary market of this book are postgraduates and researchers in Information Systems and Technologies field The secondary market are undergraduates and professionals as well in Information Systems and Technologies field

Advances in Applied Microbiology ,2018-08-21 Advances in Applied Microbiology Volume 104 continues the comprehensive reach of this widely read and authoritative review source in microbiology Users will find invaluable references and information on a variety of areas with this updated volume including chapters covering Cold Shock Responses in Salmonella Microbial Processes in Geotechnical Engineering Microbial Diversity and Functional Analysis The Mycosphere and Turnover of Contaminants and the Enhancement of Metallosphaera Sedula Bioleaching by Targeted Recombination and Adaptive Laboratory Evolution Contains contributions from leading authorities in the field Informs and updates on all the latest developments in the field of microbiology Includes discussions on cold shock responses in salmonella microbial processes in geotechnical engineering microbial diversity and functional analysis and more

**Machine Learning Applications in Civil Engineering** Yasmin Murad,Husam Abu Hajar,Iftikhar Azim,2022-12-16 *Robotic Systems: Concepts, Methodologies, Tools, and Applications* Management Association, Information Resources,2020-01-03 Through expanded intelligence the use of robotics has fundamentally transformed a variety of fields including manufacturing aerospace medicine social services and agriculture Continued research on robotic design is critical to solving various dynamic obstacles individuals enterprises and humanity at large face on a daily basis Robotic Systems Concepts Methodologies Tools and Applications is a vital reference source that delves into the current issues methodologies and trends relating to advanced robotic technology in the modern world Highlighting a range of topics such as mechatronics cybernetics and human computer interaction this multi volume book is ideally designed for robotics engineers mechanical engineers robotics technicians operators software engineers designers programmers industry professionals researchers students academicians and computer practitioners seeking current research on developing innovative ideas for intelligent and autonomous robotics systems

**Material and Energy Recovery from Solid Waste for a Circular Economy** Atun Roy Choudhury,Sankar Ganesh Palani,2024-07-08 Material and Energy Recovery from Solid Waste for a Circular Economy describes solid waste to material and energy recovery to bridge the gap between theoretical possibilities and on field criticalities It deals with various resource recovery possibilities from numerous waste streams such as municipal solid hazardous waste human faecal sludge construction and demolition waste and electronic waste The practical issues of resource recovery and possible remedies derived through onsite practice and experience are incorporated It includes real life feasibility analysis and implementation of waste to energy systems supported

by case studies Features Provides comprehensive discussion on both energy and material recovery Addresses the missing linkage between the techno commercial feasibility of existing systems and environmental impact Discusses techno commercial feasibility and environmental impacts Offers balance between theoretical knowledge sharing and practical execution related issues Includes case study LCA and technical feasibility chapters This book is aimed at graduate students and researchers in environmental civil and chemical engineering

**Researching the Military** Helena Carreiras,Celso

Castro,Sabina Frederic,2016-03-02 Researching the Military focuses on the experiences of researchers who study the military around the world It explores the historical social institutional and personal factors that frame research and scrutinize the way knowledge in this area impacts society and policy More than merely analyzing research experiences yet necessarily including them it is also about the experiences of researchers their position with regard to the object of their studies the institutional context where they work and the way their research impacts the academic and policy making fields in the respective countries The common theme to the various chapters is reflexivity a conscious effort at addressing the conditions of research and the position of the researcher and the research participants in that interface By collecting diverse experiences of researchers from across the world this volume aims to enhance reflexivity in the field of military studies and to encourage the exchange of knowledge between the academic field and the military arena This book will be of much interest to students of military studies research methods sociology social anthropology and security studies in general

*Proceedings of the 6th International Symposium on Uncertainty Quantification and Stochastic Modelling* José Eduardo Souza De Cursi,2023-10-21 This proceedings book covers a wide range of topics related to uncertainty analysis and its application in various fields of engineering and science It explores uncertainties in numerical simulations for soil liquefaction potential the toughness properties of construction materials experimental tests on cyclic liquefaction potential and the estimation of geotechnical engineering properties for aerogenerator foundation design Additionally the book delves into uncertainties in concrete compressive strength bio inspired shape optimization using isogeometric analysis stochastic damping in rotordynamics and the hygro thermal properties of raw earth building materials It also addresses dynamic analysis with uncertainties in structural parameters reliability based design optimization of steel frames and calibration methods for models with dependent parameters The book further explores mechanical property characterization in 3D printing stochastic analysis in computational simulations probability distribution in branching processes data assimilation in ocean circulation modeling uncertainty quantification in climate prediction and applications of uncertainty quantification in decision problems and disaster management This comprehensive collection provides insights into the challenges and solutions related to uncertainty in various scientific and engineering contexts

**Military Social Work Around the Globe**

Mary Ann Forgey,Karen Green-Hurdle,2022-11-14 This is the first book to focus on the scope of social work practice within military settings from an international perspective and therefore addresses what has been a significant gap in the literature

Given the critical support needs of military personnel and their families worldwide and the expanding role of social work in responding to these needs this book offers a comprehensive global understanding of the common military social work MilSW practices with active duty military service members and their families as well as the forms of practice and approaches that are unique or potentially transferable across nations Based on a systematic inquiry conducted by the Editors there are at least 25 countries that have social workers working directly within their country s military in either a civilian or uniformed capacity or both This book includes contributions from experts in Australia Canada Denmark Finland Ireland Israel the Netherlands New Zealand South Africa the UK and the USA who describe various aspects of the MilSW role within their country and the research that informs what military social workers do The MilSW similarities and differences among these countries are highlighted including developmental milestones practice settings practice orientation and approach ethical dilemmas military to veteran transition support and past and current challenges Experts from countries that do not yet have MilSW but are interested in developing it Japan Ukraine or are in the process of establishing this area of practice Slovakia also contribute chapters about these developments and the evidence base that supports this direction Military Social Work Around the Globe is a valuable resource for social work programs and essential reading for instructors and students in MilSW electives and specializations It is also pertinent reading for occupational social work and international social work courses In addition this book is an important source of information for military social workers who would like to gain insights into existing programs and the possibilities for international collaboration and for countries interested in developing MilSW

**Handbook of Research on Applied Artificial Intelligence and Robotics for Government Processes** Valle-Cruz, David, Plata-Cesar, Nely, González-Ruíz, Jacobo Leonardo, 2022-09-16 Artificial intelligence AI and robotics have boomed in the 21st century These emerging and disruptive technologies are immersed in our lives from apps in mobile devices the purchases we make on the internet streaming platforms and even court decisions and predictive policing Together with science and certain needs relevant implementations of AI and robotics arise related to its transparency resulting in biases the kinds of applications that can be implemented and the degree of workforce replacement in decision making assistance It is essential to analyze the widely used AI techniques the application of these technologies in different sectors the implications of AI and robotics on society and welfare and more The Handbook of Research on Applied Artificial Intelligence and Robotics for Government Processes presents state of the art research on AI and robotics in different fields of knowledge its benefits applications and implications It features chapters containing theoretical and practical research that analyzes the transparency and expandability of AI in different fields as well as the analysis of unexpected results biases and cases of discrimination Covering topics such as criminal intelligence artificial intelligence based chatbots and gender violence this major reference work is an excellent resource for government officials practitioners in the public sector business administrators and managers IT professionals law enforcement federal agencies students and faculty of higher education
