Kissen,2002-10-23 This book argues that issues of sexual diversity are inextricably interwoven into the basic concerns of pre service teacher education How do we make our students aware of assumptions regarding masculinity femininity and sexuality that arise from what is presented represented or omitted from curricula and classroom practice What do we say about homophobia and heterosexism as we anticipate the administrative hierarchies school cultures parent and community politics they will encounter as teachers What special challenges might face a teacher straight or gay who discusses sexual orientation in a high school classroom or responds to a homophobic remark in the hallway or the cafeteria How should we prepare a teacher for a parent conference with two moms or two dads The essays in this volume range from an analysis of gay stereotypes in teacher education textbooks to a discussion of queer multiculturalism to personal accounts by lesbian and gay teacher educators and heterosexual allies who are challenging homophobia and heterosexism in their own classrooms and programs All agree that education for sexual diversity is as important as education about all other forms of difference and that future teachers need to know how to create safe spaces for lesbian and gay students along with the children of gay families who are increasingly a part of the classroom landscape **Recording for the Blind & Dyslexic, ... Catalog of Books** ,1996 *Life-span Development* John W. Santrock,1986 **The Critique of Psychology** Thomas Teo,2006-07-18 Closely paralleling the history of psychology is the history of its critics their theories and their contributions The Critique of Psychology is the first book to trace this alternate history from a unique perspective that complements the many existing empirical theoretical and social histories of the field Thomas Teo cogently synthesizes major historical and theoretical narratives to describe two centuries of challenges to and the reactions of the mainstream Some of these critiques of content methodology relevance and philosophical worldview have actually influenced and become integrated into the canon others pose moral questions still under debate All are accessibly

presented so that readers may judge their value for themselves Kant's critique of rational and empirical psychology at the end of the 18th century The natural scientific critique of philosophical psychology in the 19th century The human scientific critique of natural scientific psychology The Marxist traditions of critique Feminist and postmodern critiques and the contemporary mainstream Postcolonial critiques and the shift from cross cultural to multicultural psychology This is not a book of critique for critique's sake Teo defines the field as a work in progress with goals that are evolving yet constant In emphasizing ethical and political questions faced by psychology as a discipline this visionary book points students academics and practitioners toward new possibilities for their shared future
