[Genome Editing and Biological Weapons](#) Katherine Paris, 2022-12-15 This monograph introduces current genome editing technologies clustered regularly interspaced short palindromic repeat CRISPR CRISPR associated Cas systems transcription activator like effector nucleases TALENs and zinc finger nucleases ZFNs and provides an assessment of the risk of misuse of these technologies based on the following parameters accessibility ease of misuse magnitude of potential harm and imminence of potential misuse The findings from this assessment are applied to analyze and evaluate the threat posed by the intentional misuse of genome editing technologies to develop biological weapons Furthermore the book discusses the implications of

misuse for different applications of genome editing such as making existing pathogens more dangerous modifying the human microbiome weaponizing gene drives engineering super soldiers and augmenting the general population to confer economic advantages Technologies that enable genome editing with programmable nucleases including CRISPR TALEN and ZFN allow for the precise genetic modification of organisms and cultured cells While these technologies are used for a variety of beneficial applications intelligence and defense experts have raised concerns that genome editing technologies especially CRISPR could be misused to develop new and improved biological weapons Furthermore experts worry that the number and type of actors who could potentially misuse genome editing is dramatically increasing given the democratization of biology which is allowing biology to become more accessible to everyone including nonexperts The book provides a comprehensive assessment of how feasible it is for users with different levels of knowledge and skill to acquire and then to apply the technologies to develop a biological weapon It also provides an assessment of governability and a tailored set of recommendations that address security concerns These recommendations are sensitive to the cost benefit trade off of regulating genome editing technologies The book targets researchers as well as intelligence analysts defense and security personnel and policymakers

**Grant writing for medical and healthcare professionals** Subhash Chandra Parija,Vikram Kate,2023-01-11 Conducting research requires resources to meet the research need The resources in the research institutes centers are often inadequate limiting the research outcome Research grants help overcome those limitations and help the researchers carry out quality research without any restriction Grant proposal writing is an essential skill to be mastered by every researcher However the majority of the medical schools except the few research institutes do not have a structured learning module for obtaining grants On most occasions the skill of writing grant proposals goes by self learning For students it is burdening due to the tremendous time consumed to learn the craft of writing the grant proposal and the exhausting clinical and academic work This book is carefully prepared to keep in mind the difficulties faced by the young researchers and the students concerning choosing a funding agency grant makers expectations budgeting surveillance and site visits rights of the researcher and the funding agency and ethical and legal aspects of obtaining the grant The book also covers the alternate plan for partial funding or interruption of the financing reporting the source of funding and acknowledgment good clinical practice guidelines and dealing with the rejected grant proposal The research projects are often dropped or modified extensively due to the limited resources in the existing facility The researchers are forced to compromise the research objective due to expensive requirements There is a shortage of awareness regarding the availability of funding and grant for the conduct of research

Even if the researchers are aware of obtaining the financing there is a lack of training in grant proposal writing which is essential in getting the research funding This book on grant proposal writing for medical and healthcare professionals covers such difficulties and deficiencies It will provide complete companionship from knowing the funding agency to obtaining the grant
