Scott C. Dulebohn

Sandf Form 2015 16:

South Africa's Post-Apartheid Military Lindy Heineken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention of military veterans, looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged. HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil-military relations of countries around the world.

Practice, Pleadings, and Forms in Civil Actions in Courts of Record in the State of New York ... Second Edition, Etc John L. TILLINGHAST (and SHEARMAN (Thomas G.)), 1865

Practice, Pleadings, and Forms in Civil Actions in Courts of Record in the State of New York John L. Tillinghast, M. L. Martin, 1870 *Annual Report* South Africa. Department of Defence, 2016

[The Economics of Defense Industry](#) Thomas-Durell Young, 2023-10-17 This book on the economics of defence industry assesses a series of historical and contemporary case studies that consistently demonstrate the need for governments to recognise and thereafter factor the financial needs of a narrow industrial sector that is capital intensive, technologically advanced and that requires a highly skilled labour force. Since the end of the cold war, Western governments have systematically reduced financial support to their domestic defence industry and have seemingly ignored planning and funding industrial mobilisation. In all cases, government policy has been to encourage industries to consolidate capacity to become financially viable in a sector that has seen diminished demand. The 2022 Russian invasion of Ukraine has caused Western governments to reassess their previous assumptions. Efforts to increase industrial capacity have been met with the iron laws of economics whereby businesses need to show return on investments. The chapters in this volume posit that efforts to rationalise industrial capacity and innovation to meet short-term financial efficiencies inevitably result in limited expensive and long delays in increased production in times of international crisis. This book serves as an essential guide for academics, researchers and students interested in defence economics, industrial economics, international relations and industrial policy. The chapters in this book were originally published in various issues of *Defense Security Analysis*.
