Reports of Committees United States. Congress. House,1883 **Dancing Indigenous Worlds** Jacqueline Shea Murphy,2023-01-10 The vital role of dance in enacting the embodied experiences of Indigenous peoples In *Dancing Indigenous Worlds* Jacqueline Shea Murphy brings contemporary Indigenous dance makers into the spotlight putting critical dance studies and Indigenous studies in conversation with one another in fresh and exciting new ways Exploring Indigenous dance from North America and Aotearoa New Zealand she shows how dance artists communicate Indigenous ways of being as well as generate a political force engaging Indigenous understandings and histories Following specific dance works over time Shea Murphy interweaves analysis personal narrative and written contributions from multiple dance artists

demonstrating dance's crucial work in asserting and enacting Indigenous worldviews and the embodied experiences of Indigenous peoples. As Shea Murphy asserts, these dance-making practices can not only disrupt the structures that European colonization feeds upon and strives to maintain but they can also recalibrate contemporary dance. Based on more than twenty years of relationship building and research, Shea Murphy's work contributes to growing and largely underreported discourses on decolonizing dance studies and the geopolitical gendered racial and relational meanings that dance theorizes and negotiates. She also includes discussions about the ethics of writing about Indigenous knowledge and peoples as a non-Indigenous scholar and models approaches for doing so within structures of ongoing reciprocal respectful responsible action.

Southern Cross Reinhard Zimmermann, D. P. Visser, 1996. This book provides a history of some of the main institutions of South African private law and in so doing explores the process through which integration of the English common law and the continental civil law came about in that jurisdiction. Here is a book aimed at both European and South African audiences. For European lawyers it provides a stimulating insight into the way the process of harmonization of private law has occurred in South Africa and may occur within the European Union. By analysing the historical evolution of the most important institutions of the law of obligations and the law of property, the book demonstrates how the two legal traditions have been accommodated within one system. The starting point for each essay is the pure Roman-Dutch law as it was transplanted to the Cape of Good Hope in the years following 1652 and as it has been examined in considerable detail in another volume edited by Robert Feenstra and Reinhard Zimmermann published in 1992. The analysis focuses on how the Roman-Dutch law has been preserved, changed, modified or replaced in the course of the nineteenth century when the Cape became a British colony and on what happened after the creation of the union of South Africa in 1910. Each essay therefore attempts in the field of law with which it is dealing to answer questions such as: what was the level of interaction between the civil law and the common law? What were the mechanisms that brought about the particular form of competition, coexistence or fusion that exists in that area of law? Is the process complete or is it still continuing? Is it possible to observe the emergence from these two routes of a genuinely South African private law? How is the result to be evaluated? In establishing reception patterns at the level of specific areas of law, they go beyond generalization about the compatibility of the two traditions and present evidence of a possible symbiosis of English and Continental law. For South African readers, the principal value of the book is that it offers essays by the most prominent South African private lawyers reflecting on the history of their subjects. It therefore constitutes the first stage in the writing of a history of substantive private law in South Africa. So far, the focus has mainly been on the so-called external history of South African law and such texts as there are on the development of the institutions of private law are often in Afrikaans and mainly to be found in unpublished theses. Thus, this book fulfils a real need for those teaching South African private law and legal history. Although the volume investigates a specific aspect of the making of modern South African law, it is imperative not to lose sight of the fact that private law in that country, as every way else did,

not develop in a vacuum but as part of a wider political and social process. For this reason the book opens with an essay which contextualizes the contributions that follow giving a view of the setting in which the development of South Africa took place: colonial domination, cultural imperialism and racial and nationalistic ideologies. Two further introductory essays pay specific attention to the impact of the procedural framework on the substantive private law and to the architects of the mixed system.

Reciprocity and China's Transboundary Waters David J. Devlaeminck, 2020-11-15 Utilizing the principle of reciprocity, *Reciprocity and China's Transboundary Waters: The Law of International Watercourses* analyses the past, present and future of the law of international watercourses with a particular focus on China. As a legal principle, reciprocity plays a strong role in the formation, interpretation and maintenance of international law. Implementing this framework, the book examines the development of the law of international watercourses, highlighting how this basic legal principle is a foundational notion. It applies the framework to China and offers insights into one of the most important transboundary states in Asia. As a primarily upstream state, China is of great significance to its transboundary neighbours; however, there remain significant hurdles, misunderstandings and mistrust between China and its neighbours. China is faced with a complex challenge: how to meet its own development needs while also taking into consideration its primarily downstream neighbours. By focusing on this prominent state, this work not only fosters a greater understanding of the law of international watercourses within China but also clarifies and challenges current perceptions of China's transboundary water treaty practice. More generally, the book provides a past, present and future view on international watercourse law, starting with an analysis of the UN Watercourses Convention and UNECE Water Convention, leading to a discussion of reciprocity's continued influence as well as charting a path forward. This book will be of great interest to legal students and scholars with an interest in international watercourses, environmental politics and international law as well as students and scholars interested in Chinese politics and natural resource management and conflict. **A Systematical View of the Laws of England** Richard Wooddson, 1794
