A Pedagogical Design for Human Flourishing Cynthia McCallister, 2022-03-28 In *A Pedagogical Design for Human Flourishing* Transforming Schools with the McCallister Model Cynthia McCallister presents a revolutionary paradigm for education that is practical conceptually convincing and grounded in contemporary behavioral science theory Beginning with the assertion that equality of educational opportunity depends on access to experiences that are sufficiently appropriate and rich to enable the achievement of diverse human potentials she provides a comprehensive school design for intervention that demonstrates how to achieve it Grounded in recent advances in learning science McCallister asserts three necessary conditions for learning the need for learners to have access to diverse rich environmental experiences the need for them to enjoy fundamental freedom and autonomy to direct their own learning and access to full and free forms of association In her model these conditions provide what is necessary for learners to coordinate their minds with others to develop their identities personalities and talents These conditions are animated in concrete procedures that can be adapted to a wide variety of populations in formal informal and remote educational settings The procedures take the form of rules that learners comply with in the exercise of their freedom When they are followed the rules provide a grammar for the social norms that govern the moral worlds of learners and compel them to flourish Tested over two decades in her work as a teacher scholar and school reformer in more than 20 NYC public schools the McCallister Method has delivered an innovative and disruptive approach to schooling that has proven successful in finally transforming low performing industrial schools into 21st century learning organizations Online support material includes assessments records surveys and more to be used in school design and classroom settings

The Multi-Organ Donor: A Guide to Selection, Preservation and Procurement Robert S.D. Higgins, Juan A. Sanchez, 2018-11-30 Advances in the science of immunology have improved the success rate of organ transplantations since the mid twentieth century Organ transplantation is now a lifesaving medical procedure for thousands of patients around the world with end organ diseases The lifesaving potential of transplantation has been limited by the number and quality of appropriate organ donors The evolution of brain death criteria by the Harvard Ad Hoc Committee Report has opened the door to understanding the importance of medical legal and ethical challenges of organ donation in support of the growth of the transplant science The possibility of organ donation from living donors has enhanced

organ availability for patients with kidney failure Modern inotropes and immunosuppression regimens have been critical to the success of other organ transplant procedures However the cornerstone of successful transplantation continues to be the appropriate selection evaluation preservation of organ tissues and the successful surgical procurement process to mitigate the impact of tissue ischemia and reperfusion In this textbook the art and science of organ donation and tissue preservation is examined Through this authoritative text by leaders in the field the editors provide a state of the art review of modern preservation techniques patient selection and screening criteria as well as best practices for multi organ procurement Information presented in the book will familiarize readers with the initial steps of determining organ availability which ultimately enables health care professionals to realize the extraordinary potential of successful multi organ transplant procedures This guide is intended to be a fundamental resource for students residents faculty and staff for all disciplines allied to health care delivery and organ donation
