Possibilities, Challenges, and Changes in English Teacher Education Today Heidi L. Hallman, Kristen Pastore-Capuana, Donna L. Pasternak, 2019-05-24 This book focuses on English teacher educators experiences concerning professionalization and teacher identity The term professionalization itself can be problematized Popkewitz 1994 as it connotes adherence to realities to professional norms that are based within particular histories Yet teacher educators must confront how to mentor prospective teachers into the field and how changes to the field manifest changes to what it means to be a professional In research about changes in English teacher education over the past twenty years Pasternak Caughlan Hallman Renzi and Rush 2017 presented five distinct foci of ELA programs that have evolved

- 1 changes to field experiences within teacher education programs
- 2 altered conceptions of teaching literature and literacy within the context of ELA
- 3 increased adherence to standardization
- 4 changing demographics of students in K 12 classrooms
- 5 increased expectations for use of technology within ELA

These foci impact how professionals in ELA are viewed both from inside and outside the profession and how they navigate these tensions in teacher education programs to define what it means to identify as an English teacher Throughout the book chapter authors articulate dilemmas that focus around professionalization and teacher identity questioning what it means to be an English teacher today While some chapters suggest methods for increased awareness of tensions within practice other chapters approach professionalization and teacher identity by asking what the limits of methods classes and teacher education might be in preparing ELA teachers and supporting them to remain in the profession Today s political environment devalues teachers and teaching a situation that has critics deriding the educational standards at institutes of higher education while concurrently lauding alternative programs that do not have to adhere to the same rigorous teacher certification requirements English teacher educators are now being asked to design programs soften requirements and recruit and mentor teacher candidates to a profession that in the past certified more new English teachers than it could employ The chapters in this book explore what it means to educate and be an English teacher educator under these conditions

*Learning Teaching from Experience* Viv Ellis, Janet Orchard, 2014-01-16 What do teachers learn on the job And how if at all do they learn from experience Leading researchers from the UK Europe the USA and Canada offer international research based perspectives on a central problem in policy making and professional practice the role that experience plays in learning to teach in schools Experience is often weakly conceptualized in both policy and research sometimes simply used as a proxy for time in weeks and years spent in a school classroom The conceptualization of experience in a range of educational research traditions lies at the heart of this book exemplified in a variety of empirical and theoretical studies Distinctive perspectives to inform these studies include sociocultural psychology the philosophy of education school effectiveness the sociology of

education critical pedagogy activism and action research However no one theoretical perspective can claim privileged insight into what and how teachers learn from experience rather this is a matter for a truly educational investigation one that is both close to practice and seeks to develop theory At a time when policy makers in many countries seek to make teacher education an entirely school based activity Learning Teaching from Experience offers an essential examination of the evidence base the traditions of inquiry and the limits of those inquiries      **Multicultural Education** ,2006      *Social Studies Review* ,2003      *Resources in Education* ,1999-04
