*Proceedings of the ... Midwest Symposium on Circuits and Systems*, 1993. **Microcomputer Applications**, 1993. Development of Traffic Light Control System Using Programmable Logic Controller Azrulnor Ahmad, 2007. Development of a traffic light control system using PLC. Programmable Logic Controller is the title of this project. This project is divided into two parts which are hardware and software. The hardware part for this project is a model of four-way junction of a traffic light. Each lane has two limit switch input functions as a sensor. Three indicator lamps with different colours (Red, Yellow, and Green) are installed at each lane for representing a traffic light signal. These limit switches and indicator lamps are connected to Omron PLC CQM1H CPU51. The PLC controls every signal which is coming from the inputs (Limit switch) to software and display to the outputs (Indicator lamps). The software part operates with Omron PLC CX Programmer. With using this software, the ladder logic diagram is programmed to control the traffic light based on the flow chart. At the end of this project, the traffic light successfully controlled by PLC.
