*Proceedings of the 10th International Conference on Mechanical, Automotive and Materials Engineering* John P. T. Mo, 2024-09-24 This book consists of selected papers presented at the 10th International Conference on Mechanical Automotive and Materials Engineering CMAME 2023 held in Da Nang Vietnam on 20-22 December 2023. Readers find this book a vehicle for the dissemination of research results on latest advances made in this area. It is expected that the publication of the research papers with the advanced topics listed in this book will further promote high standard academic research in the field and make a significant contribution to the development of human society. Topics that will be covered in this book include but not limited to materials science and engineering, engine system design and power machinery, mechanical design, manufacture and automation design and analysis of robot systems, automobile design and manufacturing engineering, thermal and fluid mechanics analysis, aircraft structural design and system control, control theory and engineering applications, electronic information technology. This book is intended for researchers, engineers and advanced postgraduate students in the fields of automotive production, industrial engineering and design. **Raising the Bar** Claude Fussler, Aron Cramer, Sebastian van der Vegt, 2017-09-08 This book produced by a unique team of business experts and UN agencies is designed to fill a critical void between the support of more than 1 000 organisations for the globally recognised Principles of the United Nations Global Compact and the need for this support to be translated into the day to day running of business to create value and improve performance. The ten Global Compact Principles cover human rights, labour standards, environmental responsibility and anti corruption. But what does it mean to implement the Compact and its principles? How can the broad brush strokes of the Principles form the basis of management change? And how should companies establish benchmarks and performance indicators for implementation? For many companies the journey is just starting. How can they ensure that they align with the Global Compact in ways that continue to reward their other business objectives? How should they embrace and capitalise on the Global Compact's potential for bringing together business, the public sector, trade unions and civil society in new partnerships? The aim of this book is to answer these questions by providing a performance model clearly grounded on the total quality management approach to assist businesses in putting the Global Compact into practice. **Raising the Bar** collects together and categorises a wealth of corporate responsibility tools, good practice and case studies in a structure familiar to anyone aware of business excellence models and demonstrates that values create value. Leadership commitment to the Global Compact can impact both the boardroom and the shop floor, public image and balance sheet. Full of graphics and designed with accessibility in mind, the book will be a goldmine for managers looking for inspiration on how their businesses can be good corporate citizens and real proof that good business is also good for the bottom line.
