**Resources in Education** , 1997

*Humanistic Approach to Psychotherapy* Eric Whitton, 2003-11-07 This is a practical description of the form of therapy generally known as humanistic based on the human potential movement of the sixties and seventies which now incorporates a number of related methods It outlines the background and history of this approach the main figures who were responsible for the formation of its ideas and practice and the present place it has in the field of psychotherapy There is a section in which therapists from differing backgrounds express their own views of their work and how they apply this in their relationship with their clients The book closes with a discussion of the main issues facing humanistic psychotherapy

**The Future of Training in Psychotherapy and Counselling** John Rowan, 2014-02-25 The Future of Training in Psychotherapy and Counselling presents a revealing and stimulating account of the current state of training that demonstrates how training will have to adapt if it is to sucessfully meet the needs and challenges of the future In an attempt to look afresh at the whole question of training John Rowan proposes that there are three ways of doing therapy and any examination of training has to

consider each of these the instrumental where the main emphasis is on the treating the client or patient the authentic way where the main emphasis is on meeting the client or patient the transpersonal way where main emphasis is on linking with the client in a more personal way Each approach makes different assumptions about the self about the relationship and about the level of consciousness involved in doing therapy By challenging the basic precepts of traditional training John Rowan encourages the reader to reconsider subjects including the difference between counselling and psychotherapy culture and ethics the origins of disturbance in clients and child development The Future of Training in Psychotherapy and Counselling provides a much needed new perspective that will compel all psychotherapists and counsellors to take a closer look at training in the field      *Counseling and Motivational Interviewing in Speech-Language Pathology* Jerry Hoepner,2024-06-01 Written as a helpful guide for speech language pathologists and students Counseling and Motivational Interviewing in Speech Language Pathology provides a solid base in theoretical foundations while prioritizing skill development and practical applications of counseling in speech language pathology Now more than ever there is a burgeoning need for speech language pathologists to incorporate counseling into their everyday practice However most practitioners currently lack the training and knowledge necessary to fulfill that role Counseling and Motivational Interviewing in Speech Language Pathology seeks to remedy that by providing techniques and tools for counseling across the lifespan and practice settings The book is divided into two main parts Chapters 1 through 4 cover the foundational principles of motivational interviewing including several self assessment tools to support learners in the process Chapters 5 through 8 address specific counseling techniques and topics providing readers with practical examples of how to properly counsel individuals with communication cognition and swallowing disorders What s included in Counseling and Motivational Interviewing in Speech Language Pathology Sample dialogues between clinicians and clients Case examples thinking exercises and potential assignments for readers to apply the knowledge and skills addressed in the book A chapter dedicated to communicatively accessible structured interview approaches eliciting and monitoring collaborative goals and screening for other mental health concerns Counseling and Motivational Interviewing in Speech Language Pathology is an approachable guide that will address the issues of scope of practice while proving why speech language pathologists are uniquely suited to provide counseling      An Integrative Approach to Therapy and Supervision Mary Harris,Anne Brockbank,2011-07-15 This book presents an innovative model for therapy and supervision It draws on ideas from the psychological traditions of Transactional Analysis Gestalt theory and Cognitive Behavioural Therapy to develop an integrated approach to working with clients and to developing a supervisor supervisee relationship that can adapt to suit individual needs      Communication Harmony Karen Phillip,2019-08-13 The direction of many of our conversations can be changed quickly when you know how Once you learn to lead the conversation others will follow ensuring your discussion is productive rather than explosive These skills can be used anywhere with anyone They calm the conversation and put the focus on the solution instead of the problem      *The Therapist's Use of Self*

John Rowan, Michael Jacobs, 2002-10-16 Most therapists regardless of theoretical approach intuitively recognize that their sense of self intimately influences their work Using this elemental truth as a launching pad Rowan and Jacobs articulate the different avenues through which the self informs therapy and how each can be used to improve therapeutic effectiveness Along the way the authors provide a masterful exposition of transference countertransference and projective identification throwing much needed light on topics that have long been mired in controversy and confusion The book is a priceless resource for experienced therapists and those just beginning the journey Professor Sheldon Cashadan author of Object Relations Therapy and The Witch Must Die The Hidden Meaning of Fairy Tales Outstandingly in the current literature this book meets the conditions for integrative psychotherapy to fulfil its undoubted potential as the therapy pathway of the future Much has to change in our field First people have to become better informed and more respectful of other traditions than their own engaging with all kinds of taboo topics Next vigorous but contained dispute has to take place without having a bland synthesis as its goal Finally the current situation in which integration runs in one direction only humanistic and transpersonal therapists learning from psychoanalysis has to be altered Rowan and Jacobs each a master in his own field have done a wonderful collaborative job The book's focus on what different ways of being a therapist really mean in practice guarantees its relevance for therapists of all schools or none and at every level Andrew Samuels Professor of Analytical Psychology University of Essex and Visiting Professor of Psychoanalytic Studies Goldsmith's College University of London There is no question in psychotherapy more important than the degree to which the practitioner should be natural and spontaneous Would it be sensible to leave one's ordinary everyday personality behind when entering the consulting room and adopt a stance based on learned techniques This is the question addressed by Rowan Jacobs in The Therapist's Use of Self approaching it from various angles and discussing the relevant ideas of different schools of thought The authors are very well informed and write with admirable clarity directness and wisdom and have made an impressive contribution to a problem to which there is no easy solution Dr Peter Lomas author of Doing Good Psychotherapy Out of Its Depth This book deals with what is perhaps the central question in therapy who is the therapist And how does that actually come across and manifest itself in the therapeutic relationship A good deal of the thinking about this in psychoanalysis has come under the heading of countertransference Much of the thinking in the humanistic approaches has come under such headings as empathy genuineness nonpossessive warmth presence personhood These two streams of thinking about the therapist's own self provide much material for the bulk of the book but other aspects of the therapist also enter the picture including the way a therapist is trained and uses supervision in order to make fuller use of her or his own reactions responses and experience in working with any one client The book is aimed primarily at counsellors and psychotherapists or trainees in these disciplines It has been written in a way that is accessible to students at all levels but it is also of particular value to existing practitioners with an interest in the problems of integration

**Basic Counselling Skills** Richard Nelson-Jones, 2015-11-12 This practical

bestseller from leading expert Richard Nelson Jones introduces the essential counselling skills for the helping professions. Now in its fourth edition it guides you through the key skills for helping work across a range of settings such as counselling, nursing, social work, youth work, education and many more. It explores 17 key counselling skills including asking questions, monitoring, facilitating, problem solving, negotiating, homework. Each chapter describes a particular skill, illustrates it using clear case examples across a range of settings and then helps you consolidate and practise what you've learned through a set of creative activities. Further chapters cover professional issues including a new chapter on managing crises and chapters on ethical dilemmas, supervision, working with diversity and more. Career Counselling Robert Nathan, Linda Hill, 2005-12-15

This new edition explains what career counselling actually is, why people seek it and indicates the many contexts where it is used. The text describes in detail the skills, tools and techniques of career counselling useful to both professional career counsellors and those for whom career counselling is just part of their work. **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), *Evaluating Family Support* Ilan Katz, John Pinkerton, 2003-08-01. The delivery of effective family support is a key global child welfare issue yet there is little consensus on what constitutes family support or what the best ways are to evaluate it. *Evaluating Family Support: Thinking Internationally, Thinking Critically* offers a full review of the conceptual and operational problems involved in this complex and topical field. Ilan Katz and John Pinkerton have brought together a team of experienced child care policy analysts and evaluators to present the current state of critical thinking alongside detailed international case studies. The chapters offer revealing glimpses into the nature of family support across the world as well as an overview of the challenges facing both practitioners and researchers.
