Economic Development in Southeast Asia Antoinette R. Raquiza, 2013-06-17 Why do some small developing countries industrialize and others don t What factors account for different economic performance among states that are vulnerable to external shocks crony capitalism and political instability This book argues that the answer lies in the structuring of state power specifically the way different sets of governing elites political leaders and economic technocrats are embedded in political organisations and state institutions and the way these elites relate to each other in the economic development policy process Conducting a comparative historical analysis of Thailand and the Philippines the book argues that the institutional settings of governing elites influence economic outcomes In Thailand political power traditionally connects to state institutions in ways that has limited the impact of political turnovers and global downturns conducive to long term industrial activities In contrast Philippine state power derives from family networks that merge social and political power suited to fast moving short term commercial interests In focusing on this political and institutional story the author analyses the current development dilemmas of countries weighed down by historical legacies of unstable regimes dependency and social conflict and how they are likely to develop in the future [Program of the ... Association, American Historical Association. Meeting, 2005 [Religion in Development](#) Séverine Deneulin, 2013-07-18 Development practice is full of examples of the importance of religion in the lives of people in developing countries However

religion has largely remained unexplored in development studies This timely new book aims to fill that gap The authors expertly review how religion has been treated in the evolution of development thought how it has been conceptualised in the social sciences and highlights the major deficiencies of the assumption of secularism The book argues that development theory and practice needs to rewrite its dominant script regarding its treatment of religion a script which has so far been heavily inscribed in the secular tradition It puts forward an understanding of religions as traditions that religions rest on central thesis and teachings which never cease to be re interpreted in the light of the social political and historical context In addition to providing a conceptual framework for analysing the role of religion in development the book provides numerous empirical examples drawn from the Christian and Islamic religious traditions This comprehensive new guide to this key issue is essential for students development thinkers and practitioners who wish to understand better the role that religion plays in development processes and outcomes **Ibn Khallikan's Biographical Dictionary, 4** Aḥmad Ibn-Muḥammad

Gadamer Ingrid H. Scheibler,2000-04-12 One of the first book length studies to examine Gadamer's relation to Heidegger in depth this important work looks at the ways in which Gadamer positively appropriates central elements of Heidegger's work as well as the way he extends Heidegger's critique of Western metaphysics avoiding and tacitly challenging some of the most problematical aspects of Heidegger's work By examining two of the central concepts in Gadamer's work tradition and language and by analyzing Gadamer's relation to his mentor Martin Heidegger Scheibler successfully shows that far from being the conservative both modernist and post modernist critics have accused him of being Gadamer anticipates a number of concerns central to post modern or post structuralist thought

The Struggle for European Private Law Leone Niglia, 2015-03-26 The European codification project has rapidly gathered pace since the turn of the century This monograph considers the codification project in light of a series of broader analytical frameworks comparative historical and constitutional which make modern codification phenomena intelligible This new reading across fields renders the European codification project currently being promoted through the Common Frame of Reference and the Optional Sales Law Code proposal vulnerable to constitutionally grounded criticism traceable to normative considerations of private law authority and legitimacy Arguing that modern codification phenomena are more complex than positivist socio legal and historical approaches have suggested over the past two centuries the book stages a pathbreaking method of analysis of the law discourse nomos centred which questions at once the reduction of private law to legislation and of law to power and on this basis redefines the ways in which to counter law's disintegration and crisis in the context of Europeanisation Professor Niglia reconstructs the European codification project as a complex structure of government in the making that embodies a set of contingent world views excludes alternatives challenges the plurality of private laws and entrenches conflicts that pertain not only to form codification de codification recodification but also to dilemmas implicated in determining the substantive orientation of European private law The book investigates the position of the codifiers and their discontents in the shadow of the codification strategy pursued by the European Commission noting a new turn in the struggle over the configuration of private law which has taken place since the Savigny Thibaut dispute of 1814 which this book critically revisits exactly two centuries later This monograph is particularly aimed at readers interested in exploring the complexities and interconnections of the supposedly separate realms of comparative law European law private law legal history constitutional law sociology of law and last but not least legal theory and jurisprudence *Constructing Local Theologies* Robert J. Schreiter, 2015-03-24 The English Bible, King James Version: The Old Testament (International Student Edition) (Vol. 1) (Norton Critical Editions) Herbert Marks, 2016-04-04 A stunning work of scholarship the Norton Critical Edition of The English Bible King James Version is the most accessible edition available In celebration of the 400th anniversary of the King James Bible these long awaited volumes bring together succinct introductions to each biblical book detailed explanatory annotations and a wealth of contextual and critical materials Archaic words are explained textual

problems are lucidly discussed and stylistic features of the original texts are highlighted. Judicious and economical the introductions and annotations to the Old Testament give readers without Hebrew an entry into complexities of biblical literature reconstructing its original contexts tracing its evolution and pointing out productive strategies of reading. Incorporating the insights of modern biblical scholarship as well as centuries of precritical interpretation they offer essential guidance to a labyrinthine world while respecting the text's integrity. The historical and critical appendix comprises three distinct collections. A section on ancient Near Eastern backgrounds presents the myths, hymns, prayers, and legal codes that informed the creation of the Hebrew Bible. A historical anthology of biblical interpretation gathers for the first time in one volume generous selections from the Jewish, Christian, and Muslim traditions along with classics of secular commentary. It includes reflections on the Bible by philosophers from Hobbes to Ricoeur, a compendium of modern biblical scholarship focusing on topics such as the oral and the written, the composition of the Pentateuch, and the historical movement from covenant to canon, and a provocative sampling of comparative and literary approaches. The crucial presence of the Old Testament within English literature is represented by paraphrases and parables in verse and prose, and a recapitulatory conclusion brings the diverse perspectives of this millennial survey to bear on two of the Bible's most famous passages: the expulsion from the garden of Eden and the binding of Isaac. A final section devoted to the question of translation includes significant English versions from Wycliffe to the present. Time lines, chronologies, diagrams, and maps are included.

The Arabic Historical Tradition & the Early Islamic Conquests Boaz Shoshan, 2015-09-07

The early Arab conquests pose a considerable challenge to modern-day historians. The earliest historical written tradition emerges only after the second half of the eighth century, over one hundred years removed from the events it contends to describe, and was undoubtedly influenced by the motives and interpretations of its authors. Indeed, when speaking or writing about the past, fact was not the only nor even the prime concern of Muslims of old. The Arabic Historic Tradition and the Early Islamic Conquests presents a thorough examination of Arabic narratives on the early Islamic conquests. It uncovers the influence of contemporary ideology, examining recurring fictive motifs and evaluating the reasons behind their use. Folklore and tribal traditions are evident throughout the narratives, which aimed to promote individual tribal and regional fame through describing military prowess in the battles for the spread of Islam. Common tropes are encountered across the materials, which all serve a central theme: the moral superiority of the Muslims, which destined them to victory in God's plan. Offering a key to the state of mind and agenda of early Muslim writers, this critical reading of Arabic texts would be of great interest to students and scholars of early Arabic History and Literature, as well as a general resource for Middle Eastern History.
