

Chapter 3

Characteristics of the Driver, the Pedestrian, the Vehicle and the Road

3-1

Briefly describe the two types of visual acuity.

The two types of visual acuity are static and dynamic. The ability of a driver to identify an object when both the object and the driver are stationary depends on one's static acuity. Some factors that affect static acuity include the background brightness, contrast, and time. The ability of a driver to clearly detect a moving object depends on the driver's dynamic visual acuity.

3-2

**(a) What color combinations are used for regulatory signs (e.g. speed limit signs) and for general warning signs (e.g. advance railroad crossing signs)
(b) Why are these combinations used?**

Regulatory signs use a color combination of black lettering on white background, and advance warning signs use the color combination of black lettering on yellow background. These color combinations are used because they have been shown to be those to which the eye is most sensitive.

3-3

**Determine your average walking speed.
Compare your results with that of the suggested walking speed in the MUTCD.
Which value is more conservative and why?**

Pass #	Intersection Width (ft)	Walk Time (sec)	Walking Speed (ft/sec)
1	36	7	5.1
2	36	8.2	4.4
3	36	9.5	3.8
4	36	7.6	4.7
5	36	8	4.5
<i>Average</i>			<i>4.5</i>

(Fort Belvoir, Va.),1949 *Road Safety Manual* ,2003 Basic road safety manual for transportation engineers Provides an introduction to the road safety field and describes the safety analysis process the relationship between components of the road and safety and the steps required to complete technical studies sight distances spot speed etc **Highways and Transportation** ,1998 **International Study Week in Traffic Engineering** ,1968 *The Civil Engineering Handbook* W.F. Chen,J.Y. Richard Liew,2002-08-29 Providing extensive coverage of all major areas of civil engineering the second edition of this award winning handbook features contributions from leading professionals and academicians and is packed with formulae data tables and definitions vignettes on topics of recent interest and additional sources of information It includes a wealth of material in areas such as coastal engineering polymeric materials computer methods shear stresses in beams and pavement performance evaluation Its wide range of information makes it an essential resource for anyone working in civil structural or environmental engineering Congestion Management Systems Robert A. Hamm,1993 This report summarizes a literature review and interviews with many persons active nationally in congestion management Telephone contact was made with all the state departments of transportation and numerous local agencies metropolitan planning organizations and personal contacts throughout the country These telephone contacts helped define the status of congestion management as of late 1992 and early 1993 The literature review found very little information However the interview process revealed that significant material was being developed in the first half of 1993 Most of this CMS related work was in response to state legislation California and Washington local recognition of congestion issues Tucson and anticipation of the ISTEA requirements relative to the management system These interviews uncovered many documents that have been incorporated into this report On site interviews were conducted with twenty local agencies and five state departments of transportation The findings are summarized into specific recommendations on the measure of congestion definition of the CMS network monitoring the CMS network over time and administration of the CMS Program The report has several appendices which contain detailed information drawn from the site visits and other information which may be helpful to MPO s and state highway agencies The final chapter of the report includes specific recommendations for FHWA and FTA to consider in the implementation of the CMS Program at the Federal level *Quarterly Bulletin* Brooklyn Public Library,1914 Bulletin of the Brooklyn Public Library Brooklyn Public Library,1914 **Toward Sustainable Communities** Mark Roseland,2012-07-01 The single most useful resource out there on how to build and grow sustainable places The need to make our communities sustainable is more urgent than ever before Toward Sustainable Communities remains the single most useful resource for creating vibrant healthy equitable economically viable places This comprehensive update of the classic text presents a leading edge overview of sustainability in a new fully illustrated full color format Compelling new case studies and expanded treatment of sustainability in rural as well as urban settings are complemented by contributions from a range of experts around the world demonstrating how community capital can be leveraged to meet

the needs of cities and towns for Energy efficiency waste reduction and recycling Water sewage transportation and housing Climate change and air quality Land use and urban planning Fully supported by a complete suite of online resources and tools Toward Sustainable Communities is packed with concrete innovative solutions to a host of municipal challenges Required reading for policymakers educators social enterprises and engaged citizens this living book will appeal to anyone concerned about community sustainability and a livable future Mark Roseland is director of the Centre for Sustainable Community Development at Simon Fraser University and professor at SFU's School of Resource and Environmental Management He lectures internationally advises communities and governments on sustainable development policy and planning and has been cited as one of British Columbia's top fifty living public intellectuals

County and Township Roads, 1952 *Outdoor Lighting: Physics, Vision and Perception* Duco Schreuder, 2008-08-15 The present book is based on the experience of the author The experience is mainly the result of years of research of consulting work and in participation in policy decision making in many fields most but not all related to outdoor lighting To some degree the book represents the preference of the author The selection of the subjects is based on more than 50 years of experience of what is desirable to know for persons engaged in scientific research or practical application in the fields of lighting and vision The subjects deal with a number of fundamental aspects The theorists must have them at their fingertips whereas the practical engineers may assume them as known in their daily work The selection of subjects is based in part by the questions that came to the author over the years but even more by the preference of the author himself In this respect it is a personal book Thus it should be stressed that the book is not a handbook or even a textbook many subjects that commonly are treated in such books are not included here Not because they lack importance but because the author feels that they are adequately treated elsewhere Some relevant works are mentioned in the References Over the years the author has been engaged in giving courses on vision and lighting lately more in particular on Masterclasses on a post graduate or post doctorate level

Networking -- ICN 2005 Petre Dini, Pascal Lorenz, 2005-03-31 The International Conference on Networking ICN 2005 was the fourth conference in its series aimed at stimulating technical exchange in the emerging and important field of networking On behalf of the International Advisory Committee it is our great pleasure to welcome you to the proceedings of the 2005 event Networking faces dramatic changes due to the customer centric view the venue of the next generation networks paradigm the push from ubiquitous networking and the new service models Despite legacy problems which researchers and industry are still discovering and improving the state of the art the horizon has revealed new challenges that some of the authors tackled through their submissions In fact ICN 2005 was very well perceived by the international networking community A total of 651 papers from more than 60 countries were submitted from which 238 were accepted Each paper was reviewed by several members of the Technical Program Committee This year the Advisory Committee revalidated various accepted papers after the reviews had been incorporated We perceived a significant improvement in the number of submissions and the quality of the submissions

The ICN2005 program covered a variety of research topics that are of current interest starting with Grid networks multicasting TCP optimizations QoS and security emergency services and network resiliency. The Program Committee selected also three tutorials and invited speakers that addressed the latest search results from the international industries and academia and reports on findings from mobile satellite and personal communications related to 3rd and 4th generation research projects and standardization.
