COURSE SYLLABUS

Course Description and Approach: Computer forensics, now commonly called "cyber security forensics," has been a professional field for many years. But, due to the growth of the Internet and the worldwide proliferation of computers (including networks, wireless devices, etc.) have increased the need for cyber security investigations. Computers can be used to commit industrial espionage, and crimes can be recorded on computers, including company policy violations, computer harassment, e-mail harassment, leaks of proprietary information, and even terrorism.
