**Indian Ocean Cruising Guide** Rod Heikell,2019-01-01 A good general cruising guide covering the routes from Europe to Australia and points in between The

Indian Ocean Cruising Guide covers all the usual points of interest for cruising yachtsmen from history to climate weather patterns formalities route planning and so on The general sections are followed by a country by country round up in which key ports are described in detail with the aid of harbour plans and photographs This second edition 2007 has been thoroughly revised and contains a lot of additional information on Malaysia and Thailand the Seychelles and the Chagos archipelago The introduction has been expanded and throughout there are new plans and photographs This guide is an ideal companion to Rod Heikell and Andy O Grady s Ocean Passages and Landfalls which discusses routes across the Indian Ocean

**Cruising (With) Class** Stan Zimmerman, 2007-02-26 Many beginning sailors soon yearn for a larger boat with a galley head and berths so they can extend their time on the water and range of action However the simple mechanics of sailing do not include the variety of arts necessary to cruise successfully Cruising with Class began as a series of lectures at the Sarasota Florida Sailing Squadron with the intention of teaching basic skills to beginning cruisers Comfort on the water is not a matter of soft cushions It comes from confidence in the ability to voyage safely Reading the weather planting the anchor calculating the tides navigating a coast avoiding fatigue choosing equipment coping with storms reacting to disasters these are the arts of a cruiser Although the book calls on the author s 25 years of cruising small sailboats it is not a travelogue Instead it is a precise iteration of lessons learned the hard way and presented in sailor to sailor fashion so others can avoid disaster and find comfort bred in confidence on the water

Sail Tales Captain Robert Engel, 2009-08-05 Sail Tales is about the adventures a humble sailboat owner had over the years So where does one start writing about these adventures You start at the beginning That beginning was in 1967 when I was helping a friend of mine Frank re build an old wooden boat that he had bought Frank took the whole boat apart and then rebuilt it from the frames up It was a sleek little craft and I found myself involved in his project Frank found a similar craft and with his promise of help I bought it I spent the whole winter and most of the spring doing the things that had to be done to the boat to get it ready for the summer of 69 I knew nothing about about sailing But how hard could it be to learn I soon found out My sailing adventures started that summer I learned quickly that unlike a power boat a sailboat is not a craft that you get aboard turn a key and then drive it like a car You have to sail the boat You have to do what the wind lets you do You cant go directly where you want to go because the wind wont allow it You have to finesse you have be diplomatic you have to learn to tweak a sail rather than over trim Well I learned to get that sailboat from point to point I also learned that time on a sailboat is not the same as time on land and I learned this on my very first trip on my first sailboat That three hour trip ended up taking thirteen hours Read about it The time of a sailboat trip can not be predicted If you need to get to a certain place at a certain time take a bus not a sailboat An afternoon trip has more than once become a late nighter Leave your watches ashore Thats what I tell everyone before they step foot aboard I dont know what time well be back but Im certain that we will be back My very first sailboat trip was not a late nighter but rather an early morning return Speaking of time How long does it take you to hang a calender

on your wall You get a stick pin and put it through a hole in the calender and stick the pin in the cork board Thirty seconds It took me the better part of three hours to hang a calender on the boat First I had to get the tape from the old calender off the wall For this project I had to find the razor blade scrapper Then I had to run to the hardware store to get new blades for it The scrapper got the top layer of the tape off the wall but the sticky part of the tape just rolled up into little balls I had to go back to the hardware store for some solvent to get the sticky balls off the wall Then and only then was I able to re tape the new calender to the wall I have since put the scrapper in its place so I can find it next time I hope I remember that place Imagine what a project it is to install a new pedestal steering system or an new diesel engine Imagine the time it takes to make an old boat a safe craft a boat ready to sail and the keyword is safe It took me the better part of four years to make my Morgan 38 the boat I wanted it to be And notice Im not saying anything about the cost Thats another story And these are some of the stories I tell This is the third boat I have redone But it is the last boat that I will redo Im getting too old for this rebuilding stuff Parts of Sail Tales tells about projects such as what I have just described But the majority of the stories are about sailing trips where something happens If you are a sailor or if you own a sailboat sit back and try to remember trips that were dull and boring They dont pop into your mind But what does pop are the adventures the thrill of the wind that is blowing just a bit harder than you would like You remember the trips where the rail is in the water for most of the day and how you were able to keep the boat under control You remember the trips where there was no wind and the day became a motor day You remember entering an anchorage and finding someone there from your marina or someo **Ocean**

**Passages and Landfalls** Andy O'Grady,Rod Heikell , This cruising guide for ocean voyagers provides invaluable passage planning information for tried and tested routes around the world Climates and weather patterns currents seasons and timings are key to selecting routes but just as important is knowing something about the countries that you will arrive in Details of the expected formalities and regulations are followed by essential information on key landfalls accompanied by the first hand observations of well known world sailors and authors Rod Heikell and Andy O Grady Text and plans have been updated for this third edition which is illustrated with a number of new photographs to inspire both dreamers and passagemakers I have recently been planning a voyage from Trinidad to New Zealand using Ocean Passages and Landfalls by Rod Heikell and Andy O Grady The book has been an exceptional resource The mass of information on a wealth of subjects is excellent The layout is beautifully put together and very accessible The pilotage and chartlets will be invaluable The book will certainly be travelling with me and I cannot recommend it highly enough to anybody who is planning ocean voyaging Theresa Kewell S Y Mr Blue This is a blue planet book Its scope is awe inspiring as it takes an overview of the globe as the yachtsman s potential cruising ground It is of course possible to glean all the macro information from scientific geophysical sources but the personality and experience of the authors adds an indispensable ingredient Yachting Monthly **Boat Interior Construction** Michael Naujok,2002 A guide to DIY interior boatbuilding Cover **Cruising World** ,1997-01 **It's Your**
