Far Eastern Economic Review ,2002 **The Cult of Saints in Late Antiquity and the Middle Ages** Paul Antony Hayward,James Howard-Johnston,1999 This book contains eleven essays prefaced by a general introduction on a set of related themes the characteristic traits and diverse functions of holy men the fashioning of saints out of a small minority of holy men and a number of other individuals of high social status but with more dubious spiritual credentials the literary processes involved in the construction of hagiographical texts the role of hagiography in the creation and diffusion of cults and the worldly interests and other purposes which were served by hagiographical texts and the cults which they propagated These themes are explored across a wide range of social and cultural milieux extending from the late antique east Mediterranean through the early medieval Frankish world and Byzantium to Russia and Islam in the high middle ages The work of Peter Brown in particular his article The Rise and Function of the Holy Man in Late Antiquity first published in 1971 forms a constant point of reference acknowledged by the contributors as having irradiated the whole field with fresh provocative and illuminating ideas *Homer. the Immanent Biography* , **Popular Science** ,1976-06 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better *Popular Photography* ,1994-09 **Economy and Society in the Transformation of the World** Mike Gonzalez,Salustiano del Campo Urbano,Roberto Mesa,1984 Mismanaged Trade? Kenneth Flamm,2010-12-01 The semiconductor industry is at the forefront of current tensions over international trade and investment in high technology industries This book traces the struggle between U S and Japanese semiconductor producers from its origins in the 1950s to the novel experiment with managed trade embodied in the U S Japan Semiconductor Trade Arrangements of 1986 and the current debate over continuation of elements of that agreement Flamm provides a thorough analysis of this experiment and its consequences for U S semiconductor producers and users and presents extensive discussion of patterns of competition within the semiconductor industry Using a wealth of new data he argues that a fundamentally new trade regime for high technology industries is needed to escape from the present impasse He lays out the alternatives from laissez faire to managed trade and argues strongly for a new set of international ground rules to regulate acceptable behavior by government and firms in high tech industries Flamm s detailed analysis of competition within the semiconductor industry will be of great value to those interested in the industrial organization of high technology industries as well as those concerned with trade and technology policy international competition and Japanese industrial policies **New York Magazine** ,1988-07-18 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back
