Writing a Profile Essay

Writing a profile essay will give you some practice in writing descriptive and informative essay about definite person. A good profile essay should present the reader a portrait of person. This type gives the writer more liberately freedom than an expository or persuasive essay but it is still significant to organize your essay. The aim of profile essay is to show through the facts and oversight - the different qualities of person. You should be objective in what you want to present the readers. At the same time, you give the readers your own opinion.

Choosing a subject. You should select your subject responsibly. You don't need to choose a famous person or somebody who has an exciting life. Remember that your task is to show something curious about your subject. Don't generalize. For example, don't write about students in general. Write about the one in particular. It would be great if you can choose a person who saw a part of the history. For example woman who was on the last "Queen" concert. You can also choose a person whose job is very useful for society. For instance, it could be a police officer, doctor or a firefighter

Remember to respect your subject. It doesn't matter like your it or not. You should be objective during the writing a profile essay. Your emotions could distract you from the important facts.

Clarify the direction of your essay. Try to answer these questions:

- Why is this subject interesting?
- What are you feeling about your subject?
- Do you know a lot about your subject?
- What do other people think about it? Is their opinion differs from your?
- Should you include the interview material?
- What information you should give your readers?
- Do you have a good plan how to develop your essay?

Your essay shouldn't be completely neutral. Show your own opinion to the readers. They will know your impression about the subject. Your viewpoint will help the audience to understand your topic better. In the end, a profile essay shows the significance of the person.

Interview the person. Make a list of questions before the interview. Ask the basic questions first: who, why, where, when. Then move to person's hobbies, accomplishments and interests

Profile Pieces Sue Joseph, Richard Lance Keeble, 2015-10-14 This book examines the history theory and journalistic practice of profile writing Profiles and the practice of writing them are of increasing interest to scholars of journalism because conflicts between the interviewer and the subject exemplify the changing nature of journalism itself While the subject often through the medium of their press representative struggles to retain control of the interview space the journalist seeks to subvert it This interesting and multi layered interaction however has rarely been subject to critical scrutiny partly because profiles have traditionally been regarded as public relations exercises or as soft journalism However chapters in this volume reveal not only that profiling has historically taken many different forms but that the idea of the interview as a contested space has applications beyond the subject of celebrated individuals The volume looks at the profile s historical beginnings at the contemporary manufacture of celebrity versus the ordinary at profiling communities countries and movements at profiling the destitute at sporting personalities and finally at profiling and trauma

Translanguaging and Epistemological Decentring in Higher Education and Research Heidi Bojsen, Petra Daryai-Hansen, Anne Holmen, Karen Risager, 2023-01-13 Using data from multilingual settings in universities and adjacent learning contexts in East Asia North Africa Central and North America and Europe this book provides examples of the heuristic value of translanguaging and epistemological decentring Despite this and other theoretical and empirical work and ever stronger calls for the inclusion of other languages epistemologies and constructions of culture in higher education decentring and translanguaging practices are often relegated to the margins or suppressed in research and education because of the organisational structures of education institutions and prevailing language norms policies and ideologies The authors draw on research on pluri and multilingualism within education studies as well as post and decolonial theoretical contributions to the research on the role of language in education and knowledge production to provide evidence that decentring cannot happen until learners have been given the tools to identify which sorts of centring dynamics and conditions are salient to their learning and trans languaging
