method and Heidegger's conceptualization of philosophical method as explorative confrontation. He is also critical of Heidegger's conceptuality and develops a post-Heideggerian concept of philosophical method which provides a new perspective on the role of willing poetry and earth interest in contemporary philosophy. This earth interest turns out to be particularly important to consider and leads to critical reflections on Heidegger's concept of Earth, the necessity of Earth interest in contemporary philosophy and a post-Heideggerian concept of the Earth. Heidegger's Concept of Philosophical Method will be of interest primarily to Heidegger scholars and graduate students but its discussion of philosophical method and environmental philosophy will also appeal to scholars in other disciplines and areas of philosophy. **In Quest of the**
