**How Do You Get Clinicians Involved in Quality Improvement?** Tom Ling, 2010

**Practical Clinical Oncology** Louise Hanna, Tom Crosby, Fergus Macbeth, 2015-11-19 Practical Clinical Oncology 2nd edition provides a practical and comprehensive review of the current management of common types of cancer

Introductory chapters give background information on the main treatment modalities and other key issues such as acute oncology palliative care and clinical research with new chapters on pathology and advanced external beam radiotherapy. Subsequent chapters describe the diagnosis and treatment of malignancies based on tumour site or type. Finally multiple choice questions allow the reader to test their knowledge. This edition has been fully updated to reflect the most current developments in radiotherapy tumour biology and drug therapy. With an emphasis on practical aspects of cancer care that will be relevant to day to day decision making this book is an invaluable resource on contemporary clinical management of the cancer patient for all trainees and practitioners involved in clinical oncology medical oncology and palliative care as well as for specialist nurses and radiographers.

**The Health Improvement Profile: A manual to promote physical wellbeing in people with severe mental illness** Sheila Hardy, Jacque White and Richard Gray, 2015-04-24. This practical guide written by experts in mental health nursing is designed to support healthcare practitioners in checking the physical health of people with severe mental illness (SMI). As life expectancy is reduced by 12 to 19 years in people with SMI, this patient group should receive a physical health check at least once a year. Yet many mental health practitioners have not been trained to assess their physical health needs and even when such training is offered it may be difficult to access it because of clinical workloads. The Health Improvement Profile (HIP) provides an efficient, evidence-based physical health check tool specifically designed to be used when assessing people with SMI. It supports practitioners in identifying physical health problems and guides them towards evidence-based interventions to address common health issues affecting people with SMI, ranging from cardiovascular disease to lifestyle factors such as diet, alcohol and smoking. Contents include: Introduction; What is severe mental illness? What treatments are used in severe mental illness? Systems of the body that are commonly affected in people with severe mental illness; Common physical comorbidities in people with severe mental illness; Cardiovascular disease in people with severe mental illness; Problematic behaviours affecting health in people with severe mental illness; How to use the Health Improvement Profile physical health check tool; Changing behaviour to improve health; Appendix 1: Health Improvement Profile HIP Female; Appendix 2: Health Improvement Profile HIP Male.

*Surveillance Report 2016* National Institute for Health and Care Excellence (Great Britain), 2016. We will plan an update of the guideline on colorectal cancer NICE guideline CG131. An extension to the scope of NICE guideline CG131 will be needed to cover areas covered by the guidance on improving outcomes in colorectal cancer NICE guideline CSG5 that have not been superseded by other NICE guidance. We will withdraw NICE guideline CSG5 on publication of the update of the colorectal cancer guideline.

 Williams, 2008-04-15 This is a book about using the best evidence to inform treatment decisions for people with cancer It is  
 written by oncologists for oncologists using examples throughout to illustrate key points The book starts off with a toolbox  
 section written in a way which will help those relatively new to the principles of evidence based oncology to understand the  
 key issues and equip them with the basics of how to tell a good study from a bad one The majority of the book then deals with  
 an evidence based summary of the common and important cancers in a structured and easy to read format around common  
 patient scenarios and frequently asked questions Whilst most of the evidence is based on randomised controlled trials other  
 studies are cited where appropriate eg when discussing adverse events The unique accompanying book website will contain  
 updates of new chapters and studies as they become available Written by leading world figures in the evidence  
 based movement Includes free CD ROM with PC eBook and sample PDA chapter Methodology of reviewing and appraising  
 evidence discussed in the context of cancer management Clinical sections covering prevention and screening Chapters on
