

NIKON FLASH UNIT BC-5

The BC-5 Flash Unit makes perfect electrical connection with the flash terminal on the Nikon camera only by sliding directly (in the Nikon model S2, S3, S4 or SP) or by aid of an adapter coupler (in the Nikon model F) into the camera's accessory shoe, eliminating the need for a connecting cord.

Inserting of a flash bulb into the socket charges instantaneously the capacitor to afford full power to the bulb. The unit is equipped with a test button for checking the flash bulb and circuit (including battery and capacitor).

The Unit takes bulbs of regular midsize Swan-base type or pinless miniature type. Battery is a 22.5 volt for photo flash (EVEREADY Type 505).

The fan-fold reflector tilts backwards for bounce flash. A dial exposure calculator provided on the back of the unit allows of easy and correct determination of the exposure.
