Pitkin Review Fall 2014:

Pitkin Review Fall 2014 Goddard College MFA Students, Rose Marie Sabangan, 2014-12-11 The Pitkin Review is a literary journal produced by writers who are currently enrolled in the MFA Creative Writing program at one of Goddard College's two campuses. The Pitkin Review is self-supporting, staffed by the MFA candidates and funded solely by the sales of copies of the publication. The publication offers writers experience in submitting to and producing every aspect of a literary journal and also serves as a showcase for exceptional student writing. Published bi-annually in the spring and fall, The Pitkin Review is a collaborative community of editors, writers, and graphic artists who volunteer their time and talents to generate a high quality publication.

Creolizing Critical Theory Kris F. Sealey, Benjamin P. Davis, 2024-01-04 Creolizing Critical Theory highlights the Caribbean as a philosophical site from which for centuries and until today theorists have articulated pressing critiques of capitalism and colonialism. Some of these critiques, such as those of the Saramaka Maroons, have stressed the value of autonomy. Others, such as those of the West Indies Federation, have emphasized solidarity in the face of European occupation. Critical Theory as an emancipatory project rooted in the values of autonomy, solidarity, and equality then has long been a Caribbean practice. Drawing on a range of voices, Creolizing Critical Theory centers Caribbean critiques with a view toward praxis in the present.

Philosophy for Everyone Matthew Chrisman, Duncan Pritchard, Guy Fletcher, Elinor Mason, Jane Suilin Lavelle, Michela Massimi, Alasdair Richmond, Dave Ward, 2016-07-15 Philosophy for Everyone begins by explaining what philosophy is before exploring the questions and issues at the foundation of this important subject. Key topics in this new edition and their areas of focus include: Moral philosophy: the nature of our moral judgments and reactions, whether they aim at some objective moral truth or are mere personal or cultural preferences, and the possibility of moral responsibility given the sorts of things that cause behavior. Political philosophy: fundamental questions about the nature of states and their relationship to the citizens within those states. Epistemology: what our knowledge of the world and ourselves consists in and how we come to have it, and whether we should form beliefs by trusting what other people tell us. Philosophy of mind: what it means for something to have a mind and how minds should be understood and explained. Philosophy of science: foundational conceptual issues in scientific research and practice, such as whether scientific theories are true and Metaphysics: fundamental questions about the nature of reality, such as whether we have free will or whether time travel is possible. This book is designed to be used in conjunction with the free Introduction to Philosophy MOOC, massive open online course created by the University of Edinburgh's Eidyn research centre and hosted by the Coursera platform (www.coursera.org). This course is also highly recommended for anyone looking for a short overview of this fascinating discipline.

Mapping and Measuring Deliberation André Bächtiger, John Parkinson, 2019-01-03 Deliberative democracy has challenged two widely accepted nostrums about democratic politics: that people lack the capacities for effective self-government and that democratic procedures are arbitrary and do not reflect popular will. Indeed, the idea of popular will

is itself illusory On the contrary deliberative democrats have shown that people are capable of being sophisticated creative problem solvers given the right opportunities in the right kinds of democratic institutions But deliberative empirical research has its own problems In this book two leading deliberative scholars review decades of that research and reveal three important issues First the concept deliberation has been inflated so much as to lose empirical bite second deliberation has been equated with entire processes of which it is just one feature and third such processes are confused with democracy in a deliberative mode more generally In other words studies frequently apply micro level tools and concepts to make macro and meso level judgements and vice versa Instead Bächtiger and Parkinson argue that deliberation must be understood as contingent performative and distributed They argue that deliberation needs to be disentangled from other communicative modes that appropriate tools need to be deployed at the right level of analysis and that scholars need to be clear about whether they are making additive judgements or summative ones They then apply that understanding to set out a new agenda and new empirical tools for deliberative empirical scholarship at the micro meso and macro levels

Constitutional Law, Religion and Equal Liberty Azin Tadjini, 2019-09-19 During the 20th century many countries embarked on a process of constitutional secularization by which the role of religion gradually became limited Yet by the late 20th century and increasingly following the end of the Cold War this development began to be challenged This book examines the return of religion in constitutions through the concept of constitutional de secularization It places this phenomenon in the context of the constitutional memory of the countries in which it has taken place and critically examines it against the development and standards of constitutionalism as the prevailing constitutional

legal and political theory Central to this analysis is the impact of constitutional de secularization on the regulation of equality in liberty that is both the regulation of constitutional rights and the scope for equality of those who are granted such rights The book argues that equal liberty forms an essential part of constitutionalism as a theory and that constitutionalism therefore entails a continuous development towards expanding it The first and second part of the book presents a conceptual framework for the study of constitutional de secularization The third part presents and analyses three cases of constitutional de secularization in Afghanistan Iran and Iraq The book will be of interest to researchers and policy makers interested in constitutional history and theory and the role of religion in law and its compatibility with human rights *Current Developments in Biotechnology and Bioengineering* Jonathan W-C Wong,R. D. Tyagi,Ashok Pandey,2016-09-19 Current Developments in Biotechnology and Bioengineering Solid Waste Management provides extensive coverage of new developments state of the art technologies and potential future trends reviewing the latest innovative developments in environmental biotechnology and bioengineering as they pertain to solid wastes also revealing current research priority areas in solid waste treatment and management The fate of solid wastes can be divided into three major areas recycling energy recovery and safe disposal From this foundation the book covers such key areas as biotechnological production of value added products from solid waste bioenergy production from various organic solid wastes and biotechnological solutions for safe environmentally friendly treatment and disposal The state of the art situation potential advantages and limitations are discussed along with proposed strategies on how to overcome limitations Reviews available bioprocesses for the production of bioproducts from solid waste Outlines processes for the production of energy from solid waste using biochemical conversion processes Lists various environmentally friendly treatments of solid waste and its safe disposal

Shrinking Cities Russell Weaver,Sharmistha Bagchi-Sen,Jason Knight,Amy E. Frazier,2016-07-15 Shrinking Cities Understanding Shrinkage and Decline in the United States offers a contemporary look at patterns of shrinkage and decline in the United States The book juxtaposes the complex and numerous processes that contribute to these patterns with broader policy frameworks that have been under consideration to address shrinkage in U S cities A range of methods are employed to answer theoretically grounded questions about patterns of shrinkage and decline the relationships between the two and the empirical associations among shrinkage decline and several socio economic variables In doing so the book examines new spaces of shrinkage in the United States The book also explores pro growth and decline centered governance which has important implications for questions of sustainability and resilience in U S cities Finally the book draws attention to U S wide demographic shifts and argues for further research on socio economic pathways of various groups of population contextualized within population trends at various geographic scales This timely contribution contends that an understanding of what the city has become as it faces shrinkage is essential toward a critical analysis of development both within and beyond city boundaries The book will appeal to urban and regional studies scholars from a variety of disciplinary

backgrounds as well as practitioners and policymakers Materials for Sustainable Environmental, Energy, and Bioresource Applications Phuong Nguyen-Tri, 2024-08-08 This proceedings book showcases the latest research and developments in materials sciences and their applications for solving environmental and energy related challenges The book features insightful contributions from leading researchers academics professionals and students in the field who share their expertise experiences and perspectives on the key issues and innovations in materials sciences and engineering The book is helpful to those interested in environmental sustainability energy efficiency or bioresource utilization **Earned Citizenship** Michael J. Sullivan, 2019-03-19 The migration and settlement of 11 million unauthorized immigrants is among the leading political challenges facing the United States today The majority of unauthorized immigrants in the U S have been here for more than five years and are settling into American communities working forming families and serving in the military even though they may be detained and deported if they are discovered An open question remains as to what to do about unauthorized immigrants who are already living in the United States On one hand it is important that the government sends a message that future violations of immigration law will not be tolerated On the other sits a deeper ethical dilemma that is the focus of this book what do the state and citizens owe to unauthorized immigrants who have served their adopted country Earned Citizenship argues that long term unauthorized immigrant residents should be able to earn legalization and a pathway to citizenship through service in their adopted communities Their service would act as restitution for immigration law violations Military service in particular would merit naturalization in countries with a strong citizen soldier tradition including the United States The book also considers the civic value of caregiving as a service to citizens and the country contending that family immigration policies should be expanded to recognize the importance of caregiving duties for dependents This argument is part of a broader project in political theory and public policy aimed at reconciling civic republicanism with a feminist ethic of care and its emphasis on dependency work As a whole Earned Citizenship provides a non humanitarian justification for legalizing unauthorized immigrants based on their contributions to citizens and institutions in their adopted nation Food and the Risk Society Charlotte Fabiansson, Stefan Fabiansson, 2016-05-26 This book offers a comprehensive understanding of the current scientific knowledge concerning risks associated with food preparation processing and consumption with particular attention to the gap between scientific research and public perception Examining the effects of food on the body from both micro and macro levels it covers a range of broad themes and current concerns including obesity and the obesity epidemic the benefits or otherwise of dietary supplements caffeine consumption GM food alcohol organic food the consumption of fruit and vegetables and pathogens and contaminants Thematically arranged according to the application of broad theoretical approaches in sociological theory the socio cultural perspective the risk society perspective and the governmentality perspective each chapter focuses on a particular area of interest or concern in relation to food covering the existing literature in detail and offering illustrative empirical examples whilst

identifying gaps in knowledge and areas for further research An accessible and rigorous examination of food and health and the discrepancy between scientific opinion and consumer perception of safe food the real risks versus the perceived risks this book will appeal to scholars and students of sociology geography food nutrition and environmental ecosystems as well as health professionals *Stitching Governance for Labour Rights* Juliane Reinecke, Jimmy Donaghey, 2023-03-16 Transnational labour governance is in urgent need of a new paradigm of democratic participation with those who are most affected typically workers placed at the centre To achieve this principles of industrial democracy and transnational governance must come together to inform institutions within global supply chains This book traces the development of transnational industrial democracy using responses to the 2013 Rana Plaza disaster as the empirical context A particular focus is placed on the Bangladesh Accord and the JETI Workplace Social Dialogue programme Drawing on longitudinal field research from 2013 2020 the authors argue that the reality of modern day supply chain capitalism has neither optimal institutional frameworks nor effective structures of industrial relations Informed by principles of industrial democracy the book aims at enhancing emerging forms of private transnational governance as second best institutions *From Multiculturalism to Integration* Abeeda Qureshi, 2021-09-28 This book is key to the debates surrounding the achievement of Preventing Violent Extremism PVE a crucial aspect of SDG16 Peace Justice and Strong Institutions It examines the role of Muslim women activists in the implementation of ethno religious minority policies in the UK It presents a comprehensive analysis of Muslim women s engagement with political and governance processes over the years especially the execution of PVE policies in the aftermath of the 7 7 bombings in the UK It studies the extent to which the government has been successful in its policy of involving Muslim women in governing contexts by referring to changes that these women have brought about as part of the government s consultative forums and meetings Drawing on evidence based on documentary analysis and in depth elite interviews the author highlights the positive role of non elected Muslim women in the wider debate on countering extremism and radicalization An important contribution to the study of minority policies in the UK the book will be useful for students and researchers of security studies public policy minority studies politics multiculturalism terrorism race and ethnic studies and sociology **The Health of Newcomers** Patricia Illingworth, Wendy E. Parmet, 2017-01-24 Immigration and health care are hotly debated and contentious issues Policies that relate to both issues to the health of newcomers often reflect misimpressions about immigrants and their impact on health care systems Despite the fact that immigrants are typically younger and healthier than natives and that many immigrants play a vital role as care givers in their new lands native citizens are often reluctant to extend basic health care to immigrants choosing instead to let them suffer to let them die prematurely or to expedite their return to their home lands Likewise many nations turn against immigrants when epidemics such as Ebola strike under the false belief that native populations can be kept well only if immigrants are kept out In *The Health of Newcomers* Patricia Illingworth and Wendy E Parmet demonstrate how shortsighted and dangerous it is to craft

health policy on the basis of ethnocentrism and xenophobia Because health is a global public good and people benefit from the health of neighbor and stranger alike it is in everyone's interest to ensure the health of all Drawing on rigorous legal and ethical arguments and empirical studies as well as deeply personal stories of immigrant struggles Illingworth and Parmet make the compelling case that global phenomena such as poverty the medical brain drain organ tourism and climate change ought to inform the health policy we craft for newcomers and natives alike **Critical Care Obstetrics** Luis D.
