

PLATE TECTONICS TEST

MULTIPLE CHOICE. Read the following questions carefully and chose the **BEST** answer and place it on the line (1 point each).

3.2A Describe the Earth's Layers

3.2C Describe the differences between oceanic and continental crust

3.2B Explain Earth features using Plate Tectonic Theory.

3.2B Explain the movement of Tectonic Plates.

3.3C Explain the motion history of the Earth's plates.

1. What evidence do scientists have that the Earth has layers?

- a. Seismic waves change speed and direction as they travel through the Earth.
- b. Seismic waves always go straight through the Earth.
- c. They sent scientists down to make observations.
- d. They don't really know.

2. Which part of Earth is most likely the cause of Earth's magnetic field?

- a. Lithosphere
- b. Asthenosphere
- c. Mantle
- d. Core

3. Using rock samples and evidence from seismic waves, what can scientists infer about the Earth's layers?

- a. The layers have different chemical compositions.
- b. The layers have different temperatures and densities.
- c. The layers have different depths and thicknesses.
- d. All of the Above.

4. Which part of the Earth could be compared to the inner part of the peach?

- a. Crust
- b. Mantle
- c. Outer Core
- d. Inner Core

Museum Education Anthology, 1973-1983 Susan K Nichols,2017-07-28 Classic set of 45 articles from the first decade of the Journal of Museum Education and its predecessor Roundtable Reports Articles and essays focus on teaching strategies introspective glances at the museum education field reports of program successes and near successes evaluative studies and reviews of exhibitions and literature related to object based learning This title is sponsored by The Museum Education Roundtable The Museum Education Roundtable MER is a non profit organization based in Washington DC dedicated to enriching and promoting the field of Museum Education Assessment in Geographical Education: An International Perspective Theresa Bourke,Reece Mills,Rod Lane,2022-02-27 In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students

teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills
