**Ars Vitae** Elisabeth Lasch-Quinn, 2020-10-15 Despite the flood of self help guides and our current therapeutic culture feelings of alienation and spiritual longing continue to grip modern society In this book Elisabeth Lasch Quinn offers a fresh solution a return to classic philosophy and the cultivation of an inner life The ancient Roman philosopher Cicero wrote that philosophy is ars vitae the art of living Today signs of stress and duress point to

a full fledged crisis for individuals and communities while current modes of making sense of our lives prove inadequate Yet in this time of alienation and spiritual longing we can glimpse signs of a renewed interest in ancient approaches to the art of living In this ambitious and timely book Elisabeth Lasch Quinn engages both general readers and scholars on the topic of well being She examines the reappearance of ancient philosophical thought in contemporary American culture probing whether new stirrings of Gnosticism Stoicism Epicureanism Cynicism and Platonism present a true alternative to our current therapeutic culture of self help and consumerism which elevates the self s needs and desires yet fails to deliver on its promises of happiness and healing Do the ancient philosophies represent a counter tradition to today s culture auguring a new cultural vibrancy or do they merely solidify a modern way of life that has little use for inwardness the cultivation of an inner life stemming from those older traditions Tracing the contours of this cultural resurgence and exploring a range of sources from scholarship to self help manuals films and other artifacts of popular culture this book sees the different schools as organically interrelated and asks whether taken together they can point us in important new directions *Ars Vitae* sounds a clarion call to take back philosophy as part of our everyday lives It proposes a way to do so sifting through the ruins of long forgotten and recent history alike for any shards helpful in piecing together the coherence of a moral framework that allows us ways to move forward toward the life we want and need

Education for Knowing Paul A. Wagner, Frank K. Fair, 2020-10-30 If our goal is Education for Knowing as the title says then we need to be guided by a conception of what knowing is For example we can all agree that there are math facts that students need to learn and we can agree that there are general concepts and laws that students should be acquainted with But is there more involved perhaps something like nurturing in students a desire to probe deeper into the workings of thing Or developing a capacity to explain why things work the way they do Our conceptions of what genuine knowing is serve as guides to what we think the goal of education is and they tell us how to build a student However as it turns out there are multiple conceptions of what knowing truly involves and these conceptions tend to be different for different sets of education stakeholders such as parents and their children school administrators and educational researchers Understanding this diversity of conceptions of knowing will make it easier for representatives of the different stakeholder groups to work together to accomplish the goal of building knowing students
