**The School Magazine**, 1927      Psychological Tests for Use with Blind Adults in Vocational Rehabilitation Salvatore G. DiMichael, 1947      *Rehabilitation Service Series* United States. Federal Security Agency. Office of Vocational Rehabilitation, 1946      *California Short-form Test of Mental Maturity: Levels 2H, 3, 4, 5* California Test Bureau, 1961      Otis Self-administering Tests of Mental Ability Arthur Sinton Otis, 1922      *Tests in Print* Oscar Krisen Buros, 1974      A Compendium of Neuropsychological Tests Esther Strauss, Elisabeth M. S. Sherman, Otfried Spreen, 2006-04-06

For the practicing neuropsychologist or researcher keeping up with the sheer number of newly published or updated tests is a challenge as is evaluating the utility and psychometric properties of neuropsychological tests in a clinical context. The goal of the third edition of *A Compendium of Neuropsychological Tests* a well established neuropsychology reference text is twofold. First the Compendium is intended to serve as a guidebook that provides a comprehensive overview of the essential aspects of neuropsychological assessment practice. Second it is intended as a comprehensive sourcebook of critical reviews of major neuropsychological assessment tools for the use by practicing clinicians and researchers. Written in a comprehensive easy to read reference format and based on exhaustive review of research literature in neuropsychology, neurology, psychology and related disciplines, the book covers topics such as basic aspects of neuropsychological assessment as well as the theoretical background, norms and the utility, reliability and validity of neuropsychological tests. For this third edition all chapters have been extensively revised and updated. The text has been considerably expanded to provide a comprehensive yet practical overview of the state of the field. Two new chapters have been added: *Psychometrics in Neuropsychological Assessment* and *Norms in Psychological Assessment*. The first two chapters present basic psychometric concepts and principles. Chapters three and four consider practical aspects of the history taking interview and the assessment process itself. Chapter five provides guidelines on report writing and chapters six through sixteen consist of detailed critical reviews of neuropsychological tests and address the topics of intelligence, achievement, executive function, attention, memory, language, visual perception, somatosensory, olfactory function, mood, personality and response bias. A unique feature is the inclusion of tables that summarize salient features of tests within each domain so that readers can easily compare measures. Additional tables within each test review summarize important features of each test, highlight aspects of each normative dataset and provide an overview of psychometric properties. Of interest to neuropsychologists, neurologists, psychiatrists and educational and clinical psychologists working with adults as well as pediatric populations, this volume will aid practitioners in selecting appropriate testing measures for their patients and will provide them with the knowledge needed to make empirically supported interpretations of test results.
