U.S. News & World Report ,2007 **Brave New War** John Robb,2008-04-28 For my money John Robb a former Air Force officer and tech guru is the futurists futurist Slate The counterterrorism expert John Robb reveals how the same technology that has enabled globalization also allows terrorists and criminals to join forces against larger adversaries with relative ease and to carry out small inexpensive actions like sabotaging an oil pipeline that generate a huge return He shows how combating the shutdown of the world s oil high tech and financial markets could cost us the thing we ve come to value the most worldwide economic and cultural integration and what we must do now to safeguard against this new method of warfare **Focus On: 100 Most Popular American Male Soap Opera Actors** Wikipedia contributors, **Modern War and the Utility of Force** Isabelle Duyvesteyn,Jan Angstrom,2010-04-05 This book investigates the use and utility of military force in modern war After the Cold War Western armed forces have increasingly been called upon to intervene in internal conflicts in the former Third World These forces have been called upon to carry out missions that they traditionally have not been trained and equipped for in environments that they often have not been prepared for A number of these new types of operations in allegedly new wars stand out such as peace enforcement state building counter insurgency humanitarian aid and not the least counter terrorism The success rate of these missions has however been mixed providing fuel for an increasingly loud debate on the utility of force in modern war This edited volume poses as its central question what is in fact the utility of force Is force useful for anything other than a complete conventional defeat of a regular opponent who is confronted in the open field This book will be of much interest to students of strategic studies war and conflict studies counter insurgency security studies and IR Isabelle Duyvesteyn is an Associate Professor at the Department of History of International Relations Utrecht University in the Netherlands Jan Angstrom is a researcher at the Swedish National Defence College A Culture of Deference Festus Ugboaja Ohaegbulam,2007 This book explores the culture of deference by the legislative branch to the executive branch on foreign policy issues particularly regarding the George W Bush administration s rush to war in Iraq in 2003 By authorizing President Bush to go to war in Iraq at his own discretion in its October 2002 resolution the 107th Congress abdicated its constitutional responsibility and its members failed to honor their oath to uphold the Constitution of the United States Although the war powers are constitutionally those of Congress historically presidents have engaged in war making and Congress has with limited success attempted to curb such war making This book traces how this culture of deference to the chief executive on war making evolved and how especially in the case of Iraq it has adversely affected the interests of the nation its constitutional framework and its position in the world This book will serve as an excellent text for courses on U S foreign policy U S diplomatic history and the role of Congress Nuclear Iran Anthony Kairouz,2007 I did not start out to have a book of poems published for I was in the beginning writing poems to release the pain and suffering I had upon the sudden death of my son Mark I was angry at God and everyone at the time even blaming

myself for his death I suddenly found myself writing getting up all hours of the night and writing things that my son was telling me Such things as he was still with me I was not to blame and that I could bring a little comfort to others I felt that he was now guiding me as my Angel that God had sent back to me I began meeting others and I was able to feel their pain and suffering and even joys I moved to a little area called SANTEE LAKES CAMPGROUNDS where I began writing even more meeting more people and soon started going to a small church called LAKESIDE OUTREACH MINISTRIES where I became more spiritually involved with my poem writings I feel that I had been led there for I met complete strangers whom I wrote for and about and they told me how much the poems meant to them Almost all of these poems are from actual happenings or events in my life since the passing of my son some about things I have seen or heard and some just parodies of certain news and elections But all have had an impact upon me Pastor Kenny Griffin told me that God had given me a talent and I needed to share it with others and so this is how I came to have my poems published I have found peace and comfort in the writing of my poems and for those of you who read my poems if you found this same comfort and enjoyment then I feel that

Stigma Cities Jonathan Foster, 2018-09-27 Growing up in Birmingham Alabama a city that he loved Jonathan Foster was forced to come to grips with its reputation for racial violence In so doing he began to question how other cities dealt with similar kinds of stigmas that resulted from behavior and events that fell outside accepted norms He wanted to know how such stigmas changed over time and how they affected a city's reputation and residents Those questions led to this examination of the role of stigma and history in three very different cities Birmingham San Francisco and Las Vegas In the era of civil rights Birmingham became known as Bombingham a place of constant reactionary and racist violence Las Vegas emerged as the nation's most recognizable Sin City and San Francisco's tolerance of homosexuality made it the perceived capital of Gay America Stigma Cities shows how cultural and political trends influenced perceptions of disrepute in these cities and how in turn their status as sites of vice and violence influenced development decisions from Birmingham's efforts to shed its reputation as racist to San Francisco's transformation of its stigma into a point of pride to Las Vegas's use of gambling to promote tourism and economic growth The first work to investigate the important effects of stigmatized identities on urban places Foster's innovative study suggests that reputation no less than physical and economic forces explains how cities develop and why An absorbing work of history and urban sociology the book illuminates the significance of perceptions in shaping metropolitan history

The War of Ideas Walid Phares, 2025-04-16 From Afghanistan and Iraq to Europe and the United States we are engaged in one of the most heated wars of all time In this incisive new book the man that has been called the only one to understand the mind of the jihadist shows that the most important battle is actually taking place in the hearts and minds of the world's population This is the war of ideas where ideology is the most powerful weapon of all Phares explores the beliefs of two opposing camps one standing for democracy and human rights and the other rejecting the idea of an international community and calling for jihad against the West He reveals the strategies of both sides

explaining that new technologies and the growing media savvy of the jihadists have raised the stakes in the conflict And most urgently he warns that the West is in danger of losing the war for whereas debate and theorizing rarely translate into action here ideas and deeds are inextricably linked for the forces of jihad

Lessons Not learned Roger Thompson, 2013-07-10 Despite its reputation as the most impressive naval force in the world the U S Navy is in trouble according to the author of this book and systemic weaknesses could be its undoing Here military sociologist Roger Thompson provides a compelling often scathing assessment of the U S Navy and its learning disabilities and then presents a convincing argument for reform Thompson points to the U S Navy s up or out promotion system massive personnel turnover inexperienced crews and drug and alcohol abuse as problems that make it difficult for the Navy to build cohesive well trained fighting units In a review of the Navy s recent history he finds that its ships submarines and aircraft are often outperformed in competitions and exercises with other navies and its failures are either denied altogether or perfunctorily excused Diesel submarines so quiet that they are rarely detected until it s too late to prevent an attack routinely surpass expensive U S nuclear subs and put U S aircraft carriers in danger American naval pilots whose weapons are often improperly tested are frequently bested by military pilots from other countries Because the U S Navy doesn t have enough surface ships to protect its capital ships American carrier strike groups now use Canadian ships as escorts Shortcomings like these Thompson argues undermine the Navy s potential and should be cause for national concern In presenting a side of the U S Navy that s rarely discussed this book spells out lessons the Navy must learn if it is going to succeed in an era of asymmetrical warfare of David versus Goliath conflicts In his conclusion the author puts forth a twelve step program that calls on the U S Navy to rethink its naval strategy to lose some weight and to focus on the fundamentals

The Vulnerable Empowered Woman Tasha N. Dubriwny, 2012-11-14 The feminist women's health movement of the 1960s and 1970s is credited with creating significant changes in the healthcare industry and bringing women's health issues to public attention Decades later women's health issues are more visible than ever before but that visibility is made possible by a process of depoliticization The Vulnerable Empowered Woman assesses the state of women's healthcare today by analyzing popular media representations television print newspapers websites advertisements blogs and memoirs in order to understand the ways in which breast cancer postpartum depression and cervical cancer are discussed in American public life From narratives about prophylactic mastectomies to young girls receiving a vaccine for sexually transmitted disease the representations of women's health today form a single restrictive identity the vulnerable empowered woman This identity defuses feminist notions of collective empowerment and social change by drawing from both postfeminist and neoliberal ideologies The woman is vulnerable because of her very femininity and is empowered not to change the world but to choose from among a limited set of medical treatments The media's depiction of the vulnerable empowered woman's relationship with biomedicine promotes traditional gender roles and affirms women's unquestioning reliance on medical science for empowerment The book concludes with a call to repoliticize women's health through narratives that can help us imagine women and their relationship to medicine differently

Evangelicals and Israel Stephen Spector, 2008-12-09 Most observers explain evangelical Christians' bedrock support for Israel as stemming from the apocalyptic belief that the Jews must return to the Holy Land as a precondition for the second coming of Christ But the real reasons argues Stephen Spector are far more complicated In *Evangelicals and Israel* Spector delves deeply into the Christian Zionist movement mining information from original interviews web sites publications news reports survey research worship services and interfaith conferences to provide a surprising look at the sources of evangelical support for Israel Israel is God's prophetic clock for many evangelicals irrefutable proof that prophecy is true and coming to pass in our lifetime But Spector goes beyond end times theology to find a complex set of motivations behind Israel evangelical relations These include the promise of God's blessing for those who bless the Jews gratitude to Jews for establishing the foundations of Christianity remorse for the Holocaust

Daschle vs. Thune Jon K. Lauck, 2016-04-18 The story behind the unseating of a Senate majority leader the race between Tom Daschle and John Thune in South Dakota was widely acknowledged as the other big race of 2004 Second in prominence only to the presidential race the Daschle Thune contest pitted the rival political ideologies that have animated American politics since the 1960s In a sign of the ongoing strength of political conservatism Daschle became the first Senate leader in fifty years to lose a re

America's Other Automakers Timothy J. Minchin, 2021-04 In 2018 almost half of all vehicles made in North America were produced at foreign owned plants and the sector was on track to monopolize the market Despite this the industry has been overlooked compared with its domestic counterpart both in scholarship and popular memory Redressing this neglect America's Other Automakers provides a new history of the foreignowned auto sector the first to extensively draw on archival sources and to articulate the human agency of participants including workers managers and industry recruiters Timothy J Minchin challenges the view that the industry's growth primarily reflected incentives stressing human agency and the complexity of individual stories instead Deeply human in its approach the book also explores the industry's impact on grassroots communities showing that it had more costs than supporters acknowledged Drawing on a wide range of primary and secondary sources America's Other Automakers uncovers significant tensions over unionization reports of discriminatory hiring and unease about the industry's rapid growth critically exploring seven large assembly facilities and their impact on the communities in which they were built
