Us Affairs 2015 Almanac:

The Middle East, Oil, and the U.S. National Security Policy Donald M. Snow, 2016-03-17 Three interrelated subject areas are at the heart of the current foreign and national security dilemma One is the Middle East which has been the epicenter of most U S policy activity for over a third of a century The second is energy policy particularly as it is affected by the development and exploitation of shale oil and gas reserves in the United States This is linked to the Middle East because it has been American dependence on Middle East petroleum that has created the interest the U S has in this region The third area is military manpower policy and two simultaneous wars in the new century have raised questions about the all volunteer force policy in place since 1972 It is increasingly evident that foreign and defense policy are strained and in need of fresh conceptualization The three areas identified are the most obvious examples of policy dysfunction The key area is the Middle East region As long as the United States remains heavily committed to this part of the world especially with military force and essentially because of its energy needs there will be strains on manpower resources that could force a reexamination of the all volunteer concept At the same time the reduction of U S dependence on Middle Eastern oil loosens the bonds that seem to impel American activism in the region The result could be true opportunities for a less confrontational adversary driven foreign and defense posture

US Hegemony and the Americas Arturo Santa-Cruz, 2019-12-06

In this book Arturo Santa Cruz advances an understanding of power as a social relationship and applies it consistently to the economic realm in United States relations with other countries of the Western Hemisphere

Following the academic and popular debate on the ebb and flow of US hegemony this work centers the analysis in a critical case for the exercise of US power through its economic statecraft the Americas its historical zone of influence

The rationale for the regional focus is methodological if it can be shown that Washington's sway has decreased in the area since the early 1970s when the discussion about this matter started it can be safely assumed that the same has occurred in other latitudes

The analysis focuses on three regions North America Central America and South America

Since each region contains countries that have at times maintained very different relationships with the United States the findings contribute to a better understanding of the practice of US power in the sub region in question adding greater variability to the overall results

US Hegemony and the Americas Power and Economic Statecraft in International Relations is an invaluable resource for students and scholars interested in Latin American History and Politics

Gerrymandering in America Anthony J. McGann, Charles Anthony Smith, Michael Latner, Alex Keena, 2016-04-04

This book considers the political and constitutional consequences of *Vieth v Jubelirer* 2004 where the Supreme Court held that partisan gerrymandering challenges could no longer be adjudicated by the courts

Through a rigorous scientific analysis of US House district maps the

authors argue that partisan bias increased dramatically in the 2010 redistricting round after the Vieth decision both at the national and state level From a constitutional perspective unrestrained partisan gerrymandering poses a critical threat to a central pillar of American democracy popular sovereignty State legislatures now effectively determine the political composition of the US House The book answers the Court's challenge to find a new standard for gerrymandering that is both constitutionally grounded and legally manageable It argues that the scientifically rigorous partisan symmetry measure is an appropriate legal standard for partisan gerrymandering as it logically implies the constitutional right to individual equality and can be practically applied **Monthly Catalogue, United States Public Documents**, 1989 *Economics of Means-Tested Transfer Programs in the United States, Volume I* Robert A.
