His research program focuses on the strategic creation, dissemination, and effects of national and international ideas—such as American exceptionalism and anti-Americanism—that are regularly communicated within and across national and cultural boundaries.

Charles M. Rowling is an Associate Professor of Political Science at the University of Nebraska-Kearney. His research focuses on the role of political communication, news coverage, and public opinion in U.S. foreign policy.

Abstract

The idea of American exceptionalism has shaped American politics and captivated audiences for centuries. This study examines the global contexts in which U.S. presidents have invoked the idea of American exceptionalism when addressing foreign audiences since the end of World War II. Our results reveal: (a) differences in how U.S. presidents invoke American exceptionalism when speaking to a global audience (e.g. the United Nations) versus more localized, foreign audiences within individual states; (b) significant variation regarding which countries are more likely to be targets of American exceptionalism in U.S. presidential discourse; and (c) the profound impact that the end of the Cold War had on these dynamics.

Race and U.S. Foreign Policy from Colonial Times Through the Age of Jackson E. Nathaniel Gates,2021-12-24 First published in 1998 Explores the concept of race The term race which originally denoted genealogical or class identity has in

the comparatively brief span of 300 years taken on an entirely new meaning In the wake of the Enlightenment it came to be applied to social groups This ideological transformation coupled with a dogmatic insistence that the groups so designated were natural and not socially created gave birth to the modern notion of races as genetically distinct entities The results of this view were the encoding of race and racial hierarchies in law literature and culture How racial categories facilitate social control The articles in the series demonstrate that the classification of humans according to selected physical characteristics was an arbitrary decision that was not based on valid scientific method They also examine the impact of colonialism on the propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the interests of dominant social groups Finally the collection surveys how laws based on race have been enacted around the world to deny power to minority groups A multidisciplinary resource This collection of outstanding articles brings multiple perspectives to bear on race theory and draws on a wider range of periodicals than even the largest library usually holds Even if all the articles were available on campus chances are that a student would have to track them down in several libraries and microfilm collections Providing of course that no journals were reserved for graduate students out for binding or simply missing This convenient set saves students substantial time and effort by making available all the key articles in one reliable source

War and Ideas John Mueller, 2013-09-13 This book collects the key essays together with updating notes and commentary of Professor John Mueller on war and the role of ideas and opinions Mueller has maintained that war and peace are in essence merely ideas and that war has waned as the notion that peace is a decidedly good idea has gained currency The first part of the book extends this argument noting that as ideas have spread war is losing out not only in the developed world but now in the developing one and that even civil war is in marked decline It also assesses and critiques theories arguing that this phenomenon is caused by the rising acceptance of democracy and or capitalism The second part argues that the Cold War was at base a clash of ideas that were seen to be threatening not of arms balances domestic systems geography or international structure It also maintains that there has been a considerable

tendency to exaggerate security threats currently in particular the one presented by international terrorism and to see them in excessively military terms The third section deals with the role public opinion plays in foreign policy and argues that many earlier conclusions about opinion during the Korean and Vietnam Wars including especially ones concerning the importance of casualties in determining popular support for war apply to more recent military ventures in the Persian Gulf Bosnia Iraq and Afghanistan It also assesses the difficulties leaders and idea entrepreneurs often encounter when they try to manage or manipulate public opinion This book will be of much interest to students of international relations security studies foreign policy and international history

Ideas and Foreign Policy Judith Goldstein, Robert O. Keohane, 2019-06-30 Do people's beliefs help to explain foreign policy decisions or is political activity better understood as the self-interested behavior of key actors The collaborative effort of a group of distinguished scholars this volume breaks new ground in demonstrating how ideas can shape policy even when actors are motivated by rational self-interest After an introduction outlining a new framework for approaching the role of ideas in foreign policy making well-crafted case studies test the approach The function of ideas as road maps that reduce uncertainty is examined in chapters on human rights decolonization the creation of socialist economies in China and Eastern Europe and the postwar Anglo-American economic settlement Discussions of parliamentary ideas in seventeenth-century England and of the Single European Act illustrate the role of ideas in resolving problems of coordination The process by which ideas are institutionalized is further explored in chapters on the Peace of Westphalia and on German and Japanese efforts to cope with contemporary terrorism
