US Navy F-4 Phantom II MiG Killers 0:

US Navy F-4 Phantom II MiG Killers 1965-70 Brad Elward, Peter E. Davies, 2012-11-20 For every American fighter pilot involved in the Vietnam War the ultimate goal was to kill a MiG. In eight years of conflict 43 Vietnamese Peoples Air Force aircraft were claimed by US Navy and US Marine Corps Phantom II crews and one single ace crew produced. Navy Phantom IIs scored the first kills of the Vietnam War in April 1965 as well as scoring the last in January 1973. Featuring photographs as well as stunning aircraft profiles this volume charts the successes of the navy fighter crews as they encountered MiGs, Missiles and AAA over the jungles of North Vietnam.

US Navy F-4 Phantom II MiG Killers 1972-73 Brad Elward, Peter E. Davies, 2012-11-20 The second of two books on the Navy's Phantom II MiG killers of the Vietnam War this book covers the numerous actions fought out over North Vietnam during the Linebacker I and II operations of 1972-73. No fewer than 17 MiGs were downed during this period five of them by the Navy's sole aces of the conflict: Lt Randy Cunningham and Willie Driscoll of VF 96. Drawing on primary sources such as surviving Phantom II aircrew and official navy documentation the author has assembled the most precise appraisal of fighter operations involving US Navy Phantom II units and those elusive MiGs ever seen in print.

F-8 Crusader vs MiG-17 Peter Mersky, 2014-11-20 A detailed examination of the F-8 Crusader, the primary naval fighter when the conflict in Vietnam escalated in 1964, versus its opposite number in the Vietnamese Peoples Air Force (VPAF), the MiG-17. Revered by Naval Aviators as the last of the gunfighters due to its quartet of Colt Browning Mk 12 20 mm cannons, the F-8 Crusader enjoyed great success against VPAF MiG-17s during the Rolling Thunder campaign of 1966-68. Close to 500 examples served with no fewer than 17 frontline units. But the MiG-17's unequalled low speed manoeuvrability, small size and powerful cannon armament meant that the American forces didn't have it all their own way. This fully illustrated book featuring photographs, maps and battlescene artwork reveals the tactics that were developed by pilots on both sides to give themselves the edge in air-to-air dogfights, allowing the reader to understand how the differing design and development doctrines played a part in combat.

USN McDonnell Douglas F-4 Phantom II Peter E. Davies, 2016-03-24 Originally designed as a carrier-borne long range interceptor armed with radar-guided missiles and tasked with defence against missile-launching bombers, the Phantom II went on to establish itself as one of the most important multi-role fighter, attack and reconnaissance aircraft of the 20th century. Arguably the United States' most important aircraft in the Vietnam War where it played the role of workhorse as well as being a deadly MiG interceptor, the Phantom was also a mainstay of Atlantic Fleet operations intercepting Soviet bomber and reconnaissance aircraft and turning them away from the carrier groups at the height of the Cold War. This book reveals the design and development history of the naval Phantom, its variants and the exported designs adopted by other NATO countries. Packed with illustrations, photographs and first-hand accounts it provides a technical history of one of the most famous aircraft ever built.

F-105 Thunderchief MiG Killers of the Vietnam War Peter E. Davies, 2014-10-20 An illustrated history of the F-105's success against

MiGs a relatively little known aspect of the Vietnam War and a testament to the jet's versatility and the skill of the pilots involved. Despite its F for fighter designation the F 105 was designed and purchased to give the USAF an aircraft capable of the delivery of nuclear weapons at very high speed long range and below the radar altitudes. However when the Vietnam War began it also emerged as USAF's best available tactical bomber for a limited conventional war as well. Extensively targeted by MiG 17s and MiG 21s the F 105 pilots developed innovative tactics that allowed them to compete in air to air duels with their smaller more manoeuvrable enemies. Illustrated throughout with extensive photographs detailing weapon loads internal features and action shots of actual engagements this volume examines the conduct of the Rolling Thunder strike missions and the tactics used for attack and defence by the attack escort fighter and radar monitoring elements within strike formations.

US Navy F-4 Phantom II MiG Killers 1972-73 Brad Elward, Peter E. Davies, 2012-11-20 The second of two books on the Navy's Phantom II MiG killers of the Vietnam War this book covers the numerous actions fought out over North Vietnam during the Linebacker I and II operations of 1972-73. No fewer than 17 MiGs were downed during this period five of them by the Navy's sole aces of the conflict Lts Randy Cunningham and Willie Driscoll of VF 96. USAF F-4 Phantom II MiG Killers 1972-73 Peter E. Davies, 2012-11-20 A detailed history of the F 4 Phantom II the USAF workhorse fighter bomber for the Linebacker campaign which eventually saw US forces withdraw from Vietnam with honour in 1973. This book covers the F 4 attacks on numerous targets in North Vietnamese cities such as Hanoi and Haiphong as well as its engagements with Vietnamese MiG 19s and MiG 21s hell bent on defending the north from Yankee air pirates. The USAF's only ace crew which scored their five kills during 1972 is also covered alongside many detailed photographs a large proportion of which haven't been published before.

USN F-4 Phantom II vs VPAF MiG-17/19 Peter E. Davies, 2011-12-20 A fully illustrated account of the duels between the carrier borne interceptor of the US Navy and the agile MiG during the height of the Vietnam air war. The Vietnam War placed unexpected demands upon American military forces and equipment. The principal US naval fighter the McDonnell F 4 Phantom had originally been designed to defend the Fleet from air attack at long range. However its tremendous power and bomb carrying capacity made it an obvious candidate for the attack mission in Vietnam from 1965 onwards. Its opponent was the MiG 17 a direct descendant of the MiG 15 which had given USAF Sabre jets a hard fight in the Korean War. This book brings to life their dangerous duels and includes detailed cockpit views and other specially commissioned artwork to highlight the benefits and shortcomings of each plane type. It was in the skies over Vietnam that many of the techniques of air combat evolved as pilots learned how to use and to defeat supersonic fighters for the first time.

US Navy F-4 Phantom II Units of the Vietnam War 1969-73 Peter E. Davies, 2018-05-31 Although the F 4 Phantom II was the most important fighter bomber to see action with all three American services during the Vietnam War it was essentially a

U S Navy design and the carrier borne squadron crews were its main operators in combat The aircraft pioneered the use of long range radar guided missiles in combat although the majority of its Vietnam missions involved ground attack with a variety of innovative ordnance From 1968 to 1973 the Phantom II was the standard U S Navy fighter in Southeast Asia having replaced several other types Its performance and versatility enabled it to perform a variety of different missions and switch roles as necessary in the assault on some of the world s most heavily defended territory Including detailed colour profiles and first person commentary from active participants in the F 4 s naval combat history this is a detailed study of the U S armed services most famous post war fighter **USAF F-4 Phantom II MiG Killers 1965-68** Peter E.

Davies,2012-11-20 The USAF introduced the F 4C Phantom II into the Vietnam war in April 1965 from Ubon RTAB Thailand The F 4C D soon became the Air Force s principal fighter over the North destroying 85 MiGs by the close of 1968 This book describes how the USAF turned a gunless naval interceptor into an opponent to the more nimble VPAF MiGs It explains how the Air Force gradually followed US Navy initiatives in the use of the F 4 s missile armament but employed very different tactics and aircrew training The roles of key personalities such as Col Robin Oldan are discussed together with armament and markings crews and engagements US Navy F-4 Phantom II Units of the Vietnam War 1964-68 Peter E.

Davies,2016-08-25 The F 4 Phantom II is perhaps the most famous post war fighter Primarily used as a land based fighter bomber and reconnaissance platform its naval origins and the immense contribution made to the US war effort in Vietnam by its original carrier based versions began its legend This title examines the unique aspects of the Phantom that made it so crucial to US Navy pilots during the Vietnam War its massive engine power long range speed the most powerful airborne search and fire control radar installed in a fighter at the time and of course its versatility as a ground attack and air to air platform Packed with first hand accounts unique profile artwork and rare photographs this is the history of one of the most important aircraft to be stationed on carriers off Southeast Asia during the war **MiG-21 Aces of the Vietnam War**

István Toperczer,2017-09-21 Having learned their trade on the subsonic MiG 17 pilots of the Vietnamese People s Air Force VPAF received their first examples of the legendary MiG 21 supersonic fighter in 1966 Soon thrown into combat over North Vietnam the guided missile equipped MiG 21 proved a deadly opponent for the US Air Force US Navy and US Marine Corps crews striking at targets deep in communist territory Although the communist pilots initially struggled to come to terms with the fighter s air search radar and weapons systems the ceaseless cycle of combat operations quickly honed their skills Indeed by the time the last US aircraft a B 52 was claimed by the VPAF on 28 December 1972 no fewer than 13 pilots had become aces flying the MiG 21 Fully illustrated with wartime photographs and detailed colour artwork plates and including enthralling combat reports this book examines the many variants of the MiG 21 that fought in the conflict the schemes they wore and the pilots that flew them **F-104 Starfighter Units in Combat** Peter E. Davies,2014-11-20 This title covers the

technical characteristics of the F 104 Starfighter one of the most widely used and popular aircraft in history Although built in

small numbers for the USAF the F 104C fought and survived for almost three years in Vietnam There it was engaged in some of the war s most famous battles including the legendary operation Bolo where seven North Vietnamese MiGs were destroyed without the loss of a single US fighter This small tough and very fast fighter dubbed The Missile with a Man in It was called upon to do things it was not specifically designed for and did them admirably Featuring illustrations and photographs detailing the variety of nose paint schemes and weapons configurations this comprehensive appraisal of the F 104 Starfighter is ideal for modelling and aviation enthusiasts alike *F9F Panther Units of the Korean War* Warren Thompson,2014-06-20

In 1948 the USAF Marine Corps and US Navy were concentrating on converting over to an all jet force When the Korean War started in June 1950 the USAF had built up a sizable jet force in the Far East while the US Navy was in the early stages of getting F9F Panthers operational as replacements for its piston engined F8F Bearcats At about this time the Marine Corps had also begun using the Panthers in limited numbers Operating from aircraft carriers off the Korean coast F9Fs helped stop the North Korean invasion within two weeks of the communists crossing the 38th Parallel The Panthers escorting carrier based AD Skyraiders and F4U Corsairs penetrated as far north as Pyongyang where they bombed and strafed targets that the North Koreans thought were out of range The Panthers also took the battle all the way to the Yalu River long before the MiG 15s became a threat The F9F s basic tasking was aerial supremacy and combat air patrols but they also excelled in bombing and strafing attacks This illustrated volume charts the Panther s solid performance as a fighter bomber in Korea which accelerated the development of swept wing carrier fighters during the remainder of the 1950s and well into the Cold War with the Soviet Union **US Marine Corps and RAAF Hornet Units of Operation Iraqi Freedom** Tony

Holmes,2006-02-28 Some 84 of the 250 Hornets committed by Central Command to Operation Iraqi Freedom 2003 present proudly bore MARINE titling on their rear fuselages A further 14 were marked with the distinctive kangaroo roundel of the Royal Australian Air Force RAAF The exploits achieved by the units that flew these jets into combat is detailed in this volume the third of three titles published in the Combat Aircraft series on what has been dubbed by many TACAIR insiders the Hornet s War Although the bulk of this book deals with the major hostilities phase of OIF I which ran from 20 March to 20 April 2003 the decade of pre war OSW missions and ongoing post war OIF II operations are also covered in significant detail from the Marine Corps perspective Profusely illustrated with rare frontline photography and more than 30 specially commissioned colour artworks this book also features the combat experiences of 24 pilots and Weapons Systems Officers
