Final Report Michael Sauder, 2009 *U. S. News Ultimate Guide to Law Schools* Anne McGrath, 2008 Choose the Right School and Get In The U S News Ultimate Guide to Law Schools combines expert advice on how to get into the school of your choice with the most up to date information on the nation's accredited programs This book gives you the information you need to make wise decisions about your future This step by step guide covers How to choose the right program A look inside the top five law schools The applications test scores essays and recommendations that will get you in How to pay for it all plus law schools with loan repayment assistance programs Comprehensive profiles of the country's American Bar Association accredited law schools including Tuition and financial aid information LSAT scores and GPAs of students who enroll Acceptance rates Bar passage rates Salary ranges of recent graduates Plus exclusive U S News lists that answer these questions What are the hardest and easiest law schools to get into Who's the priciest Who's the cheapest What schools award the most and the least financial aid Whose graduates have the most debt The least Whose students are the most and least likely to drop out Whose graduates earn the most money The least Where do graduates work *Engines of Anxiety* Wendy Nelson Espeland, Michael Sauder, Wendy Espeland, 2016-05-09 Students and the public routinely consult various published college rankings to assess the quality of colleges and universities and easily compare different schools However many institutions have responded to the rankings in ways that benefit neither the schools nor their students In *Engines of Anxiety* sociologists Wendy Espeland and Michael Sauder delve deep into the mechanisms of law school rankings which have become a top priority within legal education Based on a wealth of observational data and over 200 in depth interviews with law students university deans and other administrators they show how the scramble for high rankings has affected the missions and practices of many law schools *Engines of Anxiety* tracks how rankings such as those published annually by the U S News World Report permeate every aspect of legal education beginning with the admissions process The authors find that prospective law students not only rely heavily on such rankings to evaluate school quality but also internalize rankings as expressions of their own abilities and flaws For example they often view rejections from first tier schools as a sign of personal failure The rankings also affect the decisions of admissions officers who try to balance admitting diverse classes with preserving the school's ranking which is dependent on factors such as the median LSAT score of the entering class Espeland and Sauder find that law schools face pressure to admit applicants with high test scores over lower scoring candidates who possess other favorable credentials *Engines of Anxiety* also reveals how rankings have influenced law schools career service departments Because graduates job placements play a major role in the rankings many institutions have shifted their career services resources toward tracking placements and away from counseling and network building In turn law firms regularly use school rankings to recruit and screen job candidates perpetuating a cycle in which highly ranked schools enjoy increasing prestige As a result the rankings create and reinforce a rigid hierarchy that penalizes lower tier schools that do

not conform to the restrictive standards used in the rankings The authors show that as law schools compete to improve their rankings their programs become more homogenized and less accessible to non traditional students The ranking system is considered a valuable resource for learning about more than 200 law schools Yet Engines of Anxiety shows that the drive to increase a school s rankings has negative consequences for students educators and administrators and has implications for all educational programs that are quantified in similar ways
