Alvarez,2023-04-18 This book provides invaluable guidance to all those with an interest in placemaking and the built environment from those with no experience to those who have worked for many years in industry illustrating key principles that will secure higher quality more sustainable design in accessible jargon free language The author explains the design process in a straightforward way exploring the different roles and highlighting the opportunities and limitations different agencies have to influence design over the various stages of the process Examples from the UK and worldwide look at how the system operates and how best practice can make a real difference on the ground Case studies examine situations where quality or sustainability fell short and how this could have been avoided This book also showcases a variety of evaluation tools explaining how they operate and giving guidance on how to create project specific tools to drive schemes forward With community empowerment at its core the book explains technical language and shares bountiful knowledge to broaden place democracy and make influencing design accessible to many not just a few This is a book that brings together all the various parties involved in shaping the built environment demonstrating that collaboration and mutual understanding are key to achieving better quality more sustainable design Community-based management of freshwater resources: A practitioners' guide to applying TNC's Voice, Choice, and Action framework Zhang, Wei,ElDidi, Hagar,Swallow, Kimberly A.,Meinzen-Dick, Ruth Suseela,Ringler, Claudia,Masuda, Yuta,Aldous, Allison,2020-04-20 Despite being one of the most critical resources for all life on Earth freshwater represents only 3 percent of the planet s water supply but only 0 5 percent is readily accessible to humans In addition the available freshwater resources FWR are unequally distributed across

the globe so many areas and populations face issues of water scarcity and quality FWR are under enormous stress from agricultural systems climate change and other factors directly linked to human behavior including population growth and industrialization Moreover the institutions intended to manage FWR under stress may be ill equipped to do so especially in the context of multiple often competing claims on FWR and the complexity of water flows across time and space Growing awareness of these challenges has given rise to a sense of urgency to raise attention and catalyze action toward improving the management of FWR especially at the local level This guide aims to advance the understanding of how communities can sustainably manage FWR by applying The Nature Conservancy s Voice Choice and Action VCA framework The original framework focused more on terrestrial resources but has been adapted here to address the unique characteristics of FWR These characteristics present significant implications for sustainable resource management and therefore need to be taken into account in the design and implementation of community based conservation CBC programs
