What Every Person Should Know About War Chris Hedges,2007-11-01 Acclaimed New York Times journalist and author Chris Hedges offers a critical and fascinating lesson in the dangerous realities of our age a stark look at the effects of war on combatants Utterly lacking in rhetoric or dogma this manual relies instead on bare fact frank description and a spare question and answer format Hedges allows U S military documentation of the brutalizing physical and psychological consequences of combat to speak for itself Hedges poses dozens of questions that young soldiers might ask

about combat and then answers them by quoting from medical and psychological studies What are my chances of being wounded or killed if we go to war What does it feel like to get shot What do artillery shells do to you What is the most painful way to get wounded Will I be afraid What could happen to me in a nuclear attack What does it feel like to kill someone Can I withstand torture What are the long term consequences of combat stress What will happen to my body after I die This profound and devastating portrayal of the horrors to which we subject our armed forces stands as a ringing indictment of the glorification of war and the concealment of its barbarity Field Manuals United States. The U.S. Army Survival Manual Department of the Army Headquarters,2009-06-09 A Simon Schuster eBook Simon Schuster has a great book for every reader **The U.S. Army Survival Manual** Department of the Army Headquarters,2009-06 An accessible reference designed to be readily used in times of extreme stress shares key survival information as practiced by the military in a guide that offers insight into enduring a range of hostile climates and obtaining such basic elements as drinking water shelter and food Original **Monthly Catalog of United States Government Publications** United States. Superintendent of Documents,1986 *Military Review* ,1966 *Doctrine of Eternal Recurrence* Austin G. Long,2008 The publication of a new counterinsurgency COIN doctrine manual in late 2006 was widely heralded as an indication that the U S military was finally coming to understand the problems it has recently faced in Iraq and Afghanistan However this interpretation assumes a tight linkage between doctrine as written and operations as actually conducted By comparing modern counterinsurgency doctrine and operations to those of 1960s this paper tests and ultimately disproves this proposition An examination of COIN doctrine and operations in the 1960s reveals that operations seldom matched written doctrine Instead of winning hearts and minds improving civil military relations conducting small unit operations and gathering intelligence most Vietnam War commanders and units attempted to defeat the insurgency through large scale operations and overwhelming firepower Modern U S COIN operations in Afghanistan and Iraq demonstrate a similar preference for high intensity warfare and a similar inability to adapt technologically and mentally to the requirements of COIN To help explain the discrepancy between written doctrine and actual operations this paper posits that ingrained organizational concepts and beliefs have a much greater influence on operations than written doctrine While embedded beliefs can help organizations as they conduct their preferred missions they can be detrimental in other contexts Mental and material preparation for high intensity warfare has made the U S military poorly suited to COIN Altering these beliefs will require more than just new doctrine and some additional professional education The services must reorient themselves mentally as well as physically provided by publisher **Army** ,1985 Textbooks of Military Medicine: Recruit Medicine , Covers important aspects of recruit medicine such as the medical qualifications process health promotion and environmental risk management chronic diseases such as asthma injury prevention and management communicable illnesses behavior dental and women s health and recruit mortality **Combat Ready? The Eighth U.S. Army on the Eve of the Korean**

War Thomas E. Hanson, 2010 Historians and sliders have not been kind to either General Douglas MacArthur or the soldiers whom he placed in harm's way in the summer of 1950. This study seeks to redress the imbalance that exists between fact and interpretation. For too long historians and soldiers have roundly criticized Task Force Smith's performance extrapolated from its fate a set of assumptions about what constitutes readiness and then used those assumptions to condemn the entire Eighth Army. The reality is much more complex. A proper examination of the historical record reveals wide disparities in the readiness and combat effectiveness of the subordinate units of America's first forward deployed Cold War field force. This work will demonstrate how units achieved that readiness by means of case studies of four infantry regiments, one from each of the four infantry divisions that constituted the Eighth Army in 1950. It synthesizes contemporary training doctrine, training records generated by maneuver units, unit histories, reports of inspections by outside agencies, contemporary self-assessments, and the observations of veterans who served in Japan in the fifteen months before the outbreak of the Korean War. It challenges the long-standing reputation of the Eighth Army as flabby, dispirited, and weak.

Introduction Confirmed Kill Nigel Cawthorne, 2011-12-06 Real-life accounts of the highly trained marksmen who have honed the art of killing to a fine edge and can turn the tides of war with one perfect shot. Elite snipers with their deadly aim, iron nerves, killer instincts, and unwavering courage play a more critical role in modern military missions than ever before. *Confirmed Kill* accurately recounts the heroic actions of the world's deadliest snipers from the one-on-one duel between a U.S. Marine sniper and his North Vietnamese counterpart that ended with a miracle shot straight through the Vietcong soldier's gun scope to the shot fired from a mountain ridge in Afghanistan that dropped an unsuspecting Taliban fighter over a mile away. *Confirmed Kill* details the missions of the most legendary snipers: Chuck Mawhinney, Marine with 103 Vietnam War confirmed kills; Adelbert Waldron, U.S. record holder with 109 confirmed kills; Timothy Kellner, Army sergeant with more than 100 confirmed kills in Operation Iraqi Freedom; Craig Harrison, British corporal with the world record kill shot at 2,707 Yards. *Field Radio Repairer* United States. A Military History of the Cold War, 1962-1991 Jonathan M. House, 2020-09-24 Study of the Cold War all too often shows us the war that wasn't fought. The reality of course is that many hot conflicts did occur, some with the great powers' weapons and approval, others without. It is this reality and this period of quasi-war and semiconflict that Jonathan M. House plumbs in *A Military History of the Cold War, 1962-1991*, a complex case study in the Clausewitzian relationship between policy and military force during a time of global upheaval and political realignment. This volume opens a new perspective on three fraught decades of Cold War history, revealing how the realities of time, distance, resources, and military culture often constrained and diverted the inclinations or policies of world leaders. In addition to the Vietnam War and nuclear confrontations between the USSR and the United States, this period saw dozens of regional wars and insurgencies fought throughout Asia, Africa, and Latin America: Cuba, Pakistan, Indonesia, Israel, Egypt, and

South Africa pursued their own goals in ways that drew the superpowers into regional disputes. Even clashes ostensibly unrelated to the politics of East West confrontation such as the Nigerian Biafran conflict, the Falklands/Malvinas War, and the Indonesian occupation of East Timor involved armed forces, weapons, and tactics developed for the larger conflict and thus come under House's scrutiny. His study also takes up nontraditional or specialized aspects of the period including weapons of mass destruction, civil-military relations, civil defense, and control of domestic disorders. The result is a single integrated survey and analysis of a complex period in geopolitical history which fills a significant gap in our knowledge of the organization, logistics, operations, and tactics involved in conflict throughout the Cold War.
