Nursing World ,1927 **Publics and their health** Alex Mold,Peder Clark,Hannah J. Elizabeth,2023-03-07 The COVID 19 pandemic has resulted in a renewed interest in the relationship between public health authorities and the public Particular attention has been paid to problem publics who do not follow health advice This is not a new issue As the chapters in this collection demonstrate the designation of certain groups or populations as problem publics has long been a part of health policy and practice By exploring the creation and management of these problem publics in a range of time periods and geographical locations the collection sheds light on what is both specific and particular For health authorities publics themselves were often thought to pose problems because of their behaviour identity or location But publics could and did resist this framing There were and continue to be many problems with seeing publics as problems **Contexts of Contemporary Nursing** Graham R. Williamson,Tim Jenkinson,Tracey Proctor-Childs,2010-06-22 A wide variety of factors impact on the scope of nursing practice including government policies organisational structures the media education future healthcare directions and service users themselves It is an NMC requirement that nurses understand these factors in order to deliver quality care This book provides a clear and practical introduction to these contexts for the new nursing student The new edition formerly Nursing in Contemporary Healthcare Practice has been revised to cover the organisational structures that students will find themselves working in the various bodies involved in healthcare policy and the big issues in current and future healthcare delivery *Annual Report* New York (State).
