Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality **A Perfect Mess** David F. Labaree,2017-04-21 A history of higher education in America and an investigation into the secrets of its success A Perfect Mess should become a classic Times Higher Education Read about America s colleges and universities

rising student debt affirmative action debates conflicts between faculty and administrators and it's clear that higher education in this country is a total mess But as David F Labaree reminds us in this book it's always been that way And that's exactly why it has become the most successful and sought after source of learning in the world Detailing American higher education's unusual struggle for survival in a free market that never guaranteed its place in society a fact that seemed to doom it in its early days in the nineteenth century he tells a lively story of the entrepreneurial spirit that drove American higher education to become the best And the best it is today America's universities and colleges produce the most scholarship earn the most Nobel prizes hold the largest endowments and attract the most esteemed students and scholars from around the world But this was not an inevitability In their early years weakly funded American schools had to rely on student tuition and alumni donations to survive This gave them tremendous autonomy to seek out sources of financial support and pursue unconventional opportunities As Labaree shows by striving mightily to meet social needs and fulfill individual ambitions they developed a broad base of political and financial support that grounded by large undergraduate programs allowed for the most cutting edge research and advanced graduate study ever conducted As a result American higher education eventually managed to combine a unique mix of the populist the practical and the elite in a single complex system The answers to today's problems in higher education are not easy but as this book shows they shouldn't be No single person or institution can determine higher education's future It is something that faculty administrators and students adapting to society's needs will determine together just as they have always done [The College Completion Glass—Half-Full or Half-Empty?](#) Tiffany Beth Mfume, 2018-12-21 Despite the Great Recession and looming student loan debt crisis college education remains the most proven invaluable lifetime investment and serves as the most reliable path to upward mobility and socioeconomic class reassignment Mfume suggests that the value added of even one year of college can be transformative As higher education professionals and partners continue to advocate for new and improved college retention and graduation measures [The College Completion Glass Half Full or Half Empty Exploring the Value of Postsecondary Education](#) presents a new paradigm for higher education one that focuses on the value added of postsecondary education as well as on student success beyond the traditional measure of college graduation rates a model which merges conventional practices and supports for students with non traditional partnerships with and advocacy from successful non completers **The Abundant University** Michael D. Smith, 2023-09-19 Why our current system of higher education is financially and morally unsustainable and how to address the crisis with the creative implementation of digital technologies For too long our system of higher education has been defined by scarcity scarcity in enrollment scarcity in instruction and scarcity in credentials In addition to failing students professionally this system has exacerbated social injustice and socioeconomic stratification across the globe In [The Abundant University](#) Michael D Smith argues that the only way to create a financially and morally sustainable higher education system is by embracing digital technologies for enrolling

instructing and credentialing students the same technologies that we have seen create abundance in access to resources in industry after industry The Abundant University explains how we got our current system why it s such an expensive inefficient mess and how a system based on exclusivity cannot foster inclusivity Smith challenges the resistance to digital technologies that we have already seen among numerous institutions citing the examples of faculty resistance toward digital learning platforms While acknowledging the understandable self preservation instinct of our current system of residential education Smith makes a case for how technology can engender greater educational opportunity and create changes that will benefit students employers and society as a whole

The Slippery Slope of Healthcare Steven Z. Kussin,2020-03-24 Dr Steven Kussin physician and a pioneer in the Shared Decision movement takes readers through the steps of how to avoid the many pitfalls

of unnecessary and sometimes even dangerous medical care The American healthcare system is subsidized by its services to healthy people The goal as it is for any business is to encourage people to become consumers by creating an emotionally fueled demand for things that are suddenly and urgently needed It s hard to make healthy people well it s easy to make them sick Under the goal to make you even healthier the medical industry identifies and encourages investigations and preventive technologies for problems unlikely to occur unlikely to harm unlikely to benefit from testing and once diagnosed unlikely to benefit from treatment Profitable services go on indefinitely for those who are young and well For the health care industry being in good health is not just the best way to live good health is also the slowest way to die Many people find themselves on what the author calls the Slippery Slope experiencing a cascade of escalating misfortunes produced by more tests with incrementally greater risk expense and fewer benefits Many people who in the attempt to improve what is already just fine unquestioningly pay an immediate and visible price for what are distant invisible and uncertain benefits The central starting point for initiating a Slippery Slope adventure can be the first blood test the first screening test the first x ray the first pill or the first diagnosis that s accepted by unwitting and trusting consumers The bottom of the Slippery Slope is occupied by those previously well but who now are damaged and by others who suffered needless unscheduled deaths America s famed consumer skepticism when judging retail products is curiously and dangerously absent in their interactions within the healthcare system Here Steven Kussin offers strategies that give readers knowledge and power by offering unique perspectives information and resources He confronts the mighty forces arrayed against health care consumers and helps readers learn to identify them themselves The power of money the authority of science the stature of physicians the lure of elective health improvements the promise of technology and the pitch perfect perfect pitches of televised ads all conspire to push people in directions that are often at odds with their stated priorities and interests This book is dedicated to one lesson The view from atop the Slope before making a health care decision is better than the view from the bottom after having made a bad one For more information visit <https://theslipperyslopebook.com> *Choosing a College* Norah Piehl, 2012-04-06 More than ten compelling essays debate the issues surrounding choosing a college Readers will evaluate topics such as whether paid admission consultants are useful and whether students should consider taking a year off between high school and college Essay sources include the Philadelphia Inquirer Editorial Staff Natalia Maldonado Peter Vartanian and Julia Reischel

Making, Keeping, and Losing Friends Janice M. McCabe, 2025-10-21 Draws attention to the importance of support networks for students as they make keep and lose friends throughout college and beyond We re all familiar with the sentiment that college is the best time of your life Along with a newfound sense of freedom students have a unique opportunity to forge lifelong friendships at a point in life when friendship is particularly important Why is it then that so many college students are falling victim to what the US Surgeon General termed an epidemic of loneliness and isolation How do different aspects of college life help or hinder students ability to form deep connections In *Making Keeping and Losing*

Friends How Campuses Shape College Students Networks sociologist Janice M McCabe shows that the way a college is structured whether students live in dorms or commute study abroad or stay close to campus have plentiful common areas for clubs to meet or not can either encourage or hinder the making of meaningful friendships Based on interviews with 95 students on three distinct campuses a small private college Dartmouth College a large public university University of New Hampshire and a non residential community college Manchester Community College McCabe captures a wide range of experiences and discovers how features of the campuses make it easier or harder for students to make and keep friends She shows how and why across all three institutions some students thrive in deep and lasting friendships with their peers As McCabe s research reveals we need to look at the structures of students networks the institutions they attend and the importance of their identities in these places if we are to truly uncover and address the loneliness epidemic facing today s young adults
