Routledge Handbook of Urban Forestry Francesco Ferrini, Cecil C. Konijnendijk van den Bosch, Alessio Fini, 2017-03-31 More than half the world's population now lives in cities. Creating sustainable healthy and aesthetic urban environments is therefore a major policy goal and research agenda. This comprehensive handbook provides a global overview of the state of the art and science of urban forestry. It describes the multiple roles and benefits of urban green areas in general and the specific role of trees including for issues such as air quality, human well-being and stormwater management. It reviews the various stresses experienced by trees in cities and tolerance mechanisms as well as cultural techniques for either pre-conditioning or alleviating stress after planting. It sets out sound planning, design, species selection, establishment and management of urban trees. It shows that close interactions with the local urban communities who benefit from trees are key to success. By drawing upon international state-of-the-art knowledge on arboriculture and urban forestry, the book provides a definitive overview of the field and is an essential reference text for students, researchers and practitioners.

Soil Basics, Management and Rhizosphere Engineering for Sustainable Agriculture Channarayappa C., D P Biradar, 2018-10-16 Increase in global population, drastic changes in the environment, soil degradation and decrease in quality and quantity of agricultural productivity warranted us to adapt sustainable farming practices. This book focuses on soil health management and creating a biased rhizosphere that can effectively augment the needs of sustainable agriculture.

Boiling Off John Hodgkins, 2020-02-01 In 1964, three cousins tapped three thousand sugar maples deep in the Maine woods. They called themselves Jackson Mountain Maple Farm. *Boiling Off* is the story of making Maine maple syrup commercially in Temple, Maine, for fifty-some years and how a thirty-year technology revolution beginning in the 1980s changed the face of Maine sugaring forever. Woven into the story of Jackson Mountain Maple Farm is the history of Maine sugaring beginning in Farmington in 1781 when Stephen Titcomb boiled off the first official pure Maine maple syrup in a cast iron kettle. *Boiling Off* tracks the evolution of sugaring technology from Titcomb's kettle to reverse osmosis.

and heat exchangers follows sap gathering techniques from buckets and oxen drawn drays to plastic tubing and vacuum pumps and records production in Maine from 8 000 gallons of maple syrup in 1985 to 709 000 gallons in 2017 The story describes the subtleties of syrup flavor how it is properly graded and the art of making award winning maple syrup It also reveals who produces Maine maple syrup where it is harvested and how L L Bean first came to stock it on their shelves
